Sudden changes, opportunities, or revelations have always carried a special significance in Western culture, from the Greek and later the Christian *kairos* to Evangelical experiences of conversion. This fascinating book explores the ways in which England, under the influence of industrializing forces and increased precision in assessing the passing of time, attached importance to moments, events that compress great significance into small units of time. Sue Zemka questions the importance that modernity invests in momentary events, from religion to aesthetics and philosophy. She argues for a strain in Victorian and early modern novels critical of the values the age invested in moments of time, and suggests that such novels also offer a correction to contemporary culture and criticism, with its emphasis on the momentary event as an agency of change.

Through her Inside Out Weight Loss program and seminars, along with podcasts downloaded more than 3 million times, Renée Stephens has helped countless people free themselves from emotional eating to achieve the body and life they've always desired. Now, in her first book, she shares the breakthrough lessons of her popular work and develops them into a complete, step-by-step program: Full-Filled: The 6-Week Weight- Loss Plan for Changing Your Relationship with Food—and Your Life—from the Inside Out. With Full-Filled, you will gain freedom from dieting as you use some of the world's most advanced mind and behavior-changing techniques. An intuitive and easy weight-loss program, Full-Filled will open the door to bigger transformations in your life. Not only will you drop excess physical pounds with Renée's expert guidance, you will get to the root of why you eat and you will lose your spiritual weight—by identifying why you eat the way you do and finding better ways to satisfy your true hunger without food. A former food addict, Stephens is a leading weight-loss coach who works with women and men who have spent years trying to free themselves from their weight struggle and to regain control of their lives. Women, Food and God led millions to spiritual insights; Full-Filled turns those insights into practical steps in an easy-to-follow program that will permanently change how you think about and behave around food. The Full-Filled program will identify and heal your underlying food issues and provide you with the specific tools to create new habits that will make you slim and healthy for a lifetime. This isn't about what foods you should and shouldn't eat (although Renée does share some of her favorite recipes to make weight loss happen faster and easier). Filled with personal success stories and a whole bag of transformative tips and tricks, Full-Filled will set you up for significant weight loss and provide the no-fail techniques for keeping the pounds off permanently.

Travels and Explorations of the Jesuit Missionaries in New France, 1610-1791

Textile is at once a language, a concept and a material thing. Philosophers such as Plato, Deleuze and Derrida have notably drawn on weaving processes to illustrate their ideas, and artists such as Ann Hamilton, Louise Bourgeois and Chiharu Shiota explore matters such as the seam, the needle and thread, and the flow of viscous materials in their work. Yet thinking about textile and making textile are often treated as separate and distinct practices, rather than parallel modes. This beautifully illustrated book brings together for the first time the language and materiality of textile to develop new models of thinking, writing and making. Through the work of thinkers such as Roland Barthes, Hélène Cixous and Luce Irigaray, and international artists like Eva Hesse and Helen Chadwick, textile practitioner, theorist and writer Catherine Dormor puts forward a new philosophy of textile. Exploring the material behaviours and philosophical language of folding, shimmering, seaming, viscosity, fraying and caressing, Dormor demonstrates how textile practice and theory are intricately woven together.

Baby Owner's Manual

[A]fter seeing their Iraq strategy unravel, North Korea get ignored, and the state of Palestine remain a wishful dream-I would dare say that the Bush Administration's foreign policy also needs substantive tuning. In the ultimate, if U.S. foreign policy is made more consistent with our core values, and the Bush Administration uses traditional diplomacy to further policy goals, its Second Term might turn out to be a memorable "American Intifada"! The Bush Diaries captures the true meaning of "freedom and democracy" by allowing an average American citizen to be heard. Author Jack Nargundkar comments, in real time, on the performance of not only President Bush, but also the pundits in the media who evaluate the presidency. The Wall Street Journal editorialized that the Bush economy had performed in a stellar fashion in 2002. The facts indicated something quite to the contrary-thus began Nargundkar's next couple of years of furious letter writing. Largely based on those letters as well as articles submitted to The Washington Post, The Wall Street Journal, and The New York Times, The Bush Diaries is a chronicle of Nargundkar's views of the George W. Bush era from 2001 to 2005.

