Show biz memoir at its name-dropping, bridge-burning, profane best: the music industry's most outspoken, outrageous, and phenomenally successful executive delivers a rollicking memoir of pop music's heyday. During the 1970s and '80s the music business was dominated by a few major labels and artists such as Michael Jackson, Bruce Springsteen, the Rolling Stones, Bob Dylan, Billy Joel, Paul Simon, Barbra Streisand and James Taylor. They were all under contract to CBS Records, making it the most successful label of the era. And, as the company's president, Walter Yetnikoff was the ruling monarch. He was also the most flamboyant, volatile and controversial personality to emerge from an industry and era defined by sex, drugs and debauchery. Having risen from working-class Brooklyn and the legal department of CBS, Yetnikoff, who freely admitted to being tone deaf, was an unlikely label head. But he had an uncanny knack for fostering talent and intimidating

rivals with his appalling behavior—usually fueled by an explosive combination of cocaine and alcohol. His tantrums, appetite for mind-altering substances and sexual exploits were legendary. In Japan to meet the Sony executives who acquired CBS during his tenure, Walter was assigned a minder who confined him to a hotel room. True to form, Walter raided the minibar, got blasted and, seeing no other means of escape, opened a hotel window and vented his rage by literally howling at the moon. In *Howling at the Moon*, Yetnikoff traces his journey as he climbed the corporate mountain, danced on its summit and crashed and burned. We see how Walter became the father-confessor to Michael Jackson as the King of Pop reconstructed his face and agonized over his image while constructing *Thriller* (and how, after it won seven Grammys, Jackson made the preposterous demand that Walter take producer Quincy Jones's name off the album); we see Walter, in maniacal pursuit of a contract, chase the Rolling Stones around the world and nearly come to blows with Mick Jagger in the process; we get the tale of how Walter and Marvin Gaye—fresh from the success of “Sexual Healing”—share the same woman, and of how Walter bonds with Bob Dylan because of their mutual Jewishness. At the same time we witness Yetnikoff's clashes with Barry Diller, David Geffen, Tommy Mottola, Allen Grubman and a host of others. Seemingly, the more Yetnikoff feeds his cravings for power, sex, liquor and cocaine, the more profitable CBS becomes—from \$485 million to well over \$2 billion—until he finally succumbs, ironically, not to substances, but to a corporate coup. Reflecting on the sinister cycle that left his career in tatters and CBS flush with cash, Yetnikoff emerges with a hunger for redemption and a new reverence for his working-class Brooklyn roots. Ruthlessly candid, uproariously hilarious and compulsively readable, *Howling at the Moon* is a blistering *You'll Never Eat Lunch in this Town Again* of the music industry.

## **Lemon-Aid New Cars and Trucks 2013**

As Toyota skids into an ocean of problems and uncertainty continues in the U.S. automotive industry, *Lemon-Aid Used Cars and Trucks 2011/2012* shows buyers how to pick the cheapest and most reliable vehicles from the past 30 years. *Lemon-Aid* guides are unlike any other car and truck books on the market. Phil Edmonston, Canada's automotive Dr. Phil for 40 years, pulls no punches. Like five books in one, *Lemon-Aid Used Cars and Trucks* is an exposé of car scams and gas consumption lies; a do-it-yourself service manual; an independent guide that covers beaters, lemons, and collectibles; an archive of secret service bulletins granting free repairs; and a legal primer that even lawyers can't beat! Phil delivers the goods on free fixes for Chrysler, Ford, and GM engine, transmission, brake, and paint defects; lets you know about Corvette and Mustang tops that fly off; gives the lowdown on Honda, Hyundai, and Toyota engines and transmissions; and provides the latest information on computer module glitches.

This manual represents the provincial standard for assessing fish populations and communities in medium to large non-wadable rivers in Ontario. The Riverine Index Netting (RIN) nets and the manual have been developed to efficiently catch small, large, and extra-large fishes in rivers. The nets can be used singly or in combination to gather fish community information. This instruction manual assumes that the user has sound knowledge and field experience in netting and sampling fishes. It is subdivided into sections on: gear description, pre-field activities, field procedures, post field activities,

and data management. A hypothetical case study is given to illustrate how the Riverine Index Netting method can be employed at a hydro power development. Appendices are also provided on bathymetry mapping, aging structures, contaminant analysis, field forms, equipment list, and fish species codes.--Document.

## **Shaking Off the Dust**

In 1888, Samuel F. Cody, a twenty-one-year-old horse wrangler, met Maud Lee, a sixteen-year-old aspiring circus performer, while touring with the Wild West show cast of Adam Forepaugh's Circus. A quick rapport developed between the girl from Norristown, Pennsylvania, and the cowboy who dazzled audiences with his good looks and fancy pistol shooting. *A Pair of Shootists* is the exuberant and sometimes heartbreaking story of the elusive S. F. Cody and his first wife, Maud Lee. Recounting their many dramatic exploits, this biography also overturns the frequently romanticized view of Wild West shows. Living the erratic lives of touring performers, S. F. Cody — who changed his name to capitalize on his resemblance to William F. "Buffalo Bill" Cody — and Maud Lee first appeared together in vaudeville halls and dime museums. Setbacks in the United States made Cody and Lee eager to try their luck abroad, so they traveled to Great Britain, where they played music halls and acted in burlesques on roller-skates and in extravagant arena exhibitions. When the two performers eventually parted ways, author Jerry Kuntz masterfully splits their stories into two. From there, he follows their individual ups and downs, including Cody's soaring career in pioneer aeronautics and Lee's decline into mental illness and addiction. In an ironic twist, Maud's professional life ended amidst a vast misunderstanding that brought her into conflict with the woman she had been emulating her entire career: Annie Oakley. While other biographies focus mainly on Cody's contribution to aviation, Kuntz uses sources previously unavailable to scholars to paint a more complete picture of Cody's early years and to recover the forgotten — and ultimately tragic — story of Maud Lee.

