Wilderness First Aid Field Guide

Chickens make wonderful pets, and Melissa Caughey provides all the information kids need to raise healthy chickens and have lots of fun doing it. Covering everything from feeding, housing, and collecting eggs to quirky behaviors and humane treatment, Caughey's engaging advice helps children understand the best ways to care for their chickens. Spark enthusiasm with creative activities like chicken forts and a veggie piñata for the flock, and feed more than the imagination with egg-centric dishes like Mexican egg pizza.

Disaster Survival

You aren't the only one. Shows like *Man vs. Wild* and *Survivor* are popular for a reason - we all love adventure, and it's not difficult to imagine scenarios in which we can impress ourselves and our companions with these life-saving skills. Even though these shows might glamorize the stranded-on-a-deserted-island fantasy we've all had, surviving in the wild is no small feat. By reading *A Complete Guide to Surviving in the Wilderness: Everything You Need to Know to Stay Alive and Get Rescued*, you are taking the first step toward making it out alive in an potentially harmful wilderness situation. We've gathered information from the best survival manuals and have spoken to numerous experts to give you the tools you will need to become a real-life survivor. Because an emergency in the wilderness presents its own set of unique circumstances and challenges, it's imperative you know how to help yourself and others. You must be aware of potential dangers ahead of time and plan appropriately. This book will help you do that. You will learn how to assess your surroundings, stay calm, develop a plan of action, and ultimately do what it takes to make it through any situation. You will take an in-depth look into building shelter, foraging and identifying food that is safe to eat, purifying water so you do not become dehydrated, avoiding poisonous plants, animals, other potential hazards, and many more valuable skills that might

just save your life. There is also detailed information on first aid, climate-specific conditions to know and look out for, navigation, and much more. This complete guide explains what you need to know in detail so you can worry about more important things such as your next adventure in the wild.

The Natural Health First-Aid Guide

What will you do if you are unable to buy groceries or gasoline, or are unable to go to work or leave your home for a week? Two weeks? A month? How will you obtain the goods you need to survive? Don't rely on others to provide for you and your family in a time of need. If a natural disaster, personal crisis, or terrorist act disengages you from the mainstream for several weeks or months, you need to be prepared to survive on your own, with no help from the government or others, until the crisis has passed. This book will guide you through the necessary steps you need to take to become self-sufficient for a short-term disaster situation. It will also encourage you to add your own ideas to customize your plan of action to fit your own individual needs. You will end up with a vast knowledge that will separate you, the educated and prepared, from those who will only rely on others for their needs.

The Comprehensive Guide to Wilderness First Aid

The Savvy Woman's Guide to Owning a Home: How to Care For, Improve and Maintain Your Home is becoming the manual for new homeowners, particularly for women. Research into the books currently available shows that there hasn't been a comprehensive book written as a basic homeowner's manual for the non-tool-savvy owner. Using the

mantra, "Nothing is obvious to the uninformed," The Savvy Woman's Guide to Owning a Home explains how a house works, what the homeowner needs to do to keep on top of potential problems and how to save money doing so. It also covers moving, insurance, seasonal check-ups, yearly maintenance, saving for big ticket jobs, responsibilities of the homeowner, joining a community, finding schools, finding the right contractor for any job, dealing with pests and importantly, preparing for emergencies, whether weather-related or local. Her advice: It's okay to feel apprehensive about this ownership thing. You can do it. It doesn't take a genius to own and maintain a house. If you (or your partner) aren't handy with a hammer and nail, or comfortable with a power drill, so what! Either learn to do it yourself, befriend someone who is comfortable with wielding the appropriate tool, or learn to find the right professional to do the work for you.