Publisher Description

Yamaha V-Star 1100

Each Clymer manual provides specific and detailed instructions for performing everything from basic maintenance and troubleshooting to a complete overhaul of the machine. This manual covers the Harley-Davidson XL Sportster built from 2014 to 2017. Do-it-yourselfers will find this service and repair manual more comprehensive than the factory manual, making it an indispensable part of their tool box. Specific models covered include: XL883L SuperLow (2014-2017), XL883N Iron 883 (2014-2017), XL883R Roadster (2014-2015), XL1200C 1200 Custom (2014-2017), XL1200CA Custom Limited A (2014-2016), XL1200CB 1200 Custom Limited B (2014-2017), XL1200CP 1200 Custom (factory custom) (2014-2016), XL1200CX Roadster (2016-2017), XL1200T SuperLow (2014-2017), XL1200V Seventy-Two (2014-2016), and XL1200X Forty-Eight (2014-2017).

Full-Filled

Haynes offers the best coverage for cars, trucks, vans, SUVs and motorcycles on the market today. Each manual contains easy to follow step-by-step instructions linked to hundreds of photographs and illustrations. Included in every manual: troubleshooting section to help identify specific problems; tips that give valuable short cuts to make the job easier and eliminate the need for special tools; notes, cautions and warnings for the home mechanic; color spark plug diagnosis and an easy to use index.

The Four Stroke Dirt Bike Engine Building Handbook

A motorcycle's electrical system can be daunting to even the most adept home mechanic. And yet, the more complex these systems become—and the more important to a motorcycle's function—the more useful, even critical, it will be to know something about them. That's where this book comes in with a user-friendly guide to understanding, diagnosing, and fixing the electrical systems and components that make a bike run . . . or falter. Veteran technician Tracy Martin explains the principles behind motorcycle electrical systems and how they work. He details the various tools, such as multimeters and test lights, that can be used to evaluate and troubleshoot any vehicle's electrical problem. And in several hands-on projects, he takes readers on a guided tour of their vehicle's electrical system, along the way giving clear, step-by-step instructions for diagnosing specific problems.

Polaris Sportsman 400, 450 & 500 1996-2013 Manual

With a Haynes manual, you can do it yourself...from simple maintenance to basic repairs. Haynes writes every book based on a complete teardown of the motorcycle. Handbook of Low Carbon Concrete

This book is intended to help new users learn the basic concepts of SOLIDWORKS and good solid modeling techniques in an easy to follow guide that includes video instruction. It is a great starting point for those new to SOLIDWORKS or as a teaching aid in classroom training to become familiar with the software's interface, basic commands and strategies as users complete a series of models while learning different ways to accomplish a particular task. At the end of this book, you will have a fairly good understanding of the SOLIDWORKS interface and the most commonly used commands for part modeling, assembly and detailing after completing a series of components and their 2D drawings complete with Bill of Materials. The book focuses on the processes to complete the modeling of a part, instead of focusing on individual software commands or operations, which are generally simple enough to learn. The author strived hard to include the commands required in the Certified SOLIDWORKS Associate and Certified SOLIDWORKS Professional Exams as listed on the SOLIDWORKS website. SOLIDWORKS is an easy to use CAD software that includes many time saving tools that will enable new and experienced users to complete design tasks faster than before. Most commands covered in this book have advanced options, which may not be covered in this book. This is meant to be a starting point to help new users to learn the basic and most frequently used commands. Includes Video Instruction Each copy of this book includes access to video instruction. In these videos the author provides a visual presentation of tutorials found in the book. The videos reinforce the steps described in the book by allowing you to watch the exact steps the author uses to complete the exercises.

Time and the Moment in Victorian Literature and Society

Handbook of Low Carbon Concrete brings together the latest breakthroughs in the design, production, and application of low carbon concrete. In this handbook, the editors and contributors have paid extra attention to the emissions generated by coarse aggregates, emissions due to fine aggregates, and emissions due to cement, fly ash, GGBFS, and admixtures. In addition, the book provides expert coverage on emissions due to concrete batching, transport and placement, and emissions generated by typical commercially produced concretes. Includes the tools and methods for reducing the emissions of greenhouse gases Explores technologies, such as carbon capture, storage, and substitute cements Provides essential data that helps determine the unique factors involved in designing large, new green cement plants

Two men, shaped by the demons of their past, find their lives inexplicably intertwined. Nicolas Michaud, the prodigy composer and pianist, grew up apart from the world. A mother who neglected him, and a father who never met him. But when he's suddenly orphaned, Nicolas is taken from his comfortable home and thrown into a life where no one understands him. Consumed by his desire to find the perfect musician for his Magnum Opus, he turns away from human relationships, and it turns him cold. Taking a job at the University in the United States, Nicolas is met with disappointment and regret. Until he meets Cedric Blum, a young chemical engineering student with a secret talent for music like Nicolas has never seen. But Cedric has his own past to overcome. With the help of an old friend, and new relationships, the pair begin their journey toward love, life, and the Magnum Opus. In the end, will Cedric's happy nature thaw Nicolas' icy exterior, or will Nicolas find himself consumed by his fear of love?

