Rendezvous with A Habit

The first GSX-R was created in 1985 as a groundbreaking departure from the ponderous sportbikes of the day. That revolutionary motorcycle took a time-honored racing credo to heart: light is right. (And another one: It can never be too fast.) Never before had the performance and design of a race bike been so faithfully carried over to the street. In the seven generations since, Suzuki has remained true to the concept of the original GSX-R: to build the most serious, track-worthy sportbike. What's more, the company's engineers have been relentless in their pursuit to refine and improve the bike.

Rendezvous With A Habit is the first novel by Michael Harte De Hesus, and introduces Mickey Dunn, sports journalist from Chicago who has come to California in mid-life for a lifestyle change. Set on the Central Coast in the Five Cities area, it is a story of erotic love, mystery, suspense, and revenge revolving around the world of crystal meth addiction and the business of crank manufacture and sale. When Mick's girlfriend of a few months, Shana Deckhardt, is sent into coma due to an overdose on speed. Mick is arrested for trafficking and conspiracy to commit murder, though he is innocent. Physically fit, with both combat and competitive amateur wrestling experience, he is recruited by a regional task force to clear his name, avenge the assault on Shana's life, and break up one of the biggest meth rings ever. Along the way, he meets the beautiful ex-crank addict Marlene Magnuson, who proves invaluable to Mick, and the task force. Co-dependency, the search for self-identity, midlife crisis, and serving the Greater Good are all underlying themes as the protagonist seeks revenge and balance in his love life. There is plenty of romance, action, and introspective soul searching as Mickey Dunn is at the center

of a murder conspiracy to eradicate a young woman who has a Rendezvous With A Habit.

Adversity Happens to Everyone and It Is Not an Excuse for Abandoning Our Dreams. Journal

Information is essential to all human activity, and information in electronic form both amplifies and augments human information interactions. This lecture surveys some of the different classical meanings of information, focuses on the ways that electronic technologies are affecting how we think about these senses of information, and introduces an emerging sense of information that has implications for how we work, play, and interact with others. The evolutions of computers and electronic networks and people's uses and adaptations of these tools manifesting a dynamic space called cyberspace. Our traces of activity in cyberspace give rise to a new sense of information as instantaneous identity states that I term profection of self. Profections of self influence how others act toward us. Four classical senses of information are described as context for this new form of information. The four senses selected for inclusion here are the following: thought and memory, communication process, artifact, and energy. Human mental activity and state (thought and memory) have neurological, cognitive, and affective facets. The act of informing (communication process) is considered from the perspective of human intentionality and technical developments that have dramatically amplified human communication capabilities. Information artifacts comprise a common sense of information that gives rise to a variety of information industries. Energy is the most general sense of information and is considered from the point of view of physical, mental,

and social state change. This sense includes information theory as a measurable reduction in uncertainty. This lecture emphasizes how electronic representations have blurred media boundaries and added computational behaviors that yield new forms of information interaction, which, in turn, are stored, aggregated, and mined to create profiles that represent our cyber identities. The A-904 and A-727, debuting in 1960 and 1962, respectively, are 3-speed automatic Chrysler TorqueFlite Transmissions. In Mopar circles, they have become synonymous with strength, durability, and performance. In fact, 43 years after its first application, A-904s were still found in the Jeep lineup! TorqueFlites are known for their dependability, but many have endured a tremendous amount of abuse over 50-plus years when hooked up to V-8 Mopar powerplants. There is little doubt that some of these automatics could be prone to failure, or at least need a thorough rebuild. Tom Hand shares his decades of experience rebuilding TorqueFlite transmissions with chapters dedicated to troubleshooting, disassembly and reassembly, performance modifications, post-installation procedures, and the most thorough source guide offered in print, ever. The author walks you through the TorqueFlite rebuild with color photos showcasing step-by-step procedures with highly detailed, easy-to-follow text. Ten essays discuss federal democracy, the form of government of the United States. The first essay discusses the origins of American federalism. The second examines why we have a federal system, the functions federalism serves, and the consequences of federalism for the American political system. Federalism in the Constitution and constitutional law are treated in the third essay. The importance of cultural pluralism in American life and the role of American federalism in supporting pluralism are the foci of the fourth essay. The roles that the local community, the states, and political parties play in the federal system are examined in essays 5, 6, and 7, respectively. State, local, and professional roles in citizenship education are discussed in the eighth essay. The ninth essay explores how high school U.S. history and government textbooks approach federalism. The concluding essay describes resources on federalism that can be used in curriculum development at the secondary and college levels. Many of the essays are followed by topics for further study and suggested readings for teachers. (RM)
