Caroline And The Raider

The nonfiction debut from the author of the international bestseller *Sacred Games* about the surprising overlap between writing and computer coding Vikram Chandra has been a computer programmer for almost as long as he has been a novelist. In this extraordinary new book, his first work of nonfiction, he searches for the connections between the worlds of art and technology. Coders are obsessed with elegance and style, just as writers are, but do the words mean the same thing to both? Can we ascribe beauty to the craft of writing code? Exploring such varied topics as logic gates and literary modernism, the machismo of tech geeks, the omnipresence of an "Indian Mafia" in Silicon Valley, and the writings of the eleventh-century Kashmiri thinker Abhinavagupta, *Geek Sublime* is both an idiosyncratic history of coding and a fascinating meditation on the writer's art. Part literary essay, part technology story, and part memoir, it is an engrossing, original, and heady book of sweeping ideas.

A young couple poses before a painted backdrop depicting a modern building set in a volcanic landscape; a college student grabs his camera as he heads to a

political demonstration; a man poses stiffly for his identity photograph; amateur photographers look for picturesque images in a rural village; an old woman leafs through a family album. In *Refracted Visions*, Karen Strassler argues that popular photographic practices such as these have played a crucial role in the making of modern national subjects in postcolonial Java. Contending that photographic genres cultivate distinctive ways of seeing and positioning oneself and others within the affective, ideological, and temporal location of Indonesia, she examines genres ranging from state identification photos to pictures documenting family rituals. Oriented to projects of selfhood, memory, and social affiliation, popular photographs recast national iconographies in an intimate register. They convey the longings of Indonesian national modernity: nostalgia for rural idylls and “tradition,” desires for the trappings of modernity and affluence, dreams of historical agency, and hopes for political authenticity. Yet photography also brings people into contact with ideas and images that transcend and at times undermine a strictly national frame. Photography’s primary practitioners in the postcolonial era have been Chinese Indonesians. Acting as cultural brokers who translate global and colonial imageries into national idioms, these members of a transnational minority have helped shape the visual contours of Indonesian belonging even as their own place within the nation remains tenuous. *Refracted Visions* illuminates the ways that everyday photographic practices generate visual habits that in turn give rise to political subjects and communities.

A historical and ethnographic study of the conflict between global transportation and rural development as the two intersect at the Panama Canal. In this innovative book, Ashley Carse traces the water that flows into and out from the Panama Canal to explain how global shipping is entangled with Panama's cultural and physical landscapes. By following container ships as they travel downstream along maritime routes and tracing rivers upstream across the populated watershed that feeds the canal, he explores the politics of environmental management around a waterway that links faraway ports and markets to nearby farms, forests, cities, and rural communities. Carse draws on a wide range of ethnographic and archival material to show the social and ecological implications of transportation across Panama. The Canal moves ships over an aquatic staircase of locks that demand an enormous amount of fresh water from the surrounding region. Each passing ship drains 52 million gallons out to sea—a volume comparable to the daily water use of half a million Panamanians. Infrastructures like the Panama Canal, Carse argues, do not simply conquer nature; they rework ecologies in ways that serve specific political and economic priorities. Interweaving histories that range from the depopulation of the U.S. Canal Zone a century ago to road construction conflicts and water hyacinth invasions in canal waters, the book illuminates the human and nonhuman actors that have come together at the margins of the famous trade route. 2014 marks the 100th anniversary of the Panama Canal. Beyond the Big

Ditch calls us to consider how infrastructures are materially embedded in place, producing environments with winners and losers.

