For centuries, the stunning panoramas of Arizona and New Mexico served as the backdrop for a veritable cavalcade of human history. From Anasazi cities built within towering canyon walls to early outpost villages of an expanding young nation, the Southwest served as the home to a range of communities that first thrived and ultimately demised in the region's rugged, sprawling landscapes. Today, the Southwest lures visitors with its majestic natural scenery and links to a fascinating chapter in our nation's history. In *Ghost Towns of the Southwest*, Jim Hinckley and Kerrick James present the colorful stories, colorful characters, and colorful landscapes that bring to life these landmarks of our past.

Arizona is a visual delight: a ruggedly beautiful state with a rich history and abundant photographic opportunities of not only its exquisite landscape, but its abandoned past. From dusty ghost towns to eerily silent concrete masterpieces, what has been

discarded in the settling of this young state is the narrative of Ghost Towns and Legends. Many of Arizona's once thriving mining communities are now deserted. They are nestled in picturesque valleys and harsh desert mountain ranges. America's beloved Route 66 stretches across the state and many trading posts remain--although long abandoned and at the mercy of time and vandals, they still have colorful, visual stories to tell. The Abandoned Arizona, Ghost Towns and Legends journey encompasses the entire state, including the metropolis of Phoenix, where the legendary Phoenix Trotting Park stood isolated and forsaken for half a century. Irresistible sunsets are an Arizona trademark, but so too should be its slowly disintegrating past; before we move on to what's next, we must be mindful of the importance of our past--there is much to be learned.

Ghost Towns of the West

Will Croft Barnes (1858–1937) first came to Arizona as a cavalryman and went on to become a rancher, state legislator, and conservationist. From 1905 to 1935, his travels throughout the state, largely on horseback, enabled him to gather the anecdotes and

geographical information that came to constitute Arizona Place Names. For this first toponymic encyclopedia of Arizona, Barnes compiled information from published histories, federal and state government documents, and reminiscences of "old timers, Indians, Mexicans, cowboys, sheep-herders, historians, any and everybody who had a story to tell as to the origin and meaning of Arizona names." The result is a book chock full of oddments, humor, and now-forgotten lore, which belongs on the night table as well as in the glove compartment. Barnes' original Arizona Place Names has become a booklover's favorite and is much in demand. The University of Arizona Press is pleased to reissue this classic of Arizoniana, which remains as useful and timeless as it was more than half a century ago.

Arizona Ghost Towns and Mining Camps

Discover just how Jerome, Arizona, became known as "America's Largest Ghost Town"—and what spirits walk its historic streets. Jerome was once home to the largest copper mine in Northern Arizona, built on the steep terrain of Cleopatra Hill. The small town, population fifteen thousand at its peak, was shockingly nefarious. Diversions for the hardworking miners came by way of saloons, gambling and ladies of the evening. Shootouts and murders, violent accidents in the mines and smelters and fires and diseases scourged its denizens. Life was tough on the mountain—death came too soon for many. When the copper mine closed in 1953, Jerome was rendered a ghost town, and its spirits still lurk among the living.

Ghost Towns of the Mountain West

Ghost towns and mining camps are the last remaining vestiges of the Old West; there is a mystique surrounding these places that has made exploring them a pastime for many in the western United States. Nevada has more than a thousand of these boom-and-bust towns. Some are completely abandoned, while some still struggle to survive and even serve as county seats. Sadly, these wonderful places, including those covered in this volume, are constantly in danger from vandalism and neglect. Many ghost towns and mining camps have been destroyed or damaged needlessly, and those who are captivated by their charm must protect these windows into history so that they survive for future generations.

Ghost Towns of California

Searching for gold in the American West was not for the faint of heart. To reach the fabled gold fields of California, prospectors penetrated the boundless high Sierras and the Rockies and crossed the desert wastes of Arizona, Utah, and Nevada. Waves of would-

be miners poured into the golden gulches of Oregon, Washington, and Idaho, while others climbed to the deeper mines high in the mountains of Montana, Wyoming, and Colorado. Along the way, they made their homes and earned a living in makeshift camps and towns, many of which have since vanished. Written back when old-timers still recalled the glorious ordeal of the Old West and many ruins still stood, *The Bonanza Trail* endures as a classic of western storytelling. Muriel Sibell Wolle traveled 20,000 miles across 12 western states in search of the legendary mining camps and towns where adventure could happen on a dime and dreams of instant fortune filled the days. The risky but always exciting life in those bustling frontier settlements is memorably captured by Wolle in vivid detail and her extraordinary drawings and paintings.

