Winter Kill

Adam Arnett, former Air Force jet-jockey, is a successful business executive, technological pioneer and community leader willing to forfeit prestige, money and power to escape the urban rat race and pursue his dream of the simple life. Ultimately the price is substantially more. A tour of northwestern Maine seems to be the answer, but nearly costs him his life. Betrayals and personal agendas stalk his quest. A gruesome discovery in the backwoods of Maine and a prophetic message from the dead change his course. A bizarre request from a dying judge offers Arnett the golden key to his future. Is Paula, the judges niece, an erotic artist whose sexuality could be her undoing, be trusted? Could Jessica, the waitress from the nowhere caf, who still bares scars of childhood abuse, be a part of Adams future? People in high places bend the rules, but

not always for Adams benefit. There is no question that Arnett fired the gun that killed, making it no simple task for attorney Sampson Curly Wade to convince a jury that circumstance, not his client, is guilty of the crime for which Adam is charged. Fate renders the final verdict.

“This book contains some of the most up-to-date information available anywhere on a wide variety of topics related to Techno Security. As you read the book, you will notice that the authors took the approach of identifying some of the risks, threats, and vulnerabilities and then discussing the countermeasures to address them. Some of the topics and thoughts discussed here are as new as tomorrow’s headlines, whereas others have been around for decades without being properly addressed. I hope you enjoy this book as much as we have enjoyed working with the various authors and friends during its development. —Donald Withers, CEO and Cofounder of TheTrainingCo. • Jack Wiles, on Social Engineering offers up a potpourri of tips, tricks, vulnerabilities, and lessons learned from 30-plus years of experience in the worlds of both physical and technical security. • Russ Rogers on the Basics of Penetration Testing illustrates the standard methodology for penetration testing: information gathering, network enumeration, vulnerability identification, vulnerability exploitation, privilege escalation, expansion of reach, future access, and information compromise. • Johnny Long on No Tech Hacking shows how to hack without touching a computer using tailgating, lock bumping, shoulder surfing, and dumpster diving. • Phil Drake on Personal, Workforce, and Family Preparedness covers the basics of creating a plan for you and your family, identifying and obtaining the supplies you will need in an emergency. • Kevin O’Shea on Seizure of Digital Information discusses collecting hardware and information from the scene. • Amber Schroader on Cell Phone Forensics writes on new methods and guidelines for digital forensics. • Dennis O’Brien on RFID: An Introduction, Security Issues, and Concerns discusses how this well-intended technology has been eroded and used for fringe implementations. • Ron Green on Open Source Intelligence details how a good Open Source Intelligence program can help you create leverage in negotiations,

'A brilliant excursion into the decadence of contemporary culture' Sunday Times Eric Packer is a twenty-eight-year-old multi-billionaire asset manager. We join him on what will become a particularly eventful April day in turn-of-the-twenty-first-century Manhattan. He's on a personal odyssey, to get a haircut. Sitting in his stretch limousine as it moves across town, he finds the city at a virtual standstill because the President is visiting, a rapper's funeral is proceeding, and a violent protest is being staged in Times Square by anti-globalist groups. Most worryingly, Eric's bodyguards are concerned that he may be a target . . . An electrifying study in affectlessness, infused with deep cynicism and measured detachment; a harsh indictment of the life-denying tendencies of capitalism; as brutal a dissection of the American dream as Wolfe's Bonfire or Ellis's Psycho, Cosmopolis is a caustic prophecy all too quickly realized. The heavily armed P-61 Black Widow was the U.S. Army Air Force's first dedicated night fighter. Equipped with radar, four .50 caliber machine guns and four 20mm. cannons, the Widow was a fearsome adversary. It flew as both an intruder and interceptor in Europe and the Pacific. Originally printed by Northrop in 1945, the YP-61 Pilot's Flight Operating Manual taught pilots everything they needed to know before entering the cockpit. Originally classified "Restricted," the manual was declassified long ago and is here reprinted in book form. This affordable facsimile has been reformatted, and color images appear as black and white. Care has been taken however to preserve the integrity of the text.

With her signature warmth, hilarity, and tendency to overshare, Leslie Gray Streeter gives us real talk about love, loss, grief, and healing in your own way that "will make you laugh and cry, sometimes on the same page" (James Patterson).

Leslie Gray Streeter is not cut out for widowhood. She's not ready for hushed rooms and pitying looks. She is not ready to stand graveside, dabbing her eyes in a classy black hat. If she had her way she'd wear her favorite curve-hugging leopard print dress to Scott's funeral; he loved her in that dress! But, here she is, having lost her soulmate to a sudden heart attack, totally unsure of how to navigate her new widow lifestyle. ("New widow lifestyle." Sounds like something you'd find products for on daytime TV, like comfy track suits and compression socks. Wait, is a widow even allowed to make jokes?) Looking at widowhood through the prism of race, mixed marriage, and aging, *Black Widow* redefines the stages of grief, from coffin shopping to day-drinking, to being a grown-ass woman crying for your mommy, to breaking up and making up with God, to facing the fact that life goes on even after the death of the person you were supposed to live it with. While she stumbles toward an uncertain future as a single mother raising a baby with her own widowed mother (plot twist!), Leslie looks back on her love story with Scott, recounting their journey through racism, religious differences, and persistent confusion about what kugel is. Will she find the strength to finish the most important thing that she and Scott started? Tender, true, and endearingly hilarious, *Black Widow* is a story about the power of love, and how the only guide book for recovery is the one you write yourself.

