In the vein of *Girl, Wash Your Face* and *How to Stop Feeling Like Sh*t*, a practical guide to acknowledging and getting rid of the nonsense and bs in your life Exhausted and overworked lawyer, triathlete, wife, and mom Meredith Atwood decided one morning that she'd had it. She didn't take her kids to school. She didn't go to work. She didn't go to the gym. When she pulled herself out of bed hours later than she should have, she found a note from her husband next to two empty bottles of wine and a stack of unpaid bills: You need to get your sh*t together. And that's what Meredith began to do, starting with identifying the nonsense in her life that was holding her back: saying "yes" too much, keeping frenemies around, and more. In *The Year of No Nonsense*, Atwood shares what she learned, tackling struggles with work, family, and body image, and also willpower and time management. Ultimately, she's the tough-as-nails coach /slash/ best friend who shares a practical plan for identifying and getting rid of your own nonsense in order to move forward and live an authentic, healthy life. From recognizing lies you believe about yourself and your abilities, to making a "nonsense" list and developing a "no nonsense blueprint," this book walks you through reclaiming yourself with grit and determination, step by step. With targeted, practical chapters to help you stop feeling stuck and get on with your life, *The Year of No Nonsense* is equal parts girlfriend and been-there-done-that. The best part? Like any friend, she helps you get to the other side.

Men's Health Natural Bodybuilding Bible

If you want to be muscular, lean, and strong as quickly as possible without steroids, good genetics, or wasting ridiculous amounts of time in the gym and money on supplements then you want to read this book. Here's the deal: Getting into awesome shape isn't nearly as complicated as the fitness industry wants you to believe. You don't need to spend hundreds of dollars per month on the worthless supplements that steroid freaks shill in advertisements. You don't need to constantly change up your exercise routines to "confuse" your muscles. I'm pretty sure muscles lack cognitive abilities, but this approach is a good way to just confuse you instead. You don't need to burn through buckets of protein powder every month, stuffing down enough protein each day to feed a third world village. You don't need to toil away in the gym for a couple of hours per day, doing tons of sets, supersets, drop sets, giant sets, etc. (As a matter of fact, this is a great way to stunt gains and get nowhere.) You don't need to grind out hours and hours of boring cardio to shed ugly belly fat and love handles and get a shredded six-pack. (How many flabby treadmillers have you come across over the years?) You don't need to completely abstain from "cheat" foods while getting down to single-digit body fat percentages. If you plan cheat meals correctly, you can actually speed your metabolism up and accelerate fat loss. In this book you're going to learn something

most guys will never know: The exact formula of exercise and eating that makes putting on 10 to 15 pounds of quality lean mass a breeze and it only takes 8-12 weeks. This book reveals secrets like The 6 biggest myths and mistakes of building muscle that stunt 99% of guys' muscle gains. (These BS lies are pushed by all the big magazines and even by many trainers.) How to get a lean, cut physique that you love (and that girls drool over) by spending no more than 5 percent of your time each day. The 4 laws of muscle growth that, when applied, turn your body into an anabolic, muscle-building machine. You'll be shocked at how easy it really is to get big once you know what you're doing How to develop a lightning-fast metabolism that burns up fat quickly and leaves you feeling full of energy all day long. The carefully-selected exercises that deliver MAXIMUM results for your efforts, helping you build a big, full chest, a wide, tapered back, and bulging biceps. A no-BS guide to supplements that will save you hundreds if not THOUSANDS of dollars each year that you would've wasted on products that are nothing more than bunk science and marketing hype. How to get shredded while still indulging in the "cheat" foods that you love every week like pasta, pizza, and ice cream. And a whole lot more! The bottom line is you CAN achieve that "Hollywood hunk" body without having your life revolve around it--no long hours in the gym, no starving yourself, no grueling cardio that turns your stomach. Imagine, just 12 weeks from now, being constantly complimented on how you look and asked what the heck you're doing to make such startling gains. Imagine enjoying the added benefits of high energy levels, no aches and pains, better spirits, and knowing that you're getting healthier every day. SPECIAL BONUS FOR READERS! With this book you'll also get a free 75-page bonus report from the author called "The Year One Challenge." In this bonus report, you'll learn exactly how to train, eat, and supplement to make maximum gains in your first year of training. By applying what you learn in the book and in this report, you can make more progress in one year than most guys make in three, four, or even five (seriously!). How do some people avoid the slowing down, deteriorating, and weakening that plagues many of their peers decades earlier? Are they just lucky? Or do they know something the rest of us don't? Is it possible to grow older without getting sicker? What if you could look and feel fifty through your eighties and nineties? Founder of the Institute for Aging Research at the Albert Einstein College of Medicine and one of the leading pioneers of longevity research, Dr. Nir Barzilai's life's work is tackling the challenges of aging to delay and prevent the onset of all age-related diseases including “the big four”: diabetes, cancer, heart disease, and Alzheimer's. One of Dr. Barzilai's most fascinating studies features volunteers that include 750 SuperAgers—individuals who maintain active lives well into their nineties and even beyond—and, more importantly, who reached that ripe old age never having experienced cardiovascular disease, cancer, diabetes, or cognitive decline. In *Age Later*, Dr. Barzilai reveals the secrets his team has unlocked about SuperAgers and the scientific discoveries that show we can mimic some of their natural resistance to the aging process. This eye-opening and inspirational book will help you think of aging not as a certainty, but as a phenomenon—like many other diseases and misfortunes—that can be targeted, improved, and even cured.

