Global Perspectives on Underutilized Crops

The very warm cover suggests a seasonable book, *A Righte Merrie Christmase*, by John Ashton, who, fancying that some of its customs and privileges might be forgotten, collects all that has been done or could be done at this annual event. Some of ye anciente goinges on make one wonder whether feasts were better kept when they spelt with such unreasonable euphony. It must have been "merrie in halle" when the wassail song was ordinarily sung as depicted by A. C Behrend in his exquisite copper etching.

This dictionary forms part of the project *Indo-European Etymological Dictionary*, which was initiated by Robert Beekes and Alexander Lubotsky in 1991. The aim of the project is to compile a new and comprehensive etymological dictionary of the inherited vocabulary attested in the Indo-European languages, replacing the now outdated dictionary of Pokorny (1959).

Knowledge of plant toxicity has always been important, but the information has not always been reliable. Now, increasing international trade is drawing attention to the inadequacy of regional information and highlighting the geographical fragmentation and notorious discrepancies of thinly documented information. The international community of safety regulators, toxicologists, and poison control personnel requires a single reference compiled of verifiable, primary source reports of common poisonous plants. Intended for just that purpose, International Poisonous Plant Checklist: An Evidence-Based Reference successfully addresses the deficiencies and gaps in the current literature. Using accepted botanic names, the book defines the known set of toxic vascular plants. The use of botanic names satisfies the need for an international standard of identity to support worldwide communication and commerce. Also, taxonomy based on common ancestry and genetic connections provides a rational basis for studying and using plant relationships. The author supports toxicity information with references to the primary literature. Each entry includes referenced citations supporting the toxicity of the plant, symptoms and circumstances of toxic exposure, dosage and potency, chemical analysis, botany, pharmacology, mechanism and metabolism, and control. Finally, the book cross-references selected synonyms and common names. The checklist is organized alphabetically with two types of entries. The main entry documents the toxic plants themselves and a secondary entry lists selected synonyms and common names cross-referenced to the main entries. Including virtually all common animal feed plants, human food plants, and many plants that

are sources of herbal products and dietary supplements, tonics, and therapeutic agents, this timely checklist compiles and verifies the known data on toxic vascular plants from around the world.

Until now, the single most important unpublished work by C.G. Jung—The Black Books. In 1913, C.G. Jung started a unique self- experiment that he called his “confrontation with the unconscious”: an engagement with his fantasies in a waking state, which he charted in a series of notebooks referred to as The Black Books. These intimate writings shed light on the further elaboration of Jung’s personal cosmology and his attempts to embody insights from his self- investigation into his life and personal relationships. The Red Book drew on material recorded from 1913 to 1916, but Jung actively kept the notebooks for many more decades. Presented in a magnificent, seven-volume boxed collection featuring a revelatory essay by noted Jung scholar Sonu Shamdasani—illuminated by a selection of Jung’s vibrant visual works—and both translated and facsimile versions of each notebook, The Black Books offer a unique portal into Jung’s mind and the origins of analytical psychology.

Increase in world population, extreme weather conditions, decrease in fresh water supplies, and changes of dietary habits are major issues that affect global food security. We are expected to face the challenges of land use by 2050 because

population will reach 9 billion while agricultural productivity losses are expected due to overuse of lands. How can we feed the next generations in a manner that respects our finite natural resources? Managing our resources in a sustainable way have only begun for selected crops. Much remains to be done to increase food yield. Cropping practices capable of sustainable production need to be elaborated, especially in fragile ecosystems. Typical applications will include the improvement and use of genetic resources; crop management and diversification; diffusion of improved varieties; development of cropping systems; sustainable cropping systems for areas prone to environmental degradation; use of agro-ecological data for crop production forecasting; and networks for regional coordination, and data exchange. The impetus behind this book is to bring attention to a cropping system that bears direct relevance to sustainable agriculture and food security.