"In recent years the debate on multiculturalism in the UK and other Western societies has focused principally on Islam, and the specific 'problems' said to be posed by Muslims have been invoked to justify the claim that multiculturalism has failed. That claim is opened to scrutiny and challenged in this unique collection through a series of explorations of specific issues and controversies - including the question of the veil, crime, political Islam, the role of Muslim women, sexuality and the Danish cartoons affair - and through more general reflections on the nature of multiculturalism. By exploring the nature of cultural differences and sensitivities and examining the way conflicts have played out, this challenging book makes a wide-ranging contribution to debate and a more constructive inter-cultural engagement. The contributors draw upon the disciplines of social science, ethics, theology, philosophy and education to examine the nature of the issues and flashpoints

and to draw out implications for theory, policy and practice." --from back cover.

This book has been developed from its earlier and far less formal presentment as the proceedings of a symposium entitled The Biochemistry of S-Adenosylmethionine as a Basis for Drug Design that was held at the Solstrand Fjord Hotel in Bergen, Norway on June 30-July 4, 1985. The purpose of the symposium was to bring together scientists from various disciplines (biochemistry, pharmacology, virology, immunology, chemistry, medicine, and so on) to discuss the recent advances that have been made in our understanding of the biological roles of S adenosylmethionine (AdoMet) and to discuss the feasibility of utilizing AdoMet-dependent enzymes as targets for drug design. Thus the information provided herein will be of value not only to basic scientists involved in elucidating the role of AdoMet in biology, but also to medicinal chemists who are using this basic knowledge in the process of drug design. The volume should also be of interest to pharmacologists and clinicians involved in biological evaluation of potential therapeutic agents arising from the efforts of the biochemists and medicinal chemists. Each plenary speaker at the symposium was requested to submit a chapter reviewing recent contributions of their discipline to our base of knowledge about the biological role of AdoMet. Topics covered in this volume include protein and phospholipid methylations (Section A), nucleic acid methyl ations (Section B), the regulation of AdoMet, S-adenosylhomocysteine, and methylthioadenosine metabolism (Section C), clinical aspects of AdoMet (Section D), and the design, synthesis, and biological evaluation of trans methylation inhibitors (Section E).

Electrical issues in European cars can be intimidating. The Hack Mechanic Guide to European Automotive Electrical Systems shows you how to think about electricity in your car and then take on real-world electrical problems. The principles discussed can be applied to most conventional internal-combustion-engined vehicles, with a focus on European cars spanning the past six decades. Drawing on The Hack Mechanic's wisdom and experience, the 38 chapters cover key electrical topics such as battery, starter, alternator, ignition, circuits, and relays. Through a practical and informal approach featuring hundreds of full-color illustrations, author Rob Siegel takes the fear-factor out of projects like making wire repairs, measuring voltage drops, or figuring out if you have a bad fuel pump relay. Essential tools such as multimeters (DVOM), oscilloscopes, and scan tools are discussed, with special attention given to the automotive multimeter needed to troubleshoot many modern sensors. You'll get step-by-step troubleshooting procedures ranging from safely jump starting a battery to diagnosing parasitic current drain and vehicle energy diagnosis. And you'll find detailed testing procedures for most problematic electrical components on your European car such as oxygen sensors, crankshaft and camshaft sensors, wheel speed sensors, fuel pumps, solenoids, and actuators. Reading wiring diagrams and decoding the German DIN standard are also covered. Whether you are a DIY mechanic or a professional technician, The Hack Mechanic Guide to European Automotive Electrical Systems will increase your confidence in tackling automotive electrical problem-solving. This book applies to gasoline and diesel powered internal combustion engine vehicles. Not intended for hybrid or electric vehicles.

Rantoul and the former Chanute Air Force Base are inseparably intertwined as primary players in a single historical narrative. Rantoul was first founded as an agriculturally based community in 1848 near an area known as Mink Grove. The settlement boomed with the coming of the Illinois Central Railroad in 1854; a railroad championed by the town's namesake, Robert Rantoul Jr. Disaster followed in 1899 and again in 1901 with devastating fires. Then, in 1917, a U.S. Army flying field was built on the outskirts of Rantoul. Named after the aviation pioneer Octave Chanute, Chanute Field, later Chanute Air Force Base, became a premier technical training facility. A mutually beneficial relationship quickly developed between these civilian and military establishments that would last for over 75 years. Chanute Air Force Base closed in 1993, ushering in yet another new era for the village of Rantoul.

Hannah's list: Ghosts are cold to the touch. Being tied up isn't much fun. And danger is a sure-fire prescription for amazing sex! When Hannah Campbell attends a memorial service for the neurosurgeon who once saved her life, the last thing she expects is a lightning strike that knocks her out cold and blasts her lungs full of the departed's ashes. Things only get weirder when she wakes up to find the deceased standing over her hospital bed, insisting she help him track down the terrorists who blew up his plane. Professor Takeshi Shimodo doesn't know what to believe when smart-mouthed Hannah appears on his doorstep, claiming to be haunted by the ghost of his best friend. Yet she exhibits some extraordinary psychic abilities. And her determination to find justice for the crash victims, in spite of her fragile health, touches his heart. Takeshi's acupuncture techniques are meant to calm Hannah's erratic heartbeat, but the longer they are together, the more his magic fingers have the opposite effect. Soon, their passion flares hotter than any lightning strike. But now the terrorist they seek is hunting them. And the FBI is suspicious Hannah knows just a little too much. Without some "spiritual" help, they haven't a ghost of a chance. Warning, this title contains the following: explicit sex, graphic language and violence.
