Neurology and Trauma

The Wave

The Boat Repair Bible

London Goes To Sea is Peter J. Baumgartner's candid and captivating account of restoring an ageing fibreglass sailing boat over the course of four years and then introducing it to his native New England waters. His precise records illustrate every trial and triumph of the restoration process, and his careful attention to errors made along the way provides crucial insight for anyone considering a similar project. His writing combines the best elements of a brisk, entertaining narrative and a thoroughly practical handbook, making for a truly unique story that embraces every experience of the coastal sailor. His unflagging joy and enthusiasm for his old Cape Dory shine through on every page.

Votes, Party Systems and Democracy in Asia

Featuring essays, multiple-choice and true-false tests, lists, sidebars, and charts, the humorous but useful handbook for the

gay lifestyle includes "10 Things Not to Say When Telling Your Mother" and "A Guide to Gay Flora and Fauna."

Story Paper a Draw and Write Journal

From dirt bikes and jet skis to weed wackers and snowblowers, machines powered by small gas engines have become a permanent—and loud—fixture in American culture. But fifty years of high-speed fun and pristine lawns have not come without cost. In the first comprehensive history of the small-bore engine and the technology it powers, Paul R. Josephson explores the political, environmental, and public health issues surrounding one of America's most dangerous pastimes. Each chapter tells the story of an ecosystem within the United States and the devices that wreak havoc on it—personal watercraft (PWCs) on inland lakes and rivers; all-terrain vehicles (ATVs) in deserts and forests; lawn mowers and leaf blowers in suburbia. In addition to environmental impacts, Josephson discusses the development and promotion of these technologies, the legal and regulatory efforts made to improve their safety and environmental soundness, and the role of owners' clubs in encouraging responsible operation. Synthesizing information from medical journals, recent environmental research, nongovernmental organizations, and manufacturers, Josephson's compelling history leads to one irrefutable conclusion: these machines cannot be operated without loss of life and loss of habitat.

Damselfly Inn

Best in Show is a collection of photographs of well-groomed and award-winning dogs by New York City-based photographer Dolly Faibyshev. The images from the Westminster Kennel Club Dog Show and beyond focus on the unique—and often humorous—relationship between each dog and their handler. Dolly Faibyshev focuses on kitsch, irony, and the larger than life human and canine characters that make up Best in Show. The result is a colorful, vibrant, campy, and satirical take on this specific slice of Americana. • The colorful, closely cropped juxtapositions of each coiffed canine contestant and their dedicated human are both humorous and charming. • Sure to delight fans of all breeds of dogs • A universal and ideal book for all canine lovers with a sense of humor Best in Show captures a specific subculture of dog devotees primarily from the infamous Westminster Kennel Club Dog Show at Madison Square Garden in New York. • A perfect book for anyone who is completely and totally obsessed with dogs and the Westminster Kennel Club Dog Show • Photographers and contemporary art lovers will also love this celebration of Dolly Faibyshev's work • Great for fans of The Dogist: Photographic Encounters with 1,000 Dogs by Elias Weiss Friedman, Dogs by Lewis Blackwell and Tim Flach, and Underwater Dogs by Seth Casteel

We also help you identify when it's in your best interest to seek the personalized advice and services of a practicing lawyer.

The Lobster Fishery

The book *Working on the Wild Side* is collection of sixty short stories about the author's twenty-five-year career as a wildlife officer. The stories tend to focus on the humorous things he encountered over the years. Instead of the blood and guts stories, it is more about the funny things people said or did.