Jerome was too stubborn to die. It became Arizona's most famous ghost town and a notorious and loveable hippie hideout. For thirty-two years, author Diane Sward Rapaport was immersed in the social and political life of this village of 450 people. "I became privy to the fortunes, misfortunes, dreams and ambitions of a quirky patchwork of rebels, heroes, scoundrels, and artists. I heard preposterous stories: the ten-dollar sale of Main Street in the 1950s; the ghost that lived in a gun; the theft of a larger amount of money from the Catholic Church; and several 50-plant pot gardens growing in the mountains." A drug bust in October 1985 made The New York Times with the headlines "Ghost Town That Was Restored to Life is Now in Uproar Over Raid for Drugs." Among those arrested were two council members and the chief of police. These stories are part of the mesmerizing history of a town that overcome overwhelming odds to become a celebrated art and history destination now visited by more than a million

Superior and Queen Valley share a rich history. Superior began with the establishment of Generals Stoneman and Crook's military installation to ward off Apache raids in the 1870s. Soon thereafter, while digging for a new road, a soldier named Sullivan discovered Arizona's richest silver deposit, later known as the Silver King Mine. Then with the help of Col. Boyce Thompson, who developed the Magma Copper Company, Superior also became Arizona's biggest copper operation. In 1915, Queen Valley began with Hart Mullins, the area's first official homesteader. Hart worked as a Superior Route

Ghost Towns of Route 66

The ghost towns of Southern California-some dramatic and nearly intact, others devastated-are well worth visiting. Most are remnants of once-colorful mining towns, though there are also railroad towns, a World War II relocation center, a promoter's swindle, and a failed socialist colony. Some excellent attractions remain. One of the best-preserved stamp mills in the West is in Skidoo. Smelters, homes, stores, and the remarkable wooden American Hotel can be found in Cerro Gordo, which the author calls "California's best true ghost town." Seasoned back-roads traveler Philip Varney, who has visited nearly a hundred ghost towns in the area, provides a down-to-earth and helpful guide to more than sixty of the best in Southern California and nearby Inyo and Kern counties. He defines a ghost town as a town with a population markedly decreased from its peak, one whose initial reason for settlement no longer keeps people there. It can be completely deserted, have a resident or two, or retain genuine signs of vitality, but Varney has eliminated those towns he considers either too populated or too empty of significant remains. The

sites are grouped in four chapters in Inyo County, Death Valley, the Mojave Desert and Kern River, and the regions surrounding Los Angeles and San Diego. Each chapter provides a map of the region, a ranking of sites as "major," "secondary," and "minor," information on road conditions, trip suggestions, and tips on the use of particular topographic maps for readers interested in more detailed exploration. Each entry includes directions to a town, a brief history of that town, and notes on its special points of interest. Current photographs provide a valuable record of the sometimes fragile sites. Southern California's Best Ghost Towns will be welcomed both by those who enjoy traveling off the beaten path and by those who enjoy the history of the American West.

Many areas are pocked with mines, pot holes, old wells. People have met their death by falling into such places. Don't forget the desert washes that flood and the quicksand that may lurk in riverbeds, streams and water holes. Be sure your vehicle can travel the terrain successfully. Even then, be careful. Gas, food, water and first aid supplies must be sufficient. Keep an eye out for snakes and other denizens of the remote country. Know the vegetation. Observe "no trespassing" and "keep out" signs. Don't get lost. Tell a friend or family member where you are going, and about when you will return. Know desert survival. Equip your vehicle with a citizen band radio for emergencies.

If it is abandoned by all or most of its inhabitants, a settlement becomes a ghost town. The buildings and dirt streets may remain, but the character and soul of the place change entirely. And so it was with mining camps, lumber camps, and cowboy towns scattered across America, particularly in the West: places with names like Gregory's Diggings, Deadwood, Bodie, Calico, Goldfield, and Tombstone, some of the over

30,000 deserted towns in the United States. Why did people come to these isolated places? Why did they leave? As Raymond Bial's narrative explores the history of our ghost towns, his well-composed photographs silently tell their stories: of bustling, muddy streets, of large mercantile stores, and, ultimately, of short-lived dreams of gold, fertile land, or simply a good place to call home.