As a longtime golfer, Jeff Foxworthy has learned something important about the grand auld game: It's not who has the highest score, it's who has the least fun playing it. And now, in his hilarious primer *How to Really Stink at Golf*, Foxworthy shares his invaluable tips for a lifetime of horrible drives and putts. • Get into the right frame of mind to play truly awful golf. Food poisoning or a killer hangover might be just the ticket to a robust three-digit score. • Try to get to the course promptly at tee time to avoid the hassle of warming up: "You're only gonna hit five good shots in the course of the day; why waste even one on the driving range?" • The surefire way to screw up a great drive? As you walk to the tee, keep telling yourself, "Don't screw up your drive." If bad golf's your goal, stress is your best friend. • Avoid fun. "Fun = relaxed = low scores . . . and that's something we want to avoid at all cost. If you have a good hole, shake it off." • Perhaps the most important element: Embrace the fact that you do stink at golf. Cheating. Cursing. Avoiding fairways. Reckless cart driving. *How to Really Stink at Golf* covers it all, from selecting the correct putter to use on a 385-yard drive to prolonging your stay in the sand trap to picking the perfect foursome for spectacularly bad golf ("you, your ex-wife, your girlfriend, your wife"). With Jeff Foxworthy as your guide, even a

scratch golfer can add ten, twenty, maybe thirty strokes to his or her score—and possibly more if you attempt to play the back nine, too. From the Hardcover edition.

The fourteen authors in this collection used phenomenology (the study of consciousness) and hermeneutics (the interpretation of meaning) to conduct deep inquiry into perplexing and wondrous events in their work and personal lives. These seasoned scholar-practitioners gained remarkable insight into areas such as health care and illness, organ donation, intercultural communications, high-performance teams, artistic production, jazz improvisation, and the integration of Tai Chi into education. All authors were transformed by phenomenology's expanded ways of seeing and being.

Emerging Infectious Diseases and Society

Despite her unconventional upbringing -- she'd been adopted off the orphan train by the local "madam" -- Emma Chalmers was the most prim and proper young lady in all of Whitneyville. Why, she wouldn't even permit Fulton Whitney to kiss her, and they were practically engaged! But when Steven Fairfax landed in her home, wounded in an explosion at the town's raunchiest saloon, his lazy smile made Emma's blood race. Slowly, Steven stilled her fears with his gentle, insistent caresses until at last she gave herself unashamedly to the splendid passion that was their destiny. Yet now Emma faced a new terror -- for the drifter she loved so

desperately was a wanted man, and his past was about to catch up with him!

In the 1970s it seemed infectious diseases had been conquered, but today global epidemics seem to pose a new, more sinister, threat. This fascinating study explores these new infectious diseases, such as Swine Flu, SARS and AIDS, and the re-emergence of old threats, and discusses their role in society.

Is sustainable development a workable solution for today's environmental problems? Is it scientifically defensible? Best known for applying ecological theory to the engineering problems of everyday life, the late scholar James J. Kay was a

leader in the study of social and ecological complexity and the thermodynamics of ecosystems. Drawing from his immensely important work, as well as the research of his students and colleagues, *The Ecosystem Approach* is a guide to the aspects of complex systems theories relevant to social-ecological management. Advancing a methodology that is rooted in good theory and practice, this book features case studies conducted in the Arctic and Africa, in Canada and Kathmandu, and in the Peruvian Amazon, Chesapeake Bay, and Chennai, India. Applying a systems approach to concrete environmental issues, this volume is geared toward scientists, engineers, and sustainable development scholars and practitioners who are attuned to the ideas of the Resilience Alliance—an international group of scientists who take a more holistic view of ecology and environmental problem-solving. Chapters cover the origins and rebirth of the ecosystem approach in ecology; the bridging of science and values; the challenge of governance in complex systems; systemic and participatory approaches to management; and the place for cultural diversity in the quest for global sustainability.

The Wild West: 365 Days is a day-by-day adventure that tells the stories of pioneers and cowboys, gold rushes and saloon shoot-outs in America's frontier. The lure of land rich in minerals, fertile for farming, and plentiful with buffalo bred an all-out obsession with heading westward. The Wild West: 365 Days takes the reader back to these booming frontier towns that became the stuff of American legend, breeding characters such as Butch Cassidy and Jesse James. Author Michael Wallis spins a colorful narrative, separating myth from fact, in 365 vignettes. The reader will learn the stories of Davy Crockett, Wild Bill Hickok, and Annie Oakley; travel to the O.K. Corral and Dodge City; ride with the Pony Express; and witness the invention of the Colt revolver. The images are drawn from Robert G. McCubbin's extensive collection of Western memorabilia, encompassing rare books, photographs, ephemera, and artifacts, including Billy the Kid's knife.

