Break The Chain

Tailored Skirts / Woman's Institute of Domestic Arts & Sciences, by Mary Brooks Picken. - From the original of 1916. Mary Brooks Picken (1886-1981) was an American author of 96 books on needlework, sewing, and textile arts. Her Fashion Dictionary, published by Funk and Wagnalls in 1957, is the first dictionary in the English language to be published by a woman. This book gives detailed instructions for making tailored skirts (including circular and gored) as well as the all-important inside stay belt, plackets, and several types of hem treatments. She founded the Woman's Institute of Domestic Arts and Sciences in Scranton, Pennsylvania. An expert on fashion, Picken was an authority on dress, fabric, design, and sewing. She taught "Economics of Fashion" at Columbia University and was one of the five founding directors of the Metropolitan Museum of Art's Costume Institute. She was the first woman to be named a trustee of the State University of New York's Fashion Institute of Technology, by Thomas E. Dewey, the Governor of New York, in 1951. She was a member of the National Academy of Sciences National Research Council's Advisory Committee on Women's Clothing, which selected Hattie Carnegie as the designer of the United States Army's women's uniform and provided advice and assistance on all elements of the U.S. Army's women's uniform beginning in 1949. Picken was one of the founders of the

Fashion Group, now the Fashion Group International, a nonprofit professional association. She also served as chairman of its board.

The authors demonstrate the process of translating coherent thinking into coherent grammar, with attention to all parts of speech, verb tenses and moods. Examples of proper sentence construction deal with simple, compound, and complex sentences, and demonstrate agreement in number, correct sequence of tenses, and more. Other topics covered include punctuation, vocabulary building, and writing style. Exercises with answers appear throughout the text. Barron's continues its ongoing project of updating, improving, and giving handsome new designs to its popular list of Easy Way titles, now re-named Barron's E-Z Series. The new cover designs reflect the books' brand-new page layouts, which feature extensive two-color treatment, a fresh, modern typeface, and more graphic material than ever. Charts, graphs, diagrams, instructive line illustrations, and where appropriate, amusing cartoons help to make learning E-Z. Barron's E-Z books are self-teaching manuals focused to improve students' grades across a wide array of academic and practical subjects. For most subjects, the skill level ranges between senior high school and college-101 standards. In addition to their self-teaching value, these books are also widely used as textbooks or textbook supplements in classroom settings. E-Z books review their subjects in detail, using both short quizzes and longer tests to help students gauge their learning progress. All exercises and tests come with answers. Subject heads and key phrases are set in a second color as an easy reference aid.

Feminism and the Politics of Travel After the Enlightenment

The Birth of Christ

Taking the Enlightenment and the feminist tradition to which it gave rise as its historical and philosophical coordinates, *Feminism and the Politics of Travel After the Enlightenment* explores the coincidence of feminist vindications and travel in the late eighteenth and nineteenth centuries, the way travel's utopian dimension and feminism's utopian ideals have intermittently fed off each other in productive ways. Travel's gender politics is analyzed in the works of J.-J. Rousseau, Mary Wollstonecraft, Stéphanie-Félicité de Genlis, Germaine de Staël, Frances Burney, Flora Tristan, Suzanne Voilquin, Gustave Flaubert, George Sand, Robyn Davidson, and Sara Wheeler.

Preface to the Second Edition

GRABBING A GOLDEN DREAM WITH GOLDEN GLOVES Does boxing teach anything besides how to club someone into submission? Can it transcend its sordid reputation and instill love, compassion and honor in Americas most troubled kids? In this raw yet uplifting memoir about amateur boxing, author Peter Wood tells of his begrudging return to a world he thought hed left behind. He steps back into the mud of boxing, coaching two troubled teens who dreamas he once didof becoming Golden Gloves champions.His compelling story moves far beyond the grunt and sweat of the local gym. It explores the classrooms of a suburban high school and digs through the remains of unhappy childhoods. Its a story about how boxing is a way out, and how it cleanses the soul.This book brings the subculture of amateur boxing up close and weaves a powerful story of redemption, beating demons and battling for glory.