Brotherhood of the Bomb

"Totch Brown's memoirs of vanished days in the Ten Thousand Islands and the Everglades--the last real frontier in Florida, and even today the greatest roadless wilderness in the United States--are invaluable as well as vivid and entertaining, for Totch is a natural-born story-teller, and his accounts of fishing and gator hunting as well as his life beyond the law as gator poacher and drug runner are evocative and colorful, fresh and exciting."--from the foreword by Peter Matthiessen In the mysterious wilderness of swamps, marshes, and rivers that conceals life in the Florida Everglades, Totch Brown hung up his career as alligator hunter and commercial fisherman to become a self-confessed pot smuggler. Before the marijuana money rolled in, he survived excruciating poverty in one of the most primitive and beautiful spots on earth, Chokoloskee Island, in the mangrove keys known as the Ten Thousand Islands located at the western gateway to the Everglades National Park. Until he wrote this memoir--recollections from his childhood in the twenties that merge with reflections on a way of life dying at the hands of progress in the nineties--Totch had never read a book in his life. Still, his writing conveys the tension he experienced from trying to live off the land and within the laws of the land. Told with energy and authenticity, his story begins with the handful of souls who came to the area a hundred years ago to homestead on the high ground formed from oyster mounds built and left by the Calusa Indians. They lived close to nature in shacks built of tin or palmetto fans; they ate wild meat, Chokoloskee chicken (white ibis), swamp cabbage, even--when they were desperate--manatee; and they weathered all manner of natural disaster from hurricanes to swarms of "swamp angels" (mosquitoes). In his grandpa's day, Totch writes, outlaws and cutthroats would "shoot a man down just as quick as they'd knock down an egret, especially if he came between them and the plume birds." His grandparents were both contemporaries of Ed J. Watson, the subject of Peter Matthiessen's best-selling *Killing Mr. Watson*, and Totch is featured in the recent award-winning PBS film *Lost Man's River: An Everglades Adventure with Peter Matthiessen*. He also appeared in *Wind Across the Everglades*, the 1957 Budd Schulberg movie in which Totch and Burl Ives sing some of Totch's Florida cracker songs. Loren G. "Totch" Brown was born in Chokoloskee, Florida, in 1920. After purchasing his first motorboat at the age of thirteen (and retiring from formal schooling after the seventh grade) he worked as an alligator hunter, commercial fisherman, crabber, professional guide, poacher, marijuana runner, singer, and songwriter.

Intellectual Property: Patents, Trademarks, Copyrights and Trade Secrets

A driven Wall Street executive returns to her alma mater for a college reunion in the picturesque Berkshire Mountains of

Western Massachusetts. Constant devotion to her employer at the cost of having a life of her own had taken its toll. Pam felt she needed a few days away for a change of pace. Being accustomed to fending for herself, falling in love was the furthest thing from her mind. Striking up a casual conversation with Jake over a cup of coffee at an old haunt becomes the start of a long adventure that turns her world upside down.

Popular Mechanics

This book looks at the link between voters and political party systems in Asian democracies, focusing on India, Indonesia, Korea and the Philippines. It discusses this link in terms of three distinct elements: the formation of voters preferences, the translation of preferences into votes, and the translation of votes into seats. The book goes on to discuss how far the general rules of political party systems and their underlying causal mechanisms such as strategic voting are apparent in these Asian democracies. In particular, it explores the extent to which electoral rules and social structural variables affect the process of transforming preferences into a political party system within the context of Asian politics. The extensive areas covered by the book overcome the traditional sub-regional division of Asia, namely, East, Southeast and South Asia.

Wispa

This is the leading text on shipbuilding and marine construction, already widely used on a global basis by shipowners, shipbuilders and their commercial and legal advisers. It is now ten years since the last edition and much has changed in the world of shipbuilding since then, particularly in the period since 2008 which has seen numerous attempts by owners to renegotiate the prices and/or delivery dates of tonnage and an enormous increase in the level of "vessel rejection" and cancellation disputes. The Law of Shipbuilding Contracts examines the principles of English contract law as these apply to shipbuilding. This edition comments in detail upon the Shipbuilders' Association of Japan Form but now contrasts this with the NEWBUILDCON from BIMCO in 2007 and the China Maritime Arbitration Commission Forms from 2011 where these are significantly different. It also includes sections dealing with agreements ancillary to the shipbuilding contract and conversion contracts. Overview of book: Since the last edition in 2002, China has become a major global exporter of newbuildings and new BIMCO shipbuilding contract form has been published. Although retaining the original format of commentary on the Japanese (SAJ) standard form shipbuilding contract, the new edition contrasts this with the BIMCO form and the recently published China Maritime Arbitration Commission (CMAC) form in order to provide a broad ranging analysis of this complex subject. The book details the principles of English contract law as these apply to international shipbuilding. It will, as in the previous editions, also include sections dealing with the guarantees and other agreements which support the shipbuilding contract and with ship conversion contracts Essential reading for: - Purchasers and charterers of newbuilding tonnage - Shipbuilders and offshore construction yards - Lawyers and insurers working in the maritime and

offshore oil and gas sectors - Banks and other finance providers

Yamaha YZ125 1994-2001

This Story Paper Book is ideal for young children (approximately Kindergarten - third grade) who are learning how to write and properly proportion letters. It is also useful for older children who have delays with handwriting or have dysgraphia. Each story paper has a measured space at the top for a title, then a picture box for the child to draw an illustration and then five lines for the child to write their story. Each measured space consists of two lines (top and bottom) .65" apart and a dotted line in the center to guide the child as they write. Details: Size of the book: 8.5 x 11 inches No of pages: 150 Cover: Premium Glossy Finish