The German Aesthetic Tradition

For fathers and their partners, a humorous laugh-out-loud introduction to the

chaotic world of parenting, packaged as a retro car manual. Regardless of the model you have taken delivery of, your baby will have certain standard equipment in common with all babies, and some which vary from model to model. No two Mother Nature Heavy Industries (MNHI) babies are identical. A humorous operating guide for fathers, this book likens a new baby to the other love in a man's life—no, not his wife, his car! This essential handbook covers everything from delivery of baby from Mother Nature Heavy Industries, regular servicing of your baby, standard equipment, the cooling system and liquid waste disposal, warning signs, even optimizing economy, and getting the most out of your baby. This is a must-have book for any father-to-be.

Cycle World

Haynes has discovered all the problems that motorcycle owners could possibly encounter when rebuilding or repairing their bikes. Documenting the most common DIY fixes with hundreds of illustrations and step-by-step instructions, this compendium of repair, modification and troubleshooting advice is applicable to all domestic and import marques.

EX250 (1988-2012)

Beginner's Guide to SOLIDWORKS 2018 - Level I

New series, new team, new missions! VITA AYALA (Morbis, Age Of X-Man), DANNY LORE (Queen Of Bad Dreams) and ERIC GAPSTUR (James Bond 007) present a fresh take on the world's greatest secret agent. When a priceless piece of art is found to be fake, investigations lead down a rabbit hole of international crime and corruption. But what the hell does James Bond know about the world of art forgery? Featuring a cover by superstar JIM CHEUNG (Justice League, Young Avengers), that will be revealed as an interlocking image over the first three issues!

A Philosophy of Textile

A saga of the US Navy from the Barbary War of 1803 through the War of 1812. In 1803, a young man joins the crew of what will become the most famous frigate of the early US Navy - USS Constitution. From the sands of North Africa during the first Barbary War, across the aquamarine waters of the Caribbean, we follow the exploits of a young American seaman, Alain de Noux. At the outbreak of the War of 1812, Captain de Noux takes the ship he personally designed to sea to fight the mightiest navy in the world - Britain's Royal Navy. USS Relentless is the newest, largest, fastest frigate in the world, her hull coated in resin that allows her to fly across the waves, her radically-designed sails and special chute-sail that acts as a spinnaker pulls the big frigate along at nearly eighteen knots. Armed with weapons far in advance of its time - steel cannons with rifled barrels that propel shells farther than any cannon on any ship, along with special binoculars that aid lookouts to see at night, USS Relentless is a most lethal ship. The ship also carries high caliber shells that explode on contact and special carcass rounds filled with

white phosphorous, consuming any ship it strikes in flames. USS Relentless challenges all ships, including the huge British ships-of-the-line, contemporary battleships. Terrorizing the Atlantic for months, Relentless is sent on a more important mission, a mission with no return ticket. She will fly the American flag into combat for the first time across the Indian Ocean, attacking the fat merchant ships of Britain's lucrative East India Company. America does not have the means to invade Britain, but USS Relentless can disrupt her most profitable trade routes. Alain finds success in war and finally meets the woman that will change his world, if only for a short time. In his heart, he knows he will die a young man. It is a race. How many ships can the great raider destroy or capture before the Royal Navy's fleet can destroy her? Along the shoals of the Laccadive Islands, In what the world will call The Battle of the Arabian Sea, USS Relentless must fight an entire fleet in order for Alain to get back to the love of his life.

Kawasaki Vulcan 1600

Hysterical Laughter: Four Ancient Comedies About Women is the first text to uniquely employ comedy as a vehicle to explore women, gender, and sexuality in Greek and Roman antiquity. Featuring new, engaging, and accessible translations by David Christenson of four of the finest classical comedies--Lysistrata (Aristophanes), Samia (Menander), Casina (Plautus), and Hecyra (Terence)--it provides instructors with an attractive and innovative way to explore the social and cultural dimensions of ancient theater and the construction of gender roles in ancient society. The volume is enhanced by an extensive general introduction and includes an introduction, notes, and essays for each comedy, all of which assume no prior background in classical studies. Ideal for courses in classical literature in translation and women in the ancient world, Hysterical Laughter can also be used in a variety of other courses in ancient history, women's studies, cultural studies, and theater.
