Learn how to program games for the NES! You'll learn how to draw text, scroll the screen, animate sprites, create a status bar, decompress title screens, play background music and sound effects and more. While using the book, take advantage of our Web-based IDE to see your code run instantly in the browser. We'll also talk about different "mappers" which add extra ROM and additional features to cartridges. Most of the examples use the CC65 C compiler using the NESLib library. We'll also write 6502 assembly language, programming the PPU and APU directly, and carefully timing our code to produce advanced psuedo-3D raster effects. Create your own graphics and sound, and share your games with friends!

Experience one of the first novels from New York Times bestselling author Ted Dekker. “[Heaven’s Wager is] genuinely exciting . . . fast paced . . . spine-tingling . . .” —Publishers Weekly A thriller unlike any you have ever read. A love strong enough to bring a tremor to your bones. A sacrifice powerful enough to make heaven weep. At the close of World War II, a shell-shocked soldier, Jan Jovic, was forced to inflict a game of life and death on a peaceful Bosnian community. In a few short hours, this young man was confronted by more love—and hate—than most experience in a lifetime. Years later, Jan has become a world-renown writer with widespread influence in the United States, his past buried deep in his memory. Until the most inopportune time, the game Jan witnessed comes back to haunt him . . . and unwittingly leads him to a beautiful but broken woman caught in an underworld of crime. He must now defeat an evil rarely seen. But there is a price. One that even this war-scarred soldier can't imagine. “Well, well, guess what I’ve found. A fiction writer with a rare knack for a compelling story, an expansive reservoir of clever ideas, and a unique dry wit that makes me laugh.” —Frank Peretti, New York Times bestselling author “Rarely does a novel grip a reader’s heart and soul the way Heaven’s Wager does. Dekker is among a very small number of writers who have mastered the challenge of blending sound theology

with knock-your-socks-off storytelling.” —Robert Liparulo, novelist and contributing editor of *New Man* magazine

For decades the crown jewels of Japan's postwar manufacturing industry, motorcycles remain one of Japan's top exports. *Japan's Motorcycle Wars* assesses the historical development and societal impact of the motorcycle industry, from the influence of motor sports on vehicle sales in the early 1900s to the postwar developments that led to the massive wave of motorization sweeping the Asia-Pacific region today. Jeffrey Alexander brings a wealth of information to light, providing English translations of transcripts, industry publications, and company histories that have until now been available only in Japanese. By exploring the industry as a whole, he reveals that Japan's motorcycle industry was characterized not by communitarian success but by misplaced loyalties, technical disasters, and brutal competition.

The urge has found you daydreaming more than once. The urge to define, bend, shape, fabricate, invent, shove, break. To slide your leg over the seat you finally got back from the leather shop. To twist back the throttle grip you wrapped

yourself. To lunge into the darkness of an open highway on a creation all your own. More than a motorcycle, this is about your identity. It's about building something as unique as you are. In *The Build*, Robert Hoekman Jr compiles insights from today's best builders to help you plot out your own beautiful beast. Loaded with photos, *The Build* features firsthand advice from the masters of moto design, including John Ryland (Classified Moto), Alan Stulberg (Revival Cycles), Jared Johnson (Holiday Customs), Jarrod DelPrado (DP Customs), and the legendary Max Hazan (Hazan Motorworks). You've seen what can be done. It's time to do it yourself. Get *The Build*.

Adversity Happens to Everyone and It Is Not an Excuse for Abandoning Our Dreams. Journal

Popular motorcycle journalist and author Mark Zimmerman brings a comfortable, conversational tone to his easy-to-understand explanations of how motorcycles work and how to maintain them and fix them when they don't. This practical tutorial covers all brands and styles of bikes, making it a perfect companion to the owner's service manual whether you need to use the step-by-step instructions for basic maintenance techniques to wrench on your bike yourself or just want to learn enough to become an informed customer at your local motorcycle service department. This book includes more than 500 color photos and a thorough index to make it an especially user-friendly reference for home motorcycle mechanics of all skill levels.

The Build

This is one of a series of manuals for car or motorcycle owners. Each book provides information on routine maintenance and servicing, with tasks described and photographed in a step-by-step sequence so that even a novice can do the work.

Suspension is probably the most misunderstood aspect of motorcycle performance. This book, by America's premier suspension specialist, makes the art and science of suspension tuning accessible to professional and backyard motorcycle mechanics alike. Based on Paul Thede's wildly popular Race Tech Suspension Seminars, this step-by-step guide shows anyone how to make their bike, or their kid's, handle like a pro's. Thede gives a clear account of the three forces of suspension that you must understand to make accurate assessments of your suspension's condition. He outlines testing procedures that will help you gauge how well you're improving your suspension, along with your riding. And, if you're inclined to perfect your bike's handling, he even explains the black art of chassis geometry. Finally, step-by-step photos of suspension disassembly and assembly help you rebuild your forks and shocks for optimum performance. The book even provides detailed troubleshooting guides for dirt, street, and supermoto--promising a solution to virtually any handling problem.

"This author delivers pure, undiluted excitement." —Jayne Ann Krentz "Romantic suspense is her true forte." —Minneapolis Star-Tribune "Elizabeth Lowell's keen ear for dialogue and intuitive characterizations consistently place her a cut above most writers in this genre." —Charlotte News & Observer Perennial New York Times bestselling author Elizabeth Lowell boldly puts the romance back into romantic suspense with *Beautiful Sacrifice*—a story of passion and intrigue centered around the ancient Mayan prediction of the apocalyptic end of everything. Lowell's thrillingly imaginative tale unites a dedicated female archaeologist with a former Immigration and Customs Enforcement Officer on a mission to recover priceless South American artifacts that could bring deadly chaos into our world. *Beautiful Sacrifice* is action, suspense, and love on a bestselling par with Lisa Gardner, Linda Howard, Jayne Ann Krentz, and Nora Roberts...and exactly the sort of romantic adventure that inspired Johanna Lindsey to declare, "Lowell is great!"

Aspen Plus is one of the most popular process simulation software programs used industrially and academically. Though the software is available at many corporations and universities, there are no textbooks which are dedicated to teaching the step-by-step use of the software. This book is designed to fill that need. The structure of the book is unique in that it emulates a lecture /workshop classroom environment. Each chapter starts with the equivalent of a classroom lecture followed by workshops which provide experience in the chapter's subject matter. The enclosed CD contains solutions, both in Aspen Plus and text formats, to examples imbedded in the text as well as to all the workshops. There are also notes at the end of each chapter designed to aid readers that have difficulty with the workshops. Note: CD-ROM/DVD and other supplementary materials are not included as part of eBook file.
