## **Ten Forty Handbook**

Modern Construction Handbook has become a modern classic of building construction literature. In the USA, it is used as a reference work for many architectural courses. With the chapters "Material", "Wall", "Roof", "Structure", "Environment" and "Applications" it systematically explores the subject and provides a clear and efficient structure to the reader. For the fourth edition, many of the 3D illustrations have been updated and, likewise, the technical information has been brought up to date. "Applications" showcases current developments, such as those relating to mass customization manufacture of components, and presents material and construction innovations. A compact and systematic handbook filled with information, produced for students and young architects alike.

Over the past 20 years, energy conservation imperatives, the use of computer based design aids, and major advances in intelligent management systems for buildings have transformed the design and operation of comfort systems for buildings. The "rules of thumb" used by designers in the 1970s are no longer viable. Today, building systems engineers must have a strong analytical basis for design synthesis processes. But how can you develop this basis? Do you have on your shelf a reference that describes all the latest methods? Does it cover everything from the fundamentals to state-of-the-art, intelligent systems? Does it do so in practical way that you can easily access and use when you need to? The Handbook of Heating, Ventilation, and Air Conditioning does. It combines practice and theory, systems and control, and the latest methods and technologies to provide, in one volume, all of the modern design and operation information needed by HVAC engineers. The Handbook of Heating, Ventilation, and Air Conditioning will stay up-to-date while other resources become outmoded and go through lengthy revision and reprint processes. Through a link on the CRC Web site, owners of the Handbook can access new material periodically posted by the author.
