Prefatory note. Introduction, by Doctor R. Garnett. Rare books and their values, by W. P. Cutter. The bibliomania; a letter addressed to Richard Heber, By T. F. Dibdin

Almost from its inception, Einstein's general theory of relativity was known to sanction spacetime models harboring singularities. Until the 1960s, however, spacetime singularities were thought to be artifacts of the idealizations of the models. This attitude evaporated in the face of a series of theorems, due largely to Stephen Hawking and Roger Penrose, which showed that Einstein's general theory implies that singularities can be expected to occur in a wide variety of conditions in both gravitational collapse and in cosmology. In the light of these results some physicists adopted the attitude that, since spacetime singularities are intolerable, general relativity contains within itself the seeds of its own destruction. Others hoped that peaceful coexistence with singularities could be achieved by proving a form of Roger Penrose's cosmic censorship hypothesis, which would place singularities safely inside black holes. Whatever the attitude one adopts toward spacetime singularities, it is evident that they raise a number of foundational problems for physics and have profound implications for the philosophy of space and time. However, philosophers of science have been slow to awaken to the significance of these developments. Indeed, this is the first serious book-length study of the subject by a philosopher of science. It features an overview of the literature on singularities, as well as an analytic commentary on their significance to a number of scientific and philosophical issues.

Annual report of the Department of Indian Affairs

Taking a thematic approach, this new companion provides an interdisciplinary, cross-cultural, and international study of American literary journalism. From the work of Frederick Douglass and Walt Whitman to that of Joan Didion and Dorothy Parker, literary journalism is a genre that both reveals and shapes American history and identity. This volume not only calls attention to literary journalism as a

distinctive genre but also provides a critical foundation for future scholarship. It brings together cutting-edge research from literary journalism scholars, examining historical perspectives; themes, venues, and genres across time; theoretical approaches and disciplinary intersections; and new directions for scholarly inquiry. Provoking reconsideration and inquiry, while providing new historical interpretations, this companion recognizes, interacts with, and honors the tradition and legacies of American literary journalism scholarship. Engaging the work of disciplines such as sociology, anthropology, African American studies, gender studies, visual studies, media studies, and American studies, in addition to journalism and literary studies, this book is perfect for students and scholars of those disciplines.
