Astro Boy. Tetsuwan Atom

The Four Immigrants Manga

Astro Boy and Anime Come to the Americas

Cartoonist Osamu Tezuka (1928–1989) is the single most important figure in Japanese post-World War II comics. During his four-decade career, Tezuka published more than 150,000 pages of comics, produced animation films, wrote essays and short fiction, and earned a Ph.D. in medicine. Along with creating the character Astro Boy (Mighty Atom in Japan), he is best known for establishing story comics as the mainstream genre in the Japanese comic book industry, creating narratives with cinematic flow and complex characters. This style influenced all

subsequent Japanese output. *God of Comics* chronicles Tezuka's life and works, placing his creations both in the cultural climate and in the history of Japanese comics. The book emphasizes Tezuka's use of intertextuality. His works are filled with quotations from other texts and cultural products, such as film, theater, opera, and literature. Often, these quoted texts and images bring with them a world of meanings, enriching the narrative. Tezuka also used stock characters and recurrent visual jokes as a way of creating a coherent world that encompasses all of his works. *God of Comics* includes close analysis of Tezuka's lesser-known works, many of which have never been translated into English. It offers one of the first in-depth studies of Tezuka's oeuvre to be published in English.

Astro Boy

Known as the “Walt Disney of Japan” it is no surprise that Tezuka Osamu is still the best-known manga creator to Western fans. Current scholarship has uncovered the profound complexity and ambiguity not only of his work but of the man, the artist, and his life—dismantling his position as the god of manga. Contributors to this volume of Mechademia—a series devoted to creative and critical work on anime, manga, and the fan arts—analyze Tezuka and his complicated approaches toward life and nonlife on earth, as well as his effect on the lives of other manga artists. Using essays and reprints of Japanese manga on Tezuka, this book questions his influence and attitudes toward the nonhuman, evolutionary theory, the aesthetic lineage of contemporary manga, incipient feminism in the reinscription of the nonhuman feminine, the sexual politics of manga bodies, the origins of the moe culture, and the styles of didacticism revealing the digressions of insects and classical modes, among others. The authors offer varying perspectives on the historical transformations in production, distribution, and reception that gradually integrated and differentiated an overlapping series of markets and readerships in the postwar era. Divided into four sections that explore different “lives”—“Nonhuman Life,” “Media Life,” “A Life in Manga,” and “Everyday Life”—Mechademia 8 serves as a prehistory of the impersonal politics of the present while tracing Tezuka’s legacy. Screen Consciousness

This collection of essays is driven by the question of how we know what we know, and in particular how we can be certain about something even when we know it is an illusion. The contention of the book is that this age-old question has acquired a new urgency as certain trends in science, technology and ideas have taken the discussion of consciousness out of the philosophy department and deposited it in the world at large. As a consequence, a body of literature from many fields has produced its own sets of concerns and methods under the rubric of Consciousness Studies. Each contribution in this collection deals with issues and questions that lots of people have been thinking about for many years in many different contexts, things such as the nature of film, cinema, world, mind and so on. Those of us

fascinated by these diverse yet related issues may have often felt we were working in a disciplinary no-man's-land. Now suddenly, it seems with Consciousness Studies we have a coherent intellectual home - albeit one that is self-consciously eclectic. The essays included in *Screen Consciousness: Cinema, Mind and World* are from a range of disciplines — art, philosophy, film theory, anthropology and technology studies — each represented by significant international figures, and each concerned with how their field is being transformed by the new discipline of Consciousness Studies. Together they attempt to reconcile the oncoming rush of new data from science and technology about how we know what we know, with the insights gained from the long view of history, philosophy and art. Each of the contributions seeks to interpose Consciousness Studies between film and mind, where for cultural theorists psychoanalysis had traditionally stood. This is more than simply updating Film Studies or nodding in the direction of cognitive film theory. Film, with all its sentient, sensuous and social qualities, is a common reference point between all these forces, and Consciousness Studies provides the intellectual impetus for this book to revisit familiar problems with fresh insight.
