Welcome to Cuba's automotive time capsule, filled

with classic cars. The story of how Cuba came to be trapped in automotive time is a fascinating one. For decades, the island country had enjoyed healthy tourism trade and American outpost status, and by the 1950s it had the highest per capita automotive purchasing of any Latin American country - its middle class ensured an interesting variety of vehicles plying the roads. But when Cuba fell to communist rebels in 1959, so ended the inflow of new cars. Since then, trade embargo forced Cuba's car enthusiasts to develop a unique and insular culture, one marked by great creativity, such as: Keeping a car alive with no opportunity to acquire replacement parts Customizing a car with no access to aftermarket parts Drag racing with no drag strip In many ways, Cuba is an automotive time warp, where the newest car is a 1959 Chevy or perhaps one of the Soviet Ladas. Cuba's Car Culture offers an inside look at a unique car culture, populated with cars that have been cut off from the world so long that they've morphed into something else in the spirit of automotive survival. Authors Tom Cotter and Bill Warner (founder of the Amelia Island Concours) take readers of Cuba's Car Culture on a whirlwind tour of all things automotive, beginning with Cuba's pre-Castro car and racing history and bringing us up to today's lost collector cars, street racing, and the challenges of keeping decades-old cars on the road. The book is illustrated throughout with rare historical photos as well as contemporary photos of Cuba's current car scene. For anyone who enjoys classic cars, from old Chevy Bel-Airs to Studebakers to Ford Fairlanes, a cruise around Cuba will make you feel like a kid in a candy store.

Training in the Motor Vehicle Repair and Sales Sector in Italy

Subject Authorities: Dewey decimal classification index

Cars & Parts

Japan Transportation

Automotive News

National Union Catalog

This book offers a comprehensive look at an industry that plays a growing role in motor vehicle production in the United States.

World Aviation Directory

An international team of researchers studied the following aspects of training in Italy's motor vehicle repair and sales sector: structure and characteristics; institutional and social context; relationship to Italy's overall labor market; changing structural, economic, and organizational conditions; and training and recruitment and relationship to Italy's education

system. Social and labor/employment statistics were analyzed, and case studies of an independent auto repair shop and four automobile distributors were conducted. Included in each case study were a profile of the company and analysis of its human resource development/training concepts and policies, and provisions for continuing vocational training. A distinct lack of initial vocational training required to produce workers capable of keeping pace with the rapid changes in the sector was noted. This deficiency was partly compensated for by courses provided by manufacturers and, to a lesser degree, related associations. The training currently offered by the companies studied was rated average to better than average. Employee training was being provided almost exclusively by manufacturers. A trend away from training only in traditional technical areas toward training in areas deemed useful for overall company management (including planning, marketing, and telemarketing) was noted. (Sixty tables/figures are included.) (MN)
