31 Disciplines of Highly Successful Creatives

A thought-provoking and penetrating account of the post-Cold war follies and delusions that culminated in the age of Donald Trump from the bestselling author of *The Limits of Power*. When the Cold War ended with the fall of the Berlin Wall, the Washington establishment felt it had prevailed in a world-historical struggle. Our side had won, a verdict that was both decisive and irreversible. For the world's "indispensable nation," its "sole superpower," the future looked very bright. History, having brought the United States to the very summit of power and prestige, had validated American-style liberal democratic capitalism as universally applicable. In the decades to come, Americans would put that claim to the test. They would embrace the promise of globalization as a source of unprecedented wealth while embarking on wide-ranging military campaigns to suppress disorder and enforce American values abroad, confident in the ability of U.S. forces to defeat any foe. Meanwhile, they placed all their bets on the White House to deliver on the promise of their Cold War triumph: unequaled prosperity, lasting peace, and absolute freedom. In *The Age of Illusions*, bestselling author Andrew Bacevich takes us from that moment of seemingly ultimate victory to the age of Trump, telling an epic tale of folly and delusion. Writing with his usual eloquence and vast knowledge, he explains how, within a quarter of a century, the United States ended up with gaping inequality, permanent war, moral confusion, and an increasingly angry and alienated population, as well, of course, as the strangest president in

New York Times Bestseller A Summer Reading Pick for President Barack Obama, Bill Gates, and Mark Zuckerberg From a renowned historian comes a groundbreaking narrative of humanity's creation and evolution—a #1 international bestseller—that explores the ways in which biology and history have defined us and enhanced our understanding of what it means to be “human.” One hundred thousand years ago, at least six different species of humans inhabited Earth. Yet today there is only one—homo sapiens. What happened to the others? And what may happen to us? Most books about the history of humanity pursue either a historical or a biological approach, but Dr. Yuval Noah Harari breaks the mold with this highly original book that begins about 70,000 years ago with the appearance of modern cognition. From examining the role evolving humans have played in the global ecosystem to charting the rise of empires, *Sapiens* integrates history and science to reconsider accepted narratives, connect past developments with contemporary concerns, and examine specific events within the context of larger ideas. Dr. Harari also compels us to look ahead, because over the last few decades humans have begun to bend laws of natural selection that have governed life for the past four billion years. We are acquiring the ability to design not only the world around us, but also ourselves. Where is this leading us, and what do we want to become? Featuring 27 photographs, 6 maps, and 25 illustrations/diagrams, this provocative and insightful work is sure to spark debate and is essential reading for aficionados of Jared Diamond, James Gleick, Matt Ridley, Robert Wright, and

Full Moon over Noah's Ark

Acclaimed travel writer Rick Antonson sets his adventurous compass on Mount Ararat, exploring the region's long history, religious mysteries, and complex politics. Mount Ararat is the most fabled mountain in the world. For millennia this massif in eastern Turkey has been rumored as the resting place of Noah's Ark following the Great Flood. But it also plays a significant role in the longstanding conflict between Turkey and Armenia. Author Rick Antonson joined a five-member expedition to the mountain's nearly 17,000-foot summit, trekking alongside a contingent of Armenians, for whom Mount Ararat is the stolen symbol of their country. Antonson weaves vivid historical anecdote with unexpected travel vignettes, whether tracing earlier mountaineering attempts on the peak, recounting the genocide of Armenians and its unresolved debate, or depicting the Kurds' ambitions for their own nation's borders, which some say should include

Mount Ararat. What unfolds in Full Moon Over Noah's Ark is one man's odyssey, a tale told through many stories. Starting with the flooding of the Black Sea in 5600 BCE, through to the Epic of Gilgamesh and the contrasting narratives of the Great Flood known to followers of the Judaic, Christian and Islamic religions, Full Moon Over Noah's Ark takes readers along with Antonson through the shadows and broad landscapes of Turkey, Iraq, Iran and Armenia, shedding light on a troubled but fascinating area of the world. Skyhorse Publishing, as well as our Arcade imprint, are proud to publish a broad range of books for readers interested in history--books about World War II, the Third Reich, Hitler and his henchmen, the JFK assassination, conspiracies, the American Civil War, the American Revolution, gladiators, Vikings, ancient Rome, medieval times, the old West, and much more. While not every title we publish becomes a New York Times bestseller or a national bestseller, we are committed to books on subjects that are sometimes overlooked and to authors whose work might not otherwise find a home.

