### **Preserving New York**

Preserving New York is the largely unknown inspiring story of the origins of New York City's nationally acclaimed landmarks law. The decades of struggle behind the law, its intellectual origins, the men and women who fought for it, the forces that shaped it, and the buildings lost and saved on the way to its ultimate passage, span from 1913 to 1965. Intended for the interested public as well as students of New York City history, architecture, and preservation itself, over 100 illustrations help reveal a history richer and more complex than the accepted myth that the landmarks law sprang from the wreckage of the great Pennsylvania Station. Images include those by noted historic photographers as well as those from newspaper accounts of the time. Forgotten civic leaders such as Albert S. Bard and lost buildings including the Brokaw Mansions, are unveiled in an extensively researched narrative bringing this essential episode in New York's history to future generations tasked with protecting the city's landmarks. For the first time, the story of how New York won the right to protect its treasured buildings, neighborhoods and special places is brought together to enjoy, inform, and inspire all who love New York.

role in the classroom. Developing Assessments for the Next Generation Science Standards develops an approach to science assessment to meet the vision of science education for the future as it has been elaborated in A Framework for K-12 Science Education (Framework) and Next Generation Science Standards (NGSS). These documents are brand new and the changes they call for are barely under way, but the new assessments will be needed as soon as states and districts begin the process of implementing the NGSS and changing their approach to science education. The new Framework and the NGSS are designed to guide educators in significantly altering the way K-12 science is taught. The Framework is aimed at making science education more closely resemble the way scientists actually work and think, and making instruction reflect research on learning that demonstrates the importance of building coherent understandings over time. It structures science education around three dimensions - the practices through which scientists and engineers do their work, the key crosscutting concepts that cut across disciplines, and the core ideas of the disciplines - and argues that they should be interwoven in every aspect of science education, building in sophistication as students progress through grades K-12. Developing Assessments for the Next Generation Science Standards recommends strategies for developing assessments that yield valid measures of student proficiency in science as described in the new Framework. This report reviews recent and current work in science assessment to determine which aspects of the Framework's vision can be assessed with available techniques and what

additional research and development will be needed to support an assessment system that fully meets that vision. The report offers a systems approach to science assessment, in which a range of assessment strategies are designed to answer different kinds of questions with appropriate degrees of specificity and provide results that complement one another.

Developing Assessments for the Next Generation Science Standards makes the case that a science assessment system that meets the Framework's vision should consist of assessments designed to support classroom instruction, assessments designed to monitor science learning on a broader scale, and indicators designed to track opportunity to learn. New standards for science education make clear that new modes of assessment designed to measure the integrated learning they promote are essential. The recommendations of this report will be key to making sure that the dramatic changes in curriculum and instruction signaled by Framework and the NGSS reduce inequities in science education and raise the level of science education for all students.

word out, she continued with “I guess you are here to shovel my drive! Or did you do that too and now you want your money?” Without missing a beat, Mel replied, “Yup! Twenty bucks!” In a scolding almost frantic tone she replied with, “Well I’m not paying. I have the lawn service under contract. Not very smart business boys. You can’t just ask people to pay for a service they didn’t request!” Pete just stood there in shock when Mel said, “OK, we’ll put it back.” She paused for a moment with a look of horror on her face until she realized Mel was joking and started laughing. She said “I’m sorry boys, but I’m already committed.” Mel replied, “That’s OK, we understand.” As they were walking toward the next house, they heard Ms. Strickland’s door open and she started yelling, “Boys!? Boys!? Wait!” Mel and Pete exchanged glances wondering what now? “Come back! I changed my mind! You can shovel my drive!” Pete jokingly said to Mel, “It looks like we’re both gonna make \$20 on this drive since our price just doubled!”

