Management Accounting for Non-specialists

Writing in a non-technical way, Peter Atrill presents a range of topics related to financial management whilst managing to avoid too much detail and unnecessary mathematical analysis. The book is aimed at an undergraduate level audience.

Analysing Financial Statements for Non-Specialists

Management Accounting Accounting for Non Specialists is aimed at non-specialist students of accounting and finance on a first course in the subject. It gives a lively and wide-ranging survey of the basic principles of finance and management accounting. The unique approach taken in the first Section of the book is to look at small to medium sized business organisations and their role in the economy ? how

they are set up, factors in their success and failure and how they source funds for expansion. This leads to discussion of the role of financial markets and their need for financial information. Section 2 then gives an account of management accounting principles. The text is clearly written and technical jargon is minimal - any technical terms are clearly explained and a glossary of terms is provided. Illustrative case studies and reference to real-life business examples are used to bring the technical information to life. Management Accounting for Non Specialists includes a large number of worked examples, to give students valuable practice in using their new skills. Other pedagogic elements include aims and learning outcomes, summaries, Case Studies with questions and solutions, individual learning activities, self-test questions with answers provided in the book, and exercises - the answers to which are divided between the book and the Lecturer's Guide/Website. Management Accounting Accounting for Non Specialists is aimed at non-specialist students of accounting and finance on a first course in the subject. It gives a lively and wide-ranging survey of the basic principles of finance and management accounting. The unique approach taken in the first Section of the book is to look at small to medium sized business organisations and their role in the economy ? how they are set up, factors in their success and failure and how they source funds for expansion. Business Accounting and Finance for Non-specialists

Accounting and Finance for Non-specialists

Financial Management for Non-specialists

This edition of 'Accounting and Finance for Non-Specialists' provides comprehensive coverage of the basic concepts and practical applications of financial accounting, management accounting and financial management.

Management Accounting for Non-specialists

Public Sector Accounting and Budgeting for Non-Specialists focuses on the essentials of what public sector managers need to know in order to become more effective users of financial information. This concise yet thorough book:

- helps non-financial specialists to understand the key aspects of financial documents such as budgets, balance sheets and cash flow statements
- uses examples from a broad range of public sector organizations to illustrate how various types of financial statements are constructed and used
- shows how financial information supports decision-making and accountability
- provides many references to the academic and professional literature for those who want to extend their knowledge

Analysing Financial Statements for Non-Specialists

Introductory Accounting for Non-Specialists is aimed at a single-semester module in accounting and finance. The text provides a first-level look at financial and managerial accounting and basic finance for non-specialist students.

Accounting and Finance

Now in its sixth edition, this successful text introduces the basic principles and

underlying concepts of accounting and finance. It adopts a practical, non-technical approach, making it the ideal text for students from non-accounting disciplines. The text is written from a 'user' perspective, demonstrating ways in which accounting statements and financial information can be used to improve the quality of decision making.

Introduction to Accounting for Non-Specialists

Following the first edition's global success, Accounting: A Smart Approach has refined its fresh approach to accounting for non-specialists. The case study at its heart helps students understand the relevance of accounting within their wider studies. Engaging and lively, clear and practical, it brings accounting to life for lecturers and students.

Accounting and Financial Management (Custom Editon EBook)

Designed primarily for middle and junior management who deal with financial information without really understanding the content; students who are studying accounting as a non-specialist subject, for example on a business studies or engineering course. The book serves as a basic reference to be used throughout the course. It will also be particularly helpful in providing the basic grounding that

is required before moving on to the more technical and in-depth study of the subject that may be required on some courses. Students who are embarking on a course of study to become a professional accountant will also find this book of major benefit. In addition to revisions through out, a new new chapter 'Making long-term investment decisions' covering capital investment decisions, extends and rounds out the final part of the book: using Financial Information to Manage a Business. The chapter deals with the investment appraisal process and covers the main investment appraisal techniques from the point of view of a non-specialist: payback periods, accounting rate of return and discounted cash flow methods are just some of the new topics covered. The focus will be on the level of understanding that a non-specialist requires in the work place as such, in keeping with the rest of the book, the chapter includes practical examples and exercises to enhance the reader's understanding. * Jargon free and easy to understand - no prior knowledge of the subject necessary * Focuses on the principles and use of accounting information * Review questions to assess progress at each stage and many fully worked exercises and examples

ACCOUNTING AND FINANCE FOR NON-SPECIALISTS.

Financial Accounting for Non-Specialists is today's book for tomorrow's manager. It offers a fresh approach to financial accounting, enabling students to understand how financial accounting applies to financial management. This book

presents financial accounting in an intelligent manner, that allows non-accounting students to grasp the basic principles before tackling more advanced topics.

Accounting for Business

Accessible, learner-friendly and jargon free, this best selling text in financial accounting is the ideal starting point for non-accounting students. Clear and Concise it not only arms the reader with the basic principles of the subject, but actively encourages the reader to build on these through an 'open-learning' approach, involving the reader in various questions and activities along the way. The third edition has been thoroughly updated and revised improving existing features and expanding content. Features include *New material on 'Social Reporting' *Double entry book-keeping included as an appendix only *An updated and revised selection of end-of -chapter, self-assessment, and review questions *Improved glossary of technical terms Financial Accounting for Non-specialists is suitable for all undergraduate and postgraduate students from any discipline, taking an introductory course or module in financial accounting. The open-learning approach also makes it suitable for those studying independently or on distance learning courses The Authors Peter Atrill is the head of the Department of Accounting and Law at the University of Plymouth Business School. Eddie McLaney is a Visitin

Upon purchase, you will.