bestseller and international phenomenon *Sapiens*, returns with an equally original, compelling, and provocative book, turning his focus toward humanity's future, and our quest to upgrade humans into gods. Over the past century humankind has managed to do the impossible and rein in famine, plague, and war. This may seem hard to accept, but, as Harari explains in his trademark style—thorough, yet riveting—famine, plague and war have been transformed from incomprehensible and uncontrollable forces of nature into manageable challenges. For the first time ever, more people die from eating too much than from eating too little; more people die from old age than from infectious diseases; and more people commit suicide than are killed by soldiers, terrorists and criminals put together. The average American is a thousand times more likely to die from binging at McDonalds than from being blown up by Al Qaeda. What then will replace famine, plague, and war at the top of the human agenda? As the self-made gods of planet earth, what destinies will we set ourselves, and which quests will we undertake? *Homo Deus* explores the projects, dreams and nightmares that will shape the twenty-first century—from overcoming death to creating artificial life. It asks the fundamental questions: Where do we go from here? And how will we protect this fragile world from our own destructive powers? This is the next stage of evolution. This is *Homo Deus*. With the same insight and clarity that made *Sapiens* an international hit and a New York Times bestseller, Harari maps out our future.

Sixteen-year-old Noah is a troublemaker. His father is a hotshot barrister. This is not a good combination. When Noah gets caught mucking up at school, his dad sends him to work at his aunt's law firm during the holidays to 'learn responsibility' and 'fix his attitude'. There he meets Jacinta - the cute intern who knows her way around a photocopier, and Casey - the wicked witch of the firm. Noah becomes involved in a case where a woman has been killed during a mugging gone wrong. There's a grieving husband, a guilty employer, and an open and shut case involving lots of money. But right and wrong, and crime and punishment are soon entangled as Noah realises that things are seldom what they seem.

How Many Animals Were on the Ark?

The story of how the associate editor of Birding magazine set himself a lofty goal: to become the first person to see half the world's birds in one year. In 2015, for 365 days, with a backpack, binoculars, and a series of one-way tickets, Noah Strycker traveled across forty-one countries and all seven continents, eventually spotting 6,042 species—by far the biggest birding year on record. This is no travelogue or glorified checklist. Noah ventures deep into a world of chronic sleep deprivation, airline snafus, breakdowns, mudslides, floods, war zones, ecologic devastation, conservation triumphs, common and iconic species, and scores of passionate bird lovers around the globe. By pursuing the freest creatures on the planet, he gains a unique perspective on the world they share with us—and offers a hopeful message that even as many birds face an uncertain future, more people than ever are working to protect them. “Birding Without Borders is light-hearted and filled with stories of exotic birds, risky adventures, and colorful birding

religion and depart; given little time to flee, some perish even before they can escape from Spain. Yonah Toledano, the 15-year-old son of a celebrated Spanish silversmith, has seen his father and brother die during these terrible days - victims whose murders go almost unnoticed in a time of mass upheaval. Trapped in Spain by circumstances, he is determined to honor the memory of his family by remaining a Jew. On a donkey named Moise, Yonah begins a meandering journey, a young fugitive zigzagging across the vastness of Spain. Toiling at manual labor, he desperately tries to cling to his memories of a vanished culture. As a lonely shepherd on a mountaintop he hurls snatches of almost forgotten Hebrew at the stars, as an apprentice armorer he learns to fight like a Christian knight. Finally, as a man living in a time and land where danger from the Inquisition is everywhere, he deals with the questions that mark his past. How he discovers the answers, how he finds his way to a singular and strong Marrano woman, how he achieves a life with the outer persona of a respected Old Christian physician and the inner life of a secret Jew, is the fabric of this novel. The Last Jew is a glimpse of the past, an authentic tale of high adventure, and a tender and unforgettable love story. In it, Noah Gordon utilizes his greatest strengths, and the result is remarkable and moving.