Hard copy: The United States is destroying itself from the inside out. The Corruption of America is a kind of moral decay a kind of greedy kind of desperate grasp for power. And it's destroying our nation. These corruptions do not need to exist. If individual Americans take it upon themselves to become better citizens, act with rational self-interest, and reject the "ethos of getting yours" we can correct these corruptions. That's why Stansberry Research founder Porter Stansberry published *America 2020: The Survival Blueprint*. Many are referring to it as the most valuable book in America. "I love the book; it is so clear and concise. Though I have studied a bit about the smartest way to survive what is coming, this put all the best ideas together in one place! My hat is off to you guys!" - J.R. "Absolutely excellent book!! I need to buy another 12 for my family and friends." - K.B. "I read it the first day I had it. It is a great book that explains our current situation simply and very accurately. I intend to continue to use this book as a guide for investing and I will recommend it to my family and friends." - L.R. "This is a story all Americans should know about. I don't usually buy things off the Internet, but I am extremely glad that I made an exception in this case." - C.R.

Where Do Diggers Sleep at Night?

This book takes a pragmatic approach to deploying state-of-the-art optical networking equipment in metro-core and backbone networks. The book is oriented towards practical implementation of optical network design. Algorithms and methodologies related to routing, regeneration, wavelength assignment, sub rate-traffic grooming and protection are presented, with an emphasis on optical-bypass-enabled (or all-optical) networks. The author has emphasized the economics of optical networking, with a full chapter of economic studies that offer guidelines as to when and how optical-bypass technology should be deployed. This new edition contains: new chapter on dynamic optical networking and a new chapter on flexible/elastic optical networks. Expanded coverage of new physical-layer technology (e.g., coherent detection) and its impact on network design and enhanced coverage of ROADM architectures and properties, including colorless, directionless, contentionless and gridless. Covers 'hot' topics, such as Software Defined Networking and energy efficiency, algorithmic advancements and techniques, especially in the area of impairment-aware routing and wavelength assignment. Provides more illustrative examples of concepts are provided, using three reference networks (the topology files for the networks are provided on a web site, for further studies by the reader). Also exercises have been added at the end of the chapters to enhance the book's utility as a course textbook.

At the start of World War, II the U.S. Army turned to Americans of Japanese ancestry to provide vital intelligence against Japanese forces in the Pacific. Nisei Linguists: Japanese Americans in the Military Intelligence Service during World War II tells the story of these soldiers, how the Military Intelligence Service (MIS) recruited and trained them, and how they served in every battle and campaign in the war against Japan. Months before Pearl Harbor, the Western Defense Command (WDC) selected sixty Nisei soldiers for Japanese-language training. When the WDC

forcibly removed more than 100,000 persons of Japanese ancestry from the West Coast, MIS continued to recruit Nisei from the relocation camps and later from Hawaii. Over the next four years, the school graduated nearly 6,000 military linguists, including dozens of Nisei women and hundreds of Caucasians. Nisei Linguists tells the remarkable story of those who served with Army and Marine units from Guadalcanal to the Philippines, Iwo Jima, and Okinawa. Their duties included translation, interrogation, radio monitoring, and psychological warfare. They staffed theater-level intelligence centers such as the Allied Translator and Interpreter Section in the Southwest Pacific Area. In China, Burma, and India they served with the Office of Strategic Services, Merrill's Marauders, and Commonwealth forces. Others served with the Army Air Forces or within the continental United States. At war's end, the Nisei facilitated local surrenders of Japanese forces as well as the occupation. Working in military government, war crimes trials, censorship, and counterintelligence, the MIS Nisei contributed to the occupation's ultimate success.

Comprehensive and up-to-date, the text integrates major construction management topics with an explanation of the methods of heavy/highway and building construction. It incorporates both customary U.S. units and metric (SI) units and is the only text to present concrete formwork design equations and procedures using both measurement systems. This edition features information on new construction technology, the latest developments in soil and asphalt compaction, the latest developments in wood preservation and major health, safety and environmental concerns. Explains latest developments in soil and asphalt compaction. Presents the latest developments in wood preservation materials and techniques which respond to environmental concerns. Expanded and updated coverage of construction safety and major health hazards and precautions. Designed to guide construction engineers and managers in planning, estimating, and directing construction operations safely and effectively.

Ecological Informatics is defined as the design and application of computational techniques for ecological analysis, synthesis, forecasting and management. The book provides an introduction to the scope, concepts and techniques of this newly emerging discipline. It illustrates numerous applications of Ecological Informatics for stream systems, river systems, freshwater lakes and marine systems as well as image recognition at micro and macro scale. Case studies focus on applications of artificial neural networks, genetic algorithms, fuzzy logic and adaptive agents to current ecological management issues such as toxic algal blooms, eutrophication, habitat degradation, conservation of biodiversity and sustainable fishery.