Give Peace a Chance

The increasingly popular idea that cinematic fictions can 'do' philosophy raises some difficult questions. Who is actually doing the philosophizing? Is it the philosophical commentator who reads general arguments or theories into the stories conveyed by a film? Could it be the film-maker, or a group of collaborating

film-makers, who raise and try to answer philosophical questions with a film? Is there something about the experience of films that is especially suited to the stimulation of worthwhile philosophical reflections? In the first part of this book, Paisley Livingston surveys positions and arguments surrounding the cinema's philosophical value. He raises criticisms of bold theses in this area and defends a moderate view of film's possible contributions to philosophy. In the second part of the book he defends an intentionalist approach that focuses on the film-makers' philosophical background assumptions, sources, and aims. Livingston outlines intentionalist interpretative principles as well as an account of authorship in cinema. The third part of the book exemplifies this intentionalist approach with reference to the work of Ingmar Bergman. Livingston explores the connection between Bergman's work and the Swedish director's primary philosophical source—a treatise in philosophical psychology authored by the Finnish philosopher, Eino Kaila. Bergman proclaimed that reading this book was a tremendous philosophical experience for him and that he 'built on this ground'. With reference to materials in the newly created Ingmar Bergman archive, Livingston shows how Bergman took up Kaila's topics in his cinematic explorations of motivated irrationality, inauthenticity, and the problem of self-knowledge.

T. S. Eliot and Virginia Woolf were almost exact contemporaries, readers and critics of each others' work, and friends for over twenty years. Their writings, though, are rarely paired. *Modernism, Memory, and Desire* proposes that some striking correspondences exist in Eliot and Woolf's poetic, fictional, critical, and autobiographical texts, particularly in their recurring turn to the language of desire, sensuality, and the body to render memory's processes. The book includes extensive archival research on some mostly unknown bawdy poetry by T. S. Eliot while offering readings of major work by both writers, including *The Waste Land*, 'The Love Song of J. Alfred Prufrock', *Orlando* and *To the Lighthouse*. McIntire juxtaposes Eliot and Woolf with several major modernist thinkers of memory, including Sigmund Freud, Friedrich Nietzsche, Henri Bergson and Walter Benjamin, to offer compelling reconsiderations of the relation between textuality, remembrance and the body in modernist literature.

Stealing the Corner Office is mandatory reading for smart, hardworking managers who always wonder why their seemingly incompetent superiors are so successful. It is a unique collection of controversial but highly effective tactics for middle managers and aspiring executives who want to learn the real secrets for moving

up the corporate ladder. Unlike virtually all other business books—which are based on the assumption that corporations are logical and fair—*Stealing the Corner Office* explores the unconventional tactics people less competent than you use to get ahead and stay ahead. It is your proven playbook to thrive and win in an imperfect corporate world. *Stealing the Corner Office* will teach you: How incompetent people so often get ahead, and what you can learn from them. How to make universally flawed corporate policies work in your favor. Why showing too much passion for your ideas can be career suicide. Why delivering results should never be your highest priority. These and many more controversial tactics will change the way you look at your career and how you manage projects, people, and priorities. Apply the 10 principles in *Stealing the Corner Office* and watch your career take off!

