The future of liberal education in the United States, in its current form, is fraught but full of possibility. Today's institutions are struggling to maintain viability, sustain revenue, and assert value in the face of rising costs. But we should not abandon the model of pragmatic liberal learning that has made America's colleges and universities the envy of the world. Instead, *Redesigning Liberal Education* argues, we owe it to students to reform liberal education in ways that put broad and measurable student learning as the highest priority. Written by experts in higher education, the book is organized into two sections. The first section focuses on innovations at 13 institutions: Brown University, College of the Holy Cross, Connecticut College, Elon University, Florida International University, George Mason University, Georgetown University, Lasell College, Northeastern University, Rollins College, Smith College, Susquehanna University, and the University of Wisconsin–Green Bay. Chapters about these institutions consider the vast spectrum of opportunities and challenges currently faced by students, faculty, staff, and administrators, while also offering "radical visions" of the future of liberal education in the United States. Accompanying vision chapters written by some of the foremost leaders in higher education touch on a wide array of subjects and themes, from artificial intelligence and machines to the role that human dispositions, mindsets, resilience, and time play in how we guide students to ideas for bringing playful concepts of creativity and openness into our work. Ultimately, *Redesigning Liberal Education* reveals how humanizing forces, including critical

thinking, collaboration, cross-cultural competencies, resilience, and empathy, can help drive our world. This uplifting collection is a celebration of the innovative work being done to achieve the promise of a valuable, engaging, and practical undergraduate liberal education. Isis Artze-Vega, Denise S. Claiming America

Dear Scott, Dearest Zelda

The Pulitzer Prize-winning epic of the Great Depression, a book that galvanized—and sometimes outraged—millions of readers. First published in 1939, Steinbeck's Pulitzer Prize-winning epic of the Great Depression chronicles the Dust Bowl migration of the 1930s and tells the story of one Oklahoma farm family, the Joads—driven from their homestead and forced to travel west to the promised land of California. Out of their trials and their repeated collisions against the hard realities of an America divided into Haves and Have-Nots evolves a drama that is intensely human yet majestic in its scale and moral vision, elemental yet plainspoken, tragic but ultimately stirring in its human dignity. A portrait of the conflict between the powerful and the powerless, of one man's fierce reaction to injustice, and of one woman's stoical strength, the novel captures the horrors of the Great Depression and probes into the very nature of equality and justice in America. At once a naturalistic epic, captivity narrative, road novel, and transcendental gospel, Steinbeck's powerful landmark novel is perhaps the most American of American Classics. This Centennial edition, specially designed to commemorate one hundred years of Steinbeck, features french flaps and deckle-edged pages. For more than sixty-five years, Penguin has been the leading publisher of classic literature in the English-speaking world. With more than 1,500 titles, Penguin Classics represents a global bookshelf of the best works throughout history and across genres and disciplines. Readers trust the series to provide

The Grapes of Wrath

Since the election of Scott Walker, Wisconsin has been seen as ground zero for debates about the appropriate role of government in the wake of the Great Recession. In a time of rising inequality, Walker not only survived a bitterly contested recall that brought thousands of protesters to Capitol Square, he was subsequently reelected. How could this happen? How is it that the very people who stand to benefit from strong government services not only vote against the candidates who support those services but are vehemently against the very idea of big government? With *The Politics of Resentment*, Katherine J. Cramer uncovers an oft-overlooked piece of the puzzle: rural political consciousness and the resentment of the "liberal elite." Rural voters are distrustful that politicians will respect the distinct values of their communities and allocate a fair share of resources. What can look like disagreements about basic political principles are therefore actually rooted in something even more fundamental: who we are as people and how closely a candidate's social identity matches our own. Using Scott Walker and Wisconsin's prominent and protracted debate about the appropriate role of government, Cramer illuminates the contours of rural consciousness,

showing how place-based identities profoundly influence how people understand politics, regardless of whether urban politicians and their supporters really do shortchange or look down on those living in the country. The Politics of Resentment shows that rural resentment—no less than partisanship, race, or class—plays a major role in dividing America against itself.

Born out of the Civil Rights and Third World Liberation movements of the 1960s and 1970s, Asian American Studies has grown significantly over the past four decades, both as a distinct field of inquiry and as a potent site of critique. Characterized by transnational, trans-Pacific, and trans-hemispheric considerations of race, ethnicity, migration, immigration, gender, sexuality, and class, this multidisciplinary field engages with a set of concepts profoundly shaped by past and present histories of racialization and social formation. The keywords included in this collection are central to social sciences, humanities, and cultural studies and reflect the ways in which Asian American Studies has transformed scholarly discourses, research agendas, and pedagogical frameworks. Spanning multiple histories, numerous migrations, and diverse populations, Keywords for Asian American Studies reconsiders and recalibrates the ever-shifting borders of Asian American studies as a distinctly interdisciplinary field. An eye-opening look at the invisible workers who protect us from seeing humanity's worst on today's commercial internet Social media on the internet can be a nightmarish place. A primary shield against hateful language, violent videos, and online cruelty uploaded by users is not an algorithm. It is people. Mostly invisible by design, more than 100,000 commercial content moderators evaluate posts on mainstream social media platforms: enforcing internal policies, training artificial intelligence systems, and actively screening and removing offensive material--sometimes thousands of items per day. Sarah T. Roberts, an award-winning social media scholar, offers the first extensive ethnographic study of the commercial content moderation industry. Based on interviews with workers from Silicon Valley to the Philippines, at boutique firms and at major social media companies, she contextualizes this hidden industry and examines the emotional toll it takes on its workers.