### **Car Operating Costs**

The post-9/11 world has witnessed a rebirth of irregular and asymmetrical warfare, which, in turn, has led to an increase in conflicts between conventional armies and non-state armed groups. In their haste to respond to the threat from insurgencies, nations often fail to plan effectively not only for combat operations but also for withdrawal, which is inevitable, win or lose. In order to answer the question of how to withdraw from engagement with an insurgency, Gleis examines how insurgencies are conducted and what, if anything, is unique about an Islamist insurgency. He then proposes ways to combat these groups successfully and to disentangle one's military forces from the war once strategic objectives have been met—or once it is clear that they cannot be. Because this type of warfare is dynamic and ever-changing, this book is not meant to

suggest a set of cookie-cutter solutions for how to withdraw from insurgencies. Rather, the author analyzes six counterinsurgency operations that have taken place in the past, with the intention of gleaning from them as many lessons as possible to better prepare for future withdrawals. The literature on how wars end has failed to explore irregular warfare. This much needed reexamination serves as an indispensable starting point.

A trace element (TE) is a chemical element presented below ~0.1 wt. % and required in minute quantities to maintain proper physical functioning. TE analysis in clinical samples (plasma, urine, cerebro-spinal fluid, full-term placenta, hair, nails, buccal mucosa, semen, biopsy specimens) has received increasing attention. Based on 62 sources, current effort presents comparative knowledge about the attempts to accurately trace TE in clinical samples through Vis/NIR, PIXE, TXRF, GFAAS, ICP-MS. It informs the need for further research adjustments to reveal the reciprocal states of certain TE (Cu/Zn, Ca/Mg, Fe/ Pb) in correlation with their real-time counts in both maternal and neonatal umbilical cord plasma, and in relation to augmented oxidative stress. This would help to achieve consistency in interpreting obstetrical complications (preeclampsia, prematurity, or gestational diabetes). Generated hypotheses should target plausible mechanisms behind TE alterations and their stage-sensitive measures in gynecological cancer. New prospects are discussed in management and prognosis of endometriosis and premature ovarian failure (POF).

Rooms of Nancy Vernon Kelly's childhood home in Hollywood, California, provide scaffolding for *Souls at Risk*, a memoir about the roots and consequences of her writer-producer father's sudden turn to right-wing extremism. Radicalization didn't occur in a vacuum. Its grip had clear public and personal roots and consequences. The narrative pivots around a 1960 concert the author's father produced in San Diego for blacklisted folksinger Pete Seeger. When Seeger refused to sign a loyalty oath to use a public high school auditorium, the American Legion accused him of being a communist and protested to the San Diego School Board. Although the concert went on (and Kelly sang along!), the fallout continued for many years, entrenched in Cold War American-Soviet hostility. *Souls at Risk* weaves together the long view of a personal, public, and historical story that embodies both the disruption of extremism and the disruption of grace. While remembering the unwelcome parts of life with hateful extremism, the author also delights in the memory of experiences and people who kept her fledgling soul from completely flattening out in a turbulent time. Indeed, the sweetest touch of mercy arrived in Kelly's inbox almost fifty years after the concert.

The 650th anniversary of the foundation of Wingfield College was the occasion for a special two-day symposium marking the culmination of a three-year UEA-funded research project into the college and castle. The building projects of the late medieval aristocracy focused on their homes and the monasteries, churches or chantry foundations under their patronage where their family were buried and commemorated. This commemoration allowed a visual celebration of their achievements, status and lineage, the scale and prestige of which reflected on the fortunes of the family as a whole. Wingfield is explored in the context of both the actual building of the castle, chantry chapel and the college, and that of the symbolic function of these as a demonstration of aristocratic status. The contributions to this book examine many topics which have hitherto been neglected, such as the archaeology of the castle,

which had never been excavated, the complex history of the college's architecture, and the detailed study of the monuments in the church. The latest techniques are used to reconstruct the college and castle, with a DVD to demonstrate these. And the context of the family and its fortunes are explored in chapters on the place of the de la Poles in fifteenth century history, as soldiers, administrators and potential claimants to the throne.