Next Generation Mobile Broadcasting

Next Generation Mobile Broadcasting provides an overview of the past, present, and future of mobile multimedia broadcasting. The first part of the book—Mobile Broadcasting Worldwide—summarizes next-generation mobile broadcasting technologies currently available. This part covers the evolutions of the Japanese mobile broadcasting standard ISDB-T One-Seg, ISDB-Tmm and ISDB-TSB; the evolution of the South Korean T-DMB mobile broadcasting technology AT-DMB; the American mobile broadcasting standard ATSC-M/H; the Chinese broadcasting technologies DTMB and CMMB; second-generation digital terrestrial TV European standard DVB-T2 and its mobile profile T2-Lite; and the multicast/broadcast extension of 4G LTE cellular standard E-MBMS. This part includes a chapter about a common broadcast specification of state-of-the-art 3GPP and DVB standards to provide a broadcast overlay optimized for mobile and operated in conjunction with a broadband unicast access. It also contains an overview chapter on a new High-Efficiency Video Coding (HEVC) standard that is expected to provide significantly improved coding efficiency compared to current MPEG-4 AVC video coding. The second part of the book—Next-Generation Handheld DVB Technology: DVB-NGH—describes the latest mobile broadcast technology known as Digital Video Broadcasting-Next-Generation Handheld (DVB-NGH), which is expected to significantly outperform all existing technologies in both capacity and coverage. DVB-NGH introduces new technological solutions that along with the high

performance of DVB-T2 make DVB-NGH a powerful next-generation mobile multimedia broadcasting technology. In fact, DVB-NGH can be regarded as the first 3G broadcasting system because it allows for the possibility of using multiple input multiple output MIMO antenna schemes to overcome the Shannon limit of single antenna wireless communications. DVB-NGH also allows the deployment of an optional satellite component forming a hybrid terrestrial-satellite network topology to improve coverage in rural areas where the installation of terrestrial networks is economically unfeasible. Although the commercial deployment of DVB-NGH is nowadays unclear after its standardization, it will be a reference point for future generations of digital terrestrial television technologies. Edited by a member of the DVB-NGH standardization group, the book includes contributions from a number of standardization groups worldwide—including Digital Video Broadcasting (DVB) in Europe; Advanced Television Systems Committee (ATSC) in the US, Korea, Japan, and China; Third Generation Partnership Project (3GPP); and the Moving Picture Experts Group (MPEG).

The Ghosts of Cannae

The first novel by the author of *Maps for Lost Lovers*: a powerful and exquisitely written story set in a small town in Pakistan after the murder of a corrupt and prominent local judge. When a sack of letters that were thought to have disappeared in a train crash nineteen years earlier reappears under mysterious circumstances, the inhabitants of a secluded Pakistani village wait anxiously to see what secrets may come to light. Could the letters hold any information about Judge Anwar's murder? As Aslam traces the murder investigation over the next eleven days, he explores the impact that these two events have on a variety of people in the town--from the surviving family of the judge to a journalist reporting on the delivery of the mail packet. With great attention to detail and beautiful scenes that explore the daily rhythms of life in Pakistan, Aslam creates an exotic and timeless world whose traditional rituals are played out against an ominous backdrop of faraway civil wars, assassinations, changing regimes, and religious tensions. From the Trade Paperback edition.

Only the Longest Threads

This innovative textbook leads students on a carefully guided discovery of introductory number theory. The book has two equally significant goals. The first is

to help students develop mathematical thinking skills, particularly theorem-proving skills. The other goal is to help students understand some of the wonderfully rich ideas in the mathematical study of numbers. This book is appropriate for a proof transitions course, for independent study, or for a course designed as an introduction to abstract mathematics. It is designed to be used with an instructional technique variously called guided discovery or Modified Moore Method or Inquiry Based Learning (IBL). Instructors' materials explain the instructional method, which gives students a totally different experience compared to a standard lecture course. Students develop an attitude of personal reliance and a sense that they can think effectively about difficult problems; goals that are fundamental to the educational enterprise within and beyond mathematics.