Travel Law

" I read on. And then it happens. On page 89. Mary is humiliated, and I know I have to step in. There she is, in an ill-fitting, wine-colored gown that doesn't do anything for her mousy complexion, gathering up her music, when I pass by, and spill my glass of punch right on her dress. I turn, and there is Kevin, dressed in a scarlet coat and all the rest of the uniform of a British Soldier, circa 1811. 'What are you doing here?' I ask. 'Well, this is the part I'm up to in the book.'" The smart middle child in a blue-collar family identifies with Mary, the middle child in Jane Austen's *Pride and Prejudice*. When Alice enters Mary's world and makes changes in both their lives, she learns that first impressions aren't always right.

Modern Sharking

Consumers Index to Product Evaluations & Information Sources

J. M. Adovasio has spent the last thirty years at the center of one of our most fiery scientific debates: Who were the first humans in the Americas, and how and when did they get there? At its heart, *The First Americans* is the story of the revolution in thinking that Adovasio and his fellow archaeologists have brought about, and the firestorm it has ignited. As he writes, "The work of lifetimes has been put at risk, reputations have been damaged, an astounding amount of silliness and even profound stupidity has been taken as serious thought, and always lurking in the background of all the argumentation and gnashing of tenets has been the question of whether the field of archaeology can ever be pursued as a science."

OECD Territorial Reviews: Teruel, Spain 2001

Advancements in boats, tackle, and equipment, as well as changes in the attitudes and ethics of shark fishermen, have revolutionized recreational sharking. Modern Sharking is about sustainable shark fishing, and in this book, anglers will learn the latest techniques for pursuing sharks while armed with rods, reels, and a higher level of knowledge and respect for their quarry. For more than three decades, Captain Mark Sampson stood watch over chum lines, ran shark tournaments, worked with biologists, chased IGFA records, and guided thousands of clients to unique shark encounters. Now Captain, he shares the knowledge and experience that allowed him to guide friends and clients to 17 IGFA world records for sharks. In Modern Sharking, Sampson examines how to chum, rig for, bait, hook, land, clean, cook, or release 20 species of sharks you'll most likely encounter. If you want to challenge one of the strongest, fastest, most exciting creatures on planet Earth, then Modern Sharking is for you.

The picturesque college town of Thornton, Vermont is the perfect place to open an inn. Or so Nan Grady thinks until a late summer storm drops a tree branch through her roof and local contractor Joss Fuller into her path. Romance has been the last thing on her career-oriented mind, but Nan can't deny the attraction between them. Nor can she deny the history between Joss and her most important guest: a sophisticated Manhattan academic. And then there is the mysterious vandal targeting her home and livelihood. As summer fades to autumn and Joss becomes a fixture around the Damsel Inn, Nan navigates the joys and complications of life in her new home town. But when the vandalism becomes increasingly upsetting, threatening Nan and her guests, as well as her budding relationship with Joss, Nan questions her place in the town, at the inn, and in Joss's heart.

The fascinating story of the men who founded the nuclear age, fully told for the first time The story of the twentieth century is largely the story of the power of science and technology. Within that story is the incredible tale of the human conflict between Robert Oppenheimer, Ernest Lawrence, and Edward Teller—the scientists most responsible for the advent of weapons of mass destruction. How did science—and its practitioners—enlisted in the service of the state during the Second World War, become a slave to its patron during the Cold War? The story of these three men, builders of the bombs, is fundamentally about loyalty—to country, to science, and to each other—and about the wrenching choices that had to be made when these allegiances came into conflict. Gregg Herken gives us the behind-the-scenes account based upon a decade of research, interviews, and newly released Freedom of Information Act and Russian documents. Brotherhood of the Bomb is a vital slice of American history told authoritatively—and grippingly—for the first time.

