Sixty years old in 1999, Mercury Marine is the world leader in the marine industry. The memory of its founder, Carl Kiekhaefer, lives on in the hearts and minds of engineers and boat enthusiasts alike. His manic genius and tireless energy found outlet in his need for greater speed, more features and higher value, first in outboards and then in stern drive products. Since Kiekhaefer's departure from the company in 1970, Mercury Marine has come into its own while holding onto those qualities inherited from its founder, qualities that abhor failure. Jeffrey L. Rodengen, author of *Iron Fist: The Lives of Carl Kiekhaefer*, continues to chronicle the fascinating story of Mercury Marine. *The Legend of Mercury Marine* details the company's struggle and ultimate triumph in this comprehensive, lavishly illustrated 225-page work.

J. M. Adovasio has spent the last thirty years at the center of one of our most fiery scientific debates: Who were the first humans in the Americas, and how and when did they get there? At its heart, *The First Americans* is the story of the revolution in thinking that Adovasio and his fellow archaeologists have brought about, and the firestorm it has ignited. As he writes, "The work of lifetimes has been put at risk, reputations have been damaged, an astounding amount of silliness and even profound stupidity has been taken as serious thought, and always lurking in the background of all the argumentation and gnashing of tenets has been the question of whether the field of archaeology can ever be pursued as a science."

The Templar Cross

Though the city of St. Louis is located on the Missouri side of the Mississippi River, for the railroads, the St. Louis Gateway extends into Illinois, north and south along both sides of the river. Two factors conspired against St. Louis's aspiration to become the preeminent rail center of the 19th-century American Midwest: there was no bridge across the Mississippi, and Missouri's loyalty to the Union during the Civil War was suspect. Chicago beat out St. Louis to attain the region's top railroad billing. Fast forward to the 1970s, when the Gateway Arch, dedicated in 1968, redefined the St. Louis riverfront and when the St. Louis Union Station closed to rail service. The 1970s was a decade of railroad debuts—Burlington Northern, Illinois Central Gulf, Family Lines—and a decade of railroad demises—Rock Island and Frisco. It signaled the end of a century of rail domination of the American transportation scene.
