In his loft in New York City's Greenwich Village, Sifu Shi Yan Ming trains men and women of all ages, body types and backgrounds in the fundamentals of kung fu. A 34th generation Shaolin Warrior monk from China's Shaolin Temple—the birthplace of Chan Buddhism and the mecca of all martial arts—Yan Ming teaches the students at his USA Shaolin Temple that there is no better workout program than his brand of kung fu for getting the body and mind into warrior condition. Lavishly illustrated with hundreds of four-color photographs, the warrior workout, distills a lifetime of Shaolin training and wisdom into a 28-day workout. The Shaolin Workout is a complete-onto-itself program of both fitness and spiritual lessons can be applied to every aspect of one's life: work, relationships, family. Achieve the lean, fit look of a professional athlete in just twelve weeks with this straightforward fitness plan. New studies are confirming what Paul Goldberg has already observed in his high-profile clients: getting leaner—not just thinner—is the single most important change that we can make to feel and look our best. What many Americans struggle with today is known as normal weight obesity: normal body weight, but high body-fat percentage, which can lead to serious health problems. Now Goldberg has developed an effective plan to lower body fat by eating the right foods and building muscle. The twelve-week Lean Look program requires no fancy equipment, takes thirty minutes a day, six days a week, and can easily be done at home. Goldberg shows how to add foods to your diet that promote muscle development, cut back on foods that encourage fat storage, time your meals for optimal nutrition, and exercise to burn fat. With over 100 photographs, a Lean Look journal, body-fat tables, and a four-week meal plan, The Lean Look is a straightforward guide to getting the sculpted, athletic body you've always wanted.

Women's Health Lift to Get Lean

"The Drillmaster of Valley Forge-Baron Von Steuben-correctly noted in his "Blue Book" how physical conditioning and health (which he found woefully missing when he joined Washington's camp) would always be directly linked to individual and unit discipline, courage in the fight, and victory on the battlefield. That remains true today. Even an amateur historian, choosing any study on the performance of units in combat, quickly discovers how the levels of conditioning and physical performance of Soldiers is directly proportional to success or failure in the field. In this monograph, Dr. Whitfield "Chip" East provides a pragmatic history of physical readiness training in our Army. He tells us we initially mirrored the professional Armies of Europe as they prepared their forces for war on the continent. Then he introduces us to some master trainers, and shows us how they initiated an American brand of physical conditioning when our forces were found lacking in the early wars of the last century. Finally, he shows us how we have and must incorporate science (even when there exists considerable debate!) to contribute to what we do-and how we do it-in shaping today's Army. Dr. East provides the history, the analysis, and the pragmatism, and all of it is geared to understanding how our Army has and must train Soldiers for the physical demands of combat. Our culture is becoming increasingly "unfit," due to poor nutrition, a lack of adequate and formal exercise, and too much technology. Still, the Soldiers who come to our Army from our society will be asked to fight in increasingly complex and demanding conflicts, and they must be prepared through new, unique, and scientifically based techniques. So while Dr. East's monograph is a fascinating history, it is also a required call for all leaders to better understand the science and the art of physical preparation for the battlefield. It was and is important for us to get this area of training right, because getting it right means a better chance for success in combat.

Turn on fat-burning hormones with a special 1-day-per-week workout system and a controlled-calorie eating plan Anyone who desperately wants to lose 10 to 50 or more pounds but just can't find the time to exercise three, four, five times a week is going to love The Body-Fat Breakthrough. It requires is just one, 20-minute resistance training workout a week using negative (or eccentric) training, the little-known weightlifting technique used by bodybuilders to trigger fast muscle growth and burn more fat. Legendary fitness researcher Ellington Darden, PhD, put 115 overweight men and women on this workout program and achieved remarkable results, which are illustrated in the book through 20 inspiring before and after photographs. Many test subjects lost significant weight while gaining muscle. Some lost 30, 40, even more than 50 pounds in as many days and transformed their bodies and their health. Negative training is just one of 10 "FAT BOMBS" demonstrated in the book. These action steps combine to produce fast body transformations. Other FAT BOMBS include: A unique meal plan in which the bulk of calories come from carbohydrates (50% carbs; 25% protein; 25% fat), offering readers an appealing new way to lose weight without sacrifice Drinking a gallon of cold water a day to stay full and hydrated, and to boost calorie burn through thermogenesis Evening after-dinner walks to accelerate body heat, triggering increased fat loss

A Historical Review and Analysis of Army Physical Readiness Training and Assessment

