Praise for the previous edition: "This comprehensive multi-authored text contains over 450 pages of highly specific and well-documented information that will be interest to physicians in private practice, academics, and in medical management. . . [Chapters are] readable, concise yet complete, and well developed. I could have used a book like this in the past, I will certainly refer to it frequently now." 4 stars Carol EH Scott-Conner, MD, PhD, MBA American College of Physician Executives Does Health 2.0 enhance or detract from traditional medical care delivery, and can private practice business models survive? How does transparent business information and reimbursement data impact the modern competitive healthcare scene? How are medical practices, clinics, and physicians evolving as a result of rapid health- and non-health-related technology change? Does transparent quality information affect the private practice ecosystem? Answering these questions and

The book is written system wise. The theme includes the way alterations are produced in normal physiology by disease, leading to the generation of symptoms and signs. This approach is expected to help the student appreciate the role of basic sciences in understanding the pathophysiology of disease. Simple flow charts and diagrams are used to explain the text. For each chapter there is a Short

Questions-Answers module which offers explanation to the questions raised in the text. The book has been treated keeping in view the environmental and socio economic factors that control lives in India. There has been no attempt to deal with every mundane subject in the field of physiology. In each chapter only certain aspects of the subject have been dealt with. The areas chosen are generally found interesting by most students. Two chapters namely Circadian Rhythms and Pathophysiology of Stress, and Pathophysiology of Thermoregulatory Disorders are new innovations. The aim of the book is to enthuse the student into thinking in “Clinical terms” using basic sciences as back drop and to conceptualize and derive conclusions rather than memorize facts.