Pictorial History of Japanese Motorcycles

Stone Barrington and Holly Barker pursue a master spy and murderer in a tropical paradise that's getting hotter by the minute... Teddy Fay, the rogue agent last seen escaping from an imploding building in Iron Orchid, has been considered dead for some time now. But President Will Lee thinks Teddy may still be alive. In a top-secret Oval Office meeting, Stone learns that he and his cohorts, Holly Barker and Dino Bacchetti, are being sent to the beautiful Caribbean island of St. Marks, courtesy of the CIA, to track down Teddy once and for all. St. Marks is a vacationers' paradise, but its luxurious beach clubs and secluded mountain villas are home to corrupt local politicians and more than a few American expats with murky personal histories. Stone and Holly soon discover that in St. Marks, everyone is hiding something—and that Teddy Fay may just be hiding in plain sight.

Best in Show

Presents a portrait of the thirty-fourth president by his grandson which draws on personal stories and writings to chronicle Eisenhower's final years during the author's own coming-of-age, describing various aspects of the president's character.

The First Americans

From Susan Casey, bestselling author of *The Devil's Teeth*, an astonishing book about colossal, ship-swallowing rogue waves and the surfers who seek them out. For centuries, mariners have spun tales of gargantuan waves, 100-feet high or taller. Until recently scientists dismissed these stories—waves that high would seem to violate the laws of physics. But in the past few decades, as a startling number of ships vanished and new evidence has emerged, oceanographers realized something scary was brewing in the planet's waters. They found their proof in February 2000, when a British research vessel was trapped in a vortex of impossibly mammoth waves in the North Sea—including several that approached 100 feet. As scientists scramble to understand this phenomenon, others view the giant waves as the ultimate challenge. These are extreme surfers who fly around the world trying to ride the ocean's most destructive monsters. The pioneer of extreme surfing is the legendary Laird Hamilton, who, with a group of friends in Hawaii, figured out how to board suicidally large waves of 70 and 80 feet. Casey follows this unique tribe of people as they seek to conquer the holy grail of their sport, a 100-foot wave. In this mesmerizing account, the exploits of Hamilton and his fellow surfers are juxtaposed against scientists' urgent efforts to understand the destructive powers of waves—from the tsunami that wiped out 250,000 people in the Pacific in 2004 to the 1,740-foot-wave that recently leveled part of the Alaskan coast. Like Jon Krakauer's *Into Thin Air*, *The Wave* brilliantly portrays human beings confronting nature at its most ferocious.

Disorders due to trauma to the head, spine, and peripheral nerves are among the most common seen by neurologists and

neurosurgeons. This 42 chapter book is the comprehensive, definitive work on the subject, offering coverage on a wide range of clinical issues. The second edition features completely new sections on sports and neurologic trauma and iatrogenic trauma to complement existing comprehensive sections on head trauma, spinal trauma, plexus and peripheral nerve injuries, post-traumatic pain syndromes, environmental trauma, and posttraumatic sequelae and medicolegal aspects. Twenty-two of the first edition's chapters have been revised and updated, eight with new coauthors, and 20 new chapters have been added.

Working on the Wild Side: Humorous True Stories and Arrests from a Florida Game Warden

Roads I Have Traveled

Even the most well designed boats will suffer from wear and tear due to normal use on the water. Whilst accidents are less common, they too can result in damage which needs to be repaired on the spot. Highly illustrated, with step by step instructions, this book equips the reader with the vital 'first aid' skills he needs to make temporary repairs until he can get back to harbour. The Boat Repair Bible helps anyone who owns a boat to develop essential repair skills in the areas where problems most commonly arise. The section on hull and deck repairs covers fibreglass, wood, steel and ferro-cement hulls, and shows the reader how to deal with everything from leaks to impact damage, and much, much more. This section also covers domestic repairs, such as repairing upholstery, and troubleshooting problems with the heads. Amongst the many other techniques described, the section on general mechanics includes instructions on how to fix problems with a split fuel/water tank and leaking hydraulics, whilst the section on electrical repairs explains how to trace loose connections, replace damaged wiring and fix navigation instruments. The myriad of issues that can arise with the engine are covered in great detail, from how to deal with water in the fuel system to replacing the propeller and its shaft. From basic skills in safety, surveying and the use of tools, to advanced instructions on how to replace an engine, The Boat Repair Bible is as comprehensive as it is invaluable. With repairs specific to powerboats, sailboats, dinghies and outboards, it is a book no boat owner can afford not to own.