Since its initial publication this critique of Freud's methods for gathering and evaluating evidence has become a classic in Freud scholarship. foreword by Frederick Crews Psychoanalysis: science or belief system? Since its initial publication this critique of Freud's methods for gathering and evaluating evidence has become a classic in Freud scholarship. Malcolm Macmillan's exhaustive analysis of Freud's personality theory describes the logical and other assumptions on which Freud's work was based and shows how these assumptions interacted with his clinical observations to produce all-embracing but faulty methods for

gathering and evaluating evidence. Macmillan provides a meticulous account of the historical evolution of Freud's thought and its background in Freud's contacts with the books and people that influenced him and evaluates the entirety of the Freudian system. Included is a compilation of major criticisms of the methodology and assumptions of Freudian theory and a new comprehensive afterword by the author surveying the relevant literature published since 1989. Framing Piracy examines film distribution—legal and illegal—in the largest, mostly untapped market in the world: Greater China. Tracing networks of optical disc (VCD, DVD) and online piracy, this book tackles issues of politics, globalization, and technology. It features a wealth of original research, new distribution data, and interviews with film distributors, government officials, and film pirates. With changes afoot in China upon its entering the World Trade Organization, this timely book shows that such transformations have far-reaching implications for policy, theory, and practice.

Back by popular demand: The first novel in the romantic Orphan Train trilogy, *Lily and the Major*—the beloved historical classic about a woman who must choose between her family and her one true love, by #1 New York Times bestselling author Linda Lael Miller. In his arms, she discovered how tender—and how bold—true passion could be... Lily Chalmers wanted only two things from life—a farm of her own, and to find the sisters she hadn't seen since they were all little girls heading West on the orphan train. She certainly had no desire for a husband. Yet proud, innocent Lily had no idea what desire meant until she met Major Caleb Halliday, a man who could ignite her very being with a single touch...a glance...a whisper. Sheltered in his arms, Lily rode the crest of a wild, helpless passion. And though she struggled against her own willful heart, she knew she could never choose between the dazzling man who had claimed her love so completely, and her bold, long-cherished dream...

Framing Piracy

The fascist Ustasha regime and its militias carried out a ruthless campaign of ethnic cleansing that killed an estimated half million Serbs, Jews, and Gypsies, and ended only with the defeat of the Axis powers in World War II. Rory Yeomans analyzes the Ustasha movement's use of culture to appeal to radical nationalist sentiments and legitimize its genocidal policies. He shows how the movement attempted to mobilize poets, novelists, filmmakers, visual artists, and intellectuals as purveyors of propaganda and visionaries of a utopian society. Yeomans chronicles the foundations of the movement, its key actors and ideologies, and reveals the unique conditions present in interwar Croatia that led to the rise of fascism.

"Part fiction, part overview of 'Aha!' moments in the forward march of physics, Only the Longest Threads takes readers dramatically through scientific fields such as quantum field theory, electromagnetism, relativity, quantum mechanics, and string theory. Each idea or concept is explored in an inventive chapter, each told from a different first-person narrator; the faux emails, letters, and diary entries take place from 1728 to the present day."—Boing Boing, "The Best Books for Nerds from 2014" "Science is done by real human beings, with human concerns. Only the Longest Threads tells a story that conveys the human side of science in a way that is as moving as it is accurate."—Sean Carroll, theoretical physicist at Caltech and author of *The Particle at the End of the Universe* Only the Longest Threads will thrill readers with its dramatic and lucid accounts of the great breakthroughs in the history of physics—classical mechanics, electromagnetism, relativity, quantum mechanics, quantum field theory, and string theory, each from the viewpoint of a (fictional) witness to the events. Tasneem Zehra Husain re-imagines the pivotal moments in the history of physics when radical new theories shifted our perception of the universe, and our place in it. Husain immerses the reader in the immediacy and excitement of the discoveries—and she guides us as we begin to understand the underlying science and to grasp the revolutionary step forward each of these milestones represents. "Tasneem Zehra Husain writes lyrically, poetically about life, love, and physics. I highly recommend this wonderful book for anyone