In 1799, at the end of George Washington's long life and illustrious career, the politician Henry Lee eulogized him as: "First

in war, first in peace, and first in the hearts of his countrymen.” Esteemed historian Richard Brookhiser now adds to this list, “First in leadership,” examining the lessons to be learned from our first president, first commander-in-chief, and founding CEO. With wit and skill, Brookhiser expertly anatomizes true leadership with lessons from Washington's three spectacularly successful careers as an executive: general, president, and tycoon. In every area of endeavor, Washington maximized his strengths and overcame his flaws. Brookhiser shows how one man's struggles and successes two centuries ago can serve as a model—and an inspiration—for leaders today.

For the first time in history, the world shut itself down—by choice—all for fear of a virus, COVID-19, that wasn't well understood. The government, with the support of most Americans, ordered the closure of tens of thousands of small businesses—many never to return. Almost every school and college in the country sent its students home to finish the school year in front of a computer. Churches cancelled worship services. “Social distancing” went from a non-word to a moral obligation overnight. Moral preening on social media achieved ever new heights. The world will reopen and life will go on, but what kind of world will it be when it does? It can't be what it was, because of what's just happened. Professors Jay Richards, William Briggs, and Douglas Axe take a deep dive into the crucial questions on the minds of millions of Americans during one of the most jarring and unprecedented global events in a generation. What will be the total cost in dollars, lives, and livelihoods of this response from governments, on advice from Science? What role have national and global health organizations such as WHO played in this? To whom are they accountable? What evidence do they rely on in sounding the alarm? How did science bureaucrats, relying on murky data and speculative computer models, gain the power to shut down the global economy? How did politicians, who know nothing of the science, decide whom to trust? We need to know what and how it happened, to keep it from ever happening again.

If you want to build muscle and lose fat easily, effectively, and rapidly...and if you'd like to rid yourself of all kinds of bad advice and habits that are making getting into great shape much harder than it should be...then you need to read this book. Let me ask you a question. Do any of the following claims sound familiar? "I have bad genetics--I just can't build muscle or lose fat easily." "You have to work your abs more to get a six-pack." "When doing cardio, you want your heart rate in the 'fat burning zone.'" "Don't eat carbohydrates--they make you fat." "Don't eat at night if you want to lose weight." "If you wait too long in between meals, your body goes into 'starvation mode' and you will mess up your metabolism." "I'm overweight because I have a slow metabolism." You've probably heard one or more of these statements before, and the sad truth is lies like these have ruined many people's fitness ambitions. Thanks to the overwhelming amount of fitness pseudo-science and lies being pushed on us every day by bogus magazines and self-styled "gurus," it's becoming harder and harder to get in shape. Muscle Myths was written to debunk the most commonplace and harmful gimmicks, fads, myths, and misinformation in the health and fitness industry. And unlike other books that just offer endless opinions, the advice in this book is backed up by over 300 citations of scientific literature, and real-world results. Make no mistake: this isn't a book about exercise and diet theory. This book is full of practical, results-driven advice that will help you reach your fitness goals

easier and faster. Here are just some of the things you'll learn in this book: Why you don't have to completely cut out carbs or fat, or eat weird combinations of food to lose weight. The truth about supplements and why 99% of them are a complete waste of money (and the few that are actually scientifically proven to work). The truth about the effects of fasting and the "starvation mode" myth. Yup, it's a myth, and you may even want to incorporate some fasting into your meal schedule. Why eating a substantial amount of carbohydrates every day won't make you fat as some "experts" claim, but why going low-carb can be beneficial for some. The scientific secrets of getting a six-pack. Forget 6-minute gimmicks, doing endless crunches, and hours of grueling cardio--it's actually pretty easy when you know what you're doing. Training and diet methods that will completely shatter any perceived "genetic barriers" that you think are holding you back from building muscle or losing weight. What you need to know about alcohol and its effects on your fat loss and muscle growth. (Hint: It's not nearly as bad as some people claim, and you don't have to totally abstain if you know what you're doing!) And much more. This book will save you the money, time, and frustration of falling into the traps of misleading diets, workout programs, and products, and teach you how to finally start seeing real results with your diet and exercise. **SPECIAL BONUS FOR READERS!** With this book you'll also get a free 52-page bonus report from the author called "Muscle Meals: 15 Recipes for Building Muscle, Getting Lean, and Staying Healthy."