“Underutilized” crops are found in numerous agricultural ecosystems and often survive mainly in marginal areas. It is timely to review their status because, in recent decades, scientific and economic interests have emerged which focus on lesser-known cultivated species. Underutilized crops have a great potential to alleviate hunger directly, through increasing food production in challenging environments where major crops are severely limited. “Global Perspectives on Underutilized Crops” is therefore topical and highlights the unmet agricultural challenges that we face today. This book is an important resource for students and researchers of crop science and agricultural policy makers.

Brutal Intimacy is the first book to explore the fascinating films of contemporary France, ranging from mainstream genre spectacles to arthouse experiments, and from wildly popular hits to films that deliberately alienate the viewer. Twenty-first-century France is a major source of international cinema—diverse and dynamic, embattled yet prosperous—a national cinema offering something for everyone. Tim Palmer investigates France’s growing population of women filmmakers, its buoyant vanguard of first-time filmmakers, the rise of the controversial cinema du corps, and France’s cinema icons: auteurs like Olivier Assayas, Claire Denis, Bruno Dumont, Gaspar Noé, and stars such as Vincent Cassel and Jean Dujardin. Analyzing dozens of breakthrough films, Brutal Intimacy situates infamous titles alongside many yet to be studied in the English language. Drawing on interviews and the testimony of leading film artists, Brutal Intimacy promises to be an influential treatment of French cinema today, its evolving rivalry with Hollywood, and its ambitious pursuits of audiences in Europe, North America, and around the world.

ÒWe should look for someone to eat and drink with before looking for something to eat and drink.Ó ÑEpicurus This fascinating book examines the biology and culture of foods and beverages that are consumed in communal settings, with special attention to their health implications. Nina Etkin covers a wealth of topics, exploring human evolutionary history, the Slow Food movement, ritual and ceremonial foods, caffeinated beverages, spices, the street foods of Hawaii and northern Nigeria, and even bottled water. Her work is framed by a biocultural perspective that considers both the physiological implications of consumption and the cultural construction and circulation of foods. For Etkin, the foods and beverages we consume are simultaneously Òbiodynamic substances and cultural objects.Ó The book begins with a look at the social eating habits of our primate relatives and discusses our evolutionary adaptations. It then offers a history of social foods in the era of European expansion, with a focus on spices and Òcaffeinated cordials.Ó (Of course, there were some powerful physiological consequences of eating foods brought home by returning explorers, and those are considered tooÑalong with consequences for native peoples.) From there, the book

describes Òstreet food,Ó which is always served in communal settings. Etkin then scrutinizes ceremonial foods and beverages, and considers their pharmacological effects as well. Her extensive examination concludes by assessing the biological and cultural implications of bottled water. While intended primarily for scholars, this enticing book serves up a tantalizing smorgasbord of food for thought.

On June 17, 2015, at 9:05 p.m., a young man with a handgun opened fire on a prayer meeting at the Mother Emanuel African Methodist Episcopal (AME) Church in Charleston, South Carolina, killing nine members of the congregation. The captured shooter, twenty-one-year-old Dylan Roof, a white supremacist, was charged with their murders. Two days after the shooting, while Roof's court hearing was held on video conference, some of the families of his nine victims, one by one, appeared on the screen—forgiving the killer. The “Emanuel Nine” set a profound example for their families, their city, their nation, and indeed the world. Finding Grace not only recounts the events of that terrible day but also offers a history lesson that reveals a deeper look at the suffering, triumph, and even the ongoing rage of the people who formed Mother Emanuel A.M.E. church and the wider denominational movement. In many ways, this church's story is America's story—the oldest A.M.E. church in the Deep South fighting for freedom and civil rights but also fighting for grace and understanding. Fighting to transcend bigotry, fraud, hatred, racism, poverty, and misery. The shootings in June 2015, opened up a deep wound of racism that still permeates Southern institutions and remains part of American society. Finding Grace tells the story of a people, continually beaten down, who seem to continually triumph over the worst of adversity. Exploring the storied history of the A.M.E. Church may be a way of explaining the price and power of forgiveness, a way of revealing God's mercy in the midst of tremendous pain. Finding Grace may help us discover what can be right in a world that so often has gone wrong.