interested in what physics, and indeed all of science, is about. She masterfully describes the most momentous moments in physics history with verve and talent."—Amir D. Aczel, bestselling author of Fermat's Last Theorem "A delightful meditation on the development of modern physics, culminating in the discovery of the Higgs. Husain follows the thread of its creation through a dialog between a journalist and young theory student, and as seen through the eyes of witnesses."—John Huth, Donner Professor of Science, Harvard University "Well-written and cleverly constructed, this book takes us on a journey through the history of physics as a series of fictional adventures, loosely linked by another fiction, the storytellers' emails to each other. Some books are praised because 'I couldn't put it down,' but this one merits a deeper reading, one that stops, muses on, and savors each story before going on to the next. Each one captures not only the emergence of a significant idea in physics, but also something of the characters, culture, and times surrounding that development. So take your time, pause to ponder, but persevere, you will be well rewarded!"—Helen R. Quinn, Physicist, Science Educator, and co-author of The Mystery of the Missing Antimatter, Professor Emeritus SLAC National Accelerator Laboratory "How do theoretical physicists think? Tasneem Zehra Husain knows. She knows their purpose, feels their passions, articulates their frustrations, shares their triumphs. Through the device of fiction Only the Longest Threads communicates the history of physical thought—its roots in inquisitiveness and essential disinterest in outcome—with greater clarity than any popular science text."—Michael Duff FRS,

Nonprofit managers have been slow to embrace the digital age. Although technology has transformed the face of the for-profit sector and how it operates, nonprofit use of technology to improve internal functioning and to change the way services are delivered is almost nonexistent. These limitations actually have opened the door for for-profits to "compete" successfully for traditional nonprofit business, such as moving people from welfare to work. ManagingNonprofits.org is both a call to action and a roadmap for change. Each chapter defines an element of Dynamic Management and identifies "digital hotspots" or places within that element, and the nonprofit's implementation of that element, where digital issues will most likely arise and need to be addressed. In addition, at the end of each chapter, Maxims of Dynamic Management or core truths that the authors have found helpful to follow in their day-to-day experience as nonprofit leaders in bringing Dynamic Management to their organization are provided. Finally, the authors highlight the experience of various nonprofit and for-profit organizations that have successfully made elements of Dynamic Management a reality in their

organizations.

Topologies of the Flesh

Ethical concerns are among the most common problems public administrators face, yet the issues are often complex, and the correct choices are not always clear. Living up to the public trust is much more than just an act of compliance. It also involves perceiving, preventing, avoiding, and resolving accusations of illegal or unethical behavior, including appearances of inappropriate behavior. *Ethics Moments in Government: Cases and Controversies* examines how to identify, assess, and resolve the ethical issues and dilemmas that often confront those who govern the cities, counties, states, and federal agencies throughout America. *Real Situations, Real Advice* Providing a one-stop resource for all those who must contend with thorny ethical issues, this volume presents case studies that vary in complexity and context and are based on real situations. Each case scenario is followed by discussion questions and case assessments by expert practitioners who describe how they would handle the situation. Using a "total immersion" technique, the book encourages readers to be reflexive and analytical in addressing the problems presented and arriving at appropriate solutions. A supplemental CD is included which contains PowerPoint® slide presentations, articles, workshop programs, tests, and links to organizations. For many of the scenarios presented in this volume, there are no easy answers. Practical guidance

on reasoning through difficult decision-making situations enables public administrators to acquire the ethical knowledge, skills, abilities, and instincts that will ultimately help them gain the trust of their citizens and advance in their careers.

Spellbound at School #11

Holding her lovely head high, Wyoming schoolmistress Caroline Chalmers did what no lady should: she marched right into the local saloon to see the dashing and reckless Guthrie Hayes. Worse still, she went to ask him for help. She needed the former Confederate raider to plan a jailbreak to rescue her fiancé, Seaton Flynn, from the hangman's noose. An orphan by spinster sisters, Caroline was prepared do almost anything to save her beloved Seaton. So why did her breath suddenly become a shivery sigh when she looked into Hayes's twinkling green eyes? Too late Caroline knew how perilous her request really was, for this strong and daring ex-soldier would refuse her nothing no matter how dangerousbut first he intended to teach her everthing about the power of a man's love, beginning with a shameless odyssey to ectasy in his arms.