Holding the Line, Barbara Kingsolver's first non-fiction book, is the story of women's lives transformed by an a signal event. Set in the small mining towns of Arizona, it is part oral history and part social criticism, exploring the process of empowerment which occurs when people work together as a community. Like Kingsolver's award-winning novels, Holding the Line is a beautifully written book grounded on the strength of its characters. Hundreds of families held the line in the 1983 strike against Phelps Dodge Copper in Arizona. After more than a year the strikers lost their union certification, but the battle permanently altered the social order in these small, predominantly Hispanic mining towns. At the time the strike began, many women said they couldn't leave the house without their husband's permission. Yet, when injunctions barred union men from picketing, their wives and daughters turned out for the daily picket lines. When the strike dragged on and men left to seek jobs elsewhere, women continued to picket, organize support, and defend their rights even when the towns were occupied by the National Guard. "Nothing can ever be the same as it was before," said Diane McCormick of the Morenci Miners Women's Auxiliary. "Look at us. At the beginning of this strike, we were just a bunch of ladies."

Abandoned Western Colorado: Ghost Towns and Mining Camps of the Rockies takes the reader on a visual voyage through the ghost towns and mining camps of the Rocky Mountains of western Colorado as seen through the eyes of author, historian and photographer, Jeff Eberle. The author has spent much of the last decade scouring the back roads, 4 x 4 trails, and footpaths of the Centennial State in a rush against time and progress to photograph the fragile remnants of Colorado's earliest days. From solitary prospector's huts in remote back country gulches, to the weather-beaten facades of boom towns gone bust, the author has attempted to capture a few final images of Colorado's rapidly vanishing past. The author hopes to help raise awareness and public interest in the preservation and protection of Colorado's historic sites and structures. Discovered by Henry Wickenburg in 1863, the Vulture Mine was one of the greatest gold strikes in Western history, and went through many owners during its long life. The first was its founder, who gave his name to the city of Wickenburg, which today thrives fifteen miles away on the Hassayampa River. Vulture City, which grew up around the mine beginning in 1880, had everything that miners, engineers, families, and absentee owners could want, from saloons to schools. The Vulture Mine's fortunes waxed and waned from the Gilded Age through the Jazz Age, the Depression and two World Wars. As the twenty-first century

In this book, author Lynn Downey brings the Vulture Mine and Vulture City to life through stories of fantastic ore strikes, murderous bandits, the struggle for water, and the men who came from as far away as Mexico and China to find their fortunes.

the huge population clusters of the global marketplace by keeping our population static or letting it diminish, or with our crumbling transit and unaffordable housing. The winner in the future world is going to have more—more ideas, more ambition, more utilization of resources, more people. Exactly how many Americans do we need to win? According to Matthew Yglesias, one billion. From one of our foremost policy writers, *One Billion Americans* is the provocative yet logical argument that if we aren't moving forward, we're losing. Vox founder Yglesias invites us to think bigger, while taking the problems of decline seriously. What really contributes to national prosperity should not be controversial: supporting parents and children, welcoming immigrants and their contributions, and exploring creative policies that support growth—like more housing, better transportation, improved education, revitalized welfare, and climate change mitigation. Drawing on examples and solutions from around the world, Yglesias shows not only that we can do this, but why we must. Making the case for massive population growth with analytic rigor and imagination, *One Billion Americans* issues a radical but undeniable challenge: Why not do it all, and stay on top forever?

Southeastern Arizona has one of the most diverse mining localities in the state. Towns such as Bisbee, Clifton, Globe, Miami, Ray, Silverbell, and Superior have earned reputations as premier metal producers that are most notably known for their copper. Other mining towns that have made their marks in the region include Dos Cabezas, Gleeson, Harshaw District, Helvetia, Patagonia District, Pearce, Ruby, and Tombstone. Mining in southeastern Arizona has significantly influenced the development of mines in northern Sonora, Mexico. The foundation of Mexico's largest copper mine in Cananea was financed by American capital, specifically under the direction of miners and investors from southeastern Arizona. Overall, the process of mining has established the economy of southeastern Arizona, making it a viable source of copper-related minerals in the 21st century's global market.