Who won the first Daytona 500? Fans still debate whether it was midwestern champion Johnny Beauchamp, declared the victor at the finish line, or longtime NASCAR driver Lee Petty, declared the official winner a few days after the race. *The Ghosts of NASCAR* puts the controversial finish under a microscope. Author John Havick interviewed scores of people, analyzed film of the race, and pored over newspaper accounts of the event. He uses this information and his deep knowledge of the sport as it worked then to determine what probably happened. But he also tells a much bigger story: the story of how Johnny Beauchamp—and his Harlan, Iowa, compatriots, mechanic Dale Swanson and driver Tiny Lund—ended up in Florida driving in the 1959 Daytona race. *The Ghosts of NASCAR* details how the Harlan Boys turned to racing cars to have fun and to escape the limited opportunities for poor boys in rural southwestern Iowa. As auto racing became more popular and better organized in the 1950s, Swanson, Lund, and Beauchamp battled dozens of rivals and came to dominate

the sport in the Midwest. By the later part of the decade, the three men were ready to take on the competition in the South's growing NASCAR circuit. One of the top mechanics of the day, Swanson literally wrote the book on race cars at Chevrolet's clandestine racing shop in Atlanta, Georgia, while Beauchamp and Lund proved themselves worthy competitors. It all came to a head on the brand-new Daytona track in 1959. The Harlan Boys' long careers and midwestern racing in general have largely faded from memory. The Ghosts of NASCAR recaptures it all: how they negotiated the corners on dirt tracks and passed or spun out their opponents; how officials tore down cars after races to make sure they conformed to track rules; the mix of violence and camaraderie among fierce competitors; and the struggles to organize and regulate the sport. One of very few accounts of 1950s midwestern stock car racing, The Ghosts of NASCAR is told by a man who was there during the sport's earliest days.

When writing a historical novel which reaches into the future, it is important to select a setting the reader can associate with and achieves a sense of reality. Now, is it possible for the United States of America following in the steps of decline as seen by other great Nations? One can ask how it could possibly happen here as well. Could a case be made even in our own history that the steps toward grandeur or decline are never far apart in reality? Pessimists express the fear we are in the final stages of the 'American Century' and we may be close to such a self inflicted end - if it came, it would have to be self inflicted. Much of our American history is the extended history of western civilizations. Yes, we can imagine ancient grandeurs of the Chinese Dynasties, India, Japan, Central America, Egypt or even some mystical societies in the deepest of Africa, yet our current cultural world was formed in little more than the past two thousand years. The most dramatic ones were roughly the last two hundred years. Once power shifted from Greece and the Roman Empire, World history was driven by Western Europe and the spread of Christianity. During the dark ages Islam emerged and reached its zenith during the Middle Ages, only to regress back to what many claim its founding ages. Islam must receive credit for much of the Greek and Indian derived knowledge it preserved for posterity, but we must also recognize it failed to build on this knowledge and it destroyed much of what it could not assimilate. Much bloody conquest was also undertaken in the name of Christianity and shall always be a reminder of where we have been. For roughly three centuries Europe suffered through untold hardships of Nationality driven wars and collectively committed unspeakable human disasters. Slavery existed through most of the recorded history and was ended in western societies less than two hundred years ago, while in some regions of the world it seems to be an accepted practice still even today. While in the earlier history of Nation or Tribal formation wars were total and aimed to destroy an adversary and taking survivors into bondage, the inhumanity of 'man toward man' reached their lowest points during the past century with the deliberate destruction of untold human beings. The Soviet Union's revolution and the deliberate mass starvation of the Ukraine and the multi-million killings in Mao's Cultural Revolution in China stand out. Yet the bottom was reached in cold blooded mass exterminations in Germany of Germans

with a different Faith and this happened but years after Germany was perceived to be the most civilized of Nations. Yet during these three centuries of European strive, Western Europeans pioneers were the first to permanently colonize the North American Continent. In the drive toward establishing permanent settlements, the actions toward natives and the importation of the enslaved followed along the pattern established in the 'Old World', but in the time during this strive the concept of equality and freedom arose. The Declaration of Independence, the Constitution of the United States of America and the Bill of Rights ushered in a 'New World' of Freedom unknown before. The achievement of these ideals was not instantaneously but evolved over time and in the face of often strenuous opposition. During now it's well over two hundred year existence this great democracy was the beacon to untold millions rushing to its shore to build new lives in freedom and toward prosperity, while at times some also came to destroy this very same concept. This Nation demonstrated its stability through wars, famine, disasters, internal strife and direct terrorist attacks of unspeakable magnitude, but in its democratic principles never wavered. With no reasonable external thread that would cede the survivability of the adversary, is the vision bequeathed to us by our Founding Fathers strong enough to handle internal strives as well to ensure survival of their vision? This Nation was born in Revolution, survived its Civil War, the Great Depression, the 9/11 Terror attack, but could it lose its Freedom in a silent revolution through the overthrow of its elected Government? The danger is never far away and could come from least expected corners; as we shall read.

Terrorism and Homeland Security

When in 2013 he first published a report on the active presence of Al-Qaeda in South Africa, all hell broke loose for investigative reporter De Wet Potgieter. He was forced to retract before a second, substantiating article could be published. Then the massacre at Westgate Mall hit Nairobi, which made the involvement of the so-called White Widow - operating on a legitimate but illegally acquired South African passport - front-page news. Suddenly the world's media was beating a path to

Potgieter's door. Now, for the first time, he tells the full unsettling story of Al-Qaeda's presence in this country. Not only is the veil lifted from this mysterious British woman, but the identity of another is disclosed: an Afrikaans-speaking counter-terrorist operative known as the Black Widow. The book shows how, taking advantage of corrupt state machinery, Al-Qaeda factions launch attacks in other countries. It discloses the location of a terrorist training camp in the Karoo and reveals disturbing details of the support they receive from various local extremist groups. Based on investigations spanning two years, *Black Widow White Widow* paints a frightening picture of the all too real possibility of future attacks from, or on, South African soil.