Financial Management for Non-specialists

The growth in the provision of education through open-learning, coupled with increased pressures on teaching resources, has led to a greater emphasis on student-centred learning. Concurrently, the spread of modularisation is giving students a broader choice of subjects to study beyond their major discipline, including elements of accounting and finance. Conceived in response to this shift in approach and the growth of non-specialist classes, this text provides a broad-based introduction to the main concepts of financial management and their practical application in decision-making. Effective teaching and learning are facilitated through a variety of distinctive features; these are designed to encourage interaction and allow for flexible study and assessment. The clarity of explanations, minimisation of mathematical formulae, and the frequent use of worked examples and practical illustrations further distinguish the text for

undergraduate students on non-finance/accounting degree or diploma courses taking an introductory module, and for postgraduate/experience courses such as the ACCA Certified Diploma.

Exam Prep for: Accounting and Finance for Non-Specialists

The world certainly suffers no shortage of accounting texts. The many out there help readers prepare, audit, interpret and explain corporate financial statements. What has been missing is a book offering context and discussion for divisive issues such as taxes, debt, options, and earnings volatility. King addresses the why of accounting instead of the how, providing practitioners and students with a highly readable history of U.S. corporate accounting. More Than a Numbers Game: A Brief History of Accounting was inspired by Arthur Levitt's landmark 1998 speech delivered at New York University. The Securities and Exchange Commission chairman described the too-little challenged custom of earnings management and presaged the breakdown in the US corporate accounting three years later. Somehow, over a one-hundred year period, accounting morphed from a tool used by American railroad managers to communicate with absent British investors into an enabler of corporate fraud. How this happened makes for a good business story. This book is not another description of accounting scandals. Instead it offers a history of ideas. Each chapter covers a controversial topic that emerged over the past century. Historical background and discussion of people involved give

relevance to concepts discussed. The author shows how economics, finance, law and business customs contributed to accounting's development. Ideas presented come from a career spent working with accounting information.

ACCOUNTING AND FINANCE FOR NON-SPECIALISTS 11TH EDITION

Market_Desc: · Non-Accounting Students at undergraduate level Special Features: · Good blend of theory and practice· Worked examples supplemented by explanation· Two colour text· Novel material eg regulatory framework, creative accounting and international accounting· Comprehensive chapter on financial statement analysis· Innovative presentations with the use of boxes, diagrams, quotations, graphs and real-life examples· A first rate author who has taught financial accounting for 18 years from introductory level to final year degree. About The Book: Accountancy for Non-Specialists is a resource for professionals and non professionals who are familiar with accounting practices but have never received training. As well as a thorough treatment of core material on financial and management accounting, this book provides coverage of other important topics such as the regulatory framework, corporate governance, creative accounting, international accounting and strategic management accounting. The text blends theory and practice by stressing the underlying concepts and context of

accounting and supplemented by working examples to illustrate key issues.

Accounting: A Smart Approach

This textbook introduces the topic of financial statements, without assuming prior training and study in accounting - because of this and with the aid of an array of pedagogical features, it is perfect for students and managers who need to build their understanding of financial statements without taking an entire degree in accounting.

Management Accounting for Non-Specialists

All business organizations produce financial statements, and the information

communicated (or hidden) in these is relevant to a wide range of users. After a number of recent financial scandals from banks to supermarkets, the need to fully understand financial statements has never been so imperative, and the topic itself so pertinent. With updated examples to reflect the current business environment, including new material on the ethical considerations, and a wider array of business examples, from retail to services and banks, O'Hare continues to demist financial statements for non-specialists. In this new and refreshed edition, he once again covers the topic in an accessible way and assumes no prior training or study in accounting. Offering a range of extra resources, including end of chapter questions, topics for further discussion and brimming with real-world examples, this concise new edition provides a comprehensive resource that will be welcomed by lecturers and instructors charged with delivering classes on financial statements.

The Essentials of Finance and Accounting for Nonfinancial Managers

Intended for non-specialist students of accounting and finance taking their first

module in the subject, within courses such as business studies and management. This title includes: chapter on working capital management; extends the coverage of corporate governance, auditing and Activity Based Costing; and, more.

Financial Accounting for Non-specialists

The recent turbulence in the global financial markets has drawn attention to an alternative system of financial intermediation: Islamic banking and finance, which has so far remained on the sidelines of the unrest. *Islamic Finance in a Nutshell* is a quick and easy guide to understanding the fundamentals of Islamic Finance and how the Islamic Financial markets work. Designed as a quick read for practitioners needing to pick up the basics of the industry, it will enable readers to understand the differences Islamic and Western finance. Starting with the rise of Islamic finance, the book highlights the key areas which practitioners need to grasp to understand the marketplace including financial statement analysis, Sharia'a law, making money in the absence of interest and regulation. The book also provides readers with a basic guide to Arab terminology and a guide to the top financial institutions within the Islamic markets. This is an ideal guide for anyone with an interest in how these financial markets work, but who do not want to be bogged down in complex and unnecessary terminology.