Fitness expert Adam Zickerman presents a revolutionary exercise program - slow strength training - that will forever change the way people work out. The Power of 10 seems to contradict nearly everything we're accustomed to hearing about exercise. Forget hours on the treadmill, and forget daily visits to the gym. This new program offers 20 minute workout sessions, once or twice per week, with an alluring emphasis on rest and recovery on your days off. The principle behind The Power of 10 is simple: by lifting weights in slow motion, making each rep last 20 seconds (10 seconds lifting and 10 seconds lowering) instead of the typical 7 seconds, you can maximize muscle transformation. The short workouts are so effective that your body will need days to recover and repair properly. Studies have shown that such routines can increase lean body mass, help burn calories more efficiently, and prevent cardio-vascular disease more effectively than aerobic exercise alone.

Research shows that building muscle helps the body burn more calories 24/7 and that resistance training is the most effective way to torch body fat. Yet that message is still lost on many women who fear that weight lifting will make them bulky, turn their skin green, and give them Incredible Hulk muscles like their boyfriends'. Women have more options than step aerobics or running on a treadmill to shed pounds: They can weight-train in a very specific manner designed to make the most of a woman's unique physiology. Lift to Get Lean is the first beginner's guide to strength training from Women's Health that is written specifically for women by a woman. Holly Perkins is a certified strength and conditioning specialist (CSCS) who has been teaching the fat-burning secrets of weight training exclusively to women for more than 20 years. Perkins doesn't follow men's rules when it comes to building muscle. Lift to Get Lean delivers a three-step system: Technique, Movement Speed, and the Last 2 Reps Rule, which make all the difference in developing the kind of strong, lean, and sexy body women want. Perkins offers four different 90-day training programs that efficiently build functional strength along with leaner legs, stronger arms, and a sexier butt.

Exercise researcher and author Ellington Darden has studied exercise and fat loss for more than 40 years. Interspersed with success stories and before-and-after photos of previous participants, Killing Fat will teach you a revolutionary new way to lose weight and keep it off.

The best-selling bariatric cookbook, with more than 125 low-carb, low-fat, high-protein recipes for patients to enjoy after weight-loss surgery. In April 2003 Patt Levine underwent "Lap-Band" gastric surgery, one of the primary bariatric surgeries being widely practiced today. As a lifelong foodie, she was expecting the worst when her surgeon's nutritionist handed her dietary guidelines to follow post-surgery, and she was right. With her decades of cooking skills, she immediately set out to devise low-fat dishes that would be just as delicious pureed and chopped as they would be served whole. As an added problem, she wanted to cook for her husband at the same time. This first-ever cookbook for the hundreds of thousands who are lining up for bariatric bypass surgery is proof that it can be done. With collaborator Michele Bontempo-Saray, the author has created 125 recipes that contain no added sugar, are very low in fat, and get their carbohydrates almost exclusively from fruits and vegetables. Each recipe includes specific guidelines for preparation of the dish for every stage of the eating programs for Lap-Band, gastric bypass, and Biliopancreatic Diversion Duodenal Switch (BPD-DS) patients, as well

as suggestions for sharing meals with those who have not gone through gastric surgery. Creative recipes cover every meal and food-breakfast and brunch, soups, vegetables, main courses, and sweet indulgences.

Smarter decision-making based on cognitive science AlphaBrain is the investor's guide to achieving more, doing better, and reaching higher. At its core, the magnitude of your success is based on the quality of your decisions. The problem is that human beings are poor decision-makers; we tend to approach problems after they arise instead of planning for them in advance. We put too much weight on instinct, belief, and "gut feeling." We make the same mistakes over and over again—so reliably, in fact, that cognitive science can accurately predict exactly which mistakes we'll make and when. This book offers a way to understand and plan for the human mind's usual tendencies to help you make smarter investment decisions. Using a framework based on cognitive research, you'll learn how to approach decisions objectively, systematically, and constantly review your process; you'll take action based on evidence instead of intuition, and get ahead of potential problems before they get the best of you. With so much riding on the correctness of your choices, natural tendency can be a dangerous thing. This book shows you how to remove the bias and emotion to start making choices backed by hard evidence and objective data and lower your stress. Shift your processes from reactive to proactive Base decisions on reality over belief Eliminate cognitive bias and reduce common mistakes Make better decisions with a systematic, objective approach Why do we begin managing risk only once it becomes apparent? Why do we react to the market instead of making the big decisions before emotion takes over? Investing has always been a largely reactive field, but those who dominate it approach decision-making less like a human and more like a machine. AlphaBrain shows you how to get real about investing, with cognitive techniques that lead to smarter, evidence-based decisions.
