The Cambridge Primary Review Research Surveys is the outcome of the Cambridge Primary Review – England's biggest enquiry into primary education for over forty years. Fully independent of government, it was launched in 2006 to investigate the

condition and future of primary education at a time of change and uncertainty and after two decades of almost uninterrupted reform. Ranging over ten broad themes and drawing on a vast array of evidence, the Review published thirty-one interim reports, including twenty-eight surveys of published research, provoking media headlines and public debate, before presenting its final report and recommendations. This book brings together the twenty-eight research surveys, specially commissioned from sixty-five leading academics in the areas under scrutiny and now revised and updated, to create what is probably the most comprehensive overview and evaluation of research in primary education yet published. A particular feature is the prominence given to international and comparative perspectives. With an introduction from Robin Alexander, the Review's director, the book is divided into eight sections, covering: children's lives and voices: school, home and community children's development, learning, diversity and needs aims, values and contexts for primary education the structure and content of primary education outcomes, standards and assessment in primary education teaching in primary schools: structures and processes teaching in primary schools: training, development and workforce reform policy frameworks: governance, funding, reform and quality assurance. The Cambridge Primary Review Research Surveys is an essential reference tool for professionals, researchers, students and policy-makers working in the fields of early years, primary and secondary education.

Mathematics Revision Guide: IGCSE

Cambridge Primary English is a flexible, endorsed course written specifically to

support Cambridge International Examinations' curriculum framework (Stages 1-6). The resources are aimed at first language English learners, encouraging them to actively explore, use and apply their core listening, speaking, reading and writing skills through individual, pair and group work. Engaging activities provide opportunities for differentiated learning and promote creativity and critical thinking. Lively international fiction, non-fiction and poetry texts are the basis for teaching reading and writing skills, including comprehension, grammar, punctuation, phonics, spelling and handwriting. Learners also practise their spoken English to build vocabulary and confidence through class and group discussion. Each stage contains three core components (Learner's Book, Activity Book, and Teacher's Resource Book with accompanying CD-ROM) which are fully integrated and offer a complete solution to teaching Cambridge Primary English. Also available are Phonics Workbooks A and B, providing an essential foundation in phonics skills.

Hodder Cambridge Primary English: Work Book Stage 1

'Children, Their World, Their Education' is more than a ground-breaking report. It is an unrivalled educational compendium. It assesses two decades of government-led reform. It offers a vision for the future. It goes to the heart of what education in a democracy is about.

The Annual Report

What lessons can we learn from the relationship between policy-makers and schools over the life of the 'New' Labour and its predecessor Conservative government? What happened to 'Education, Education, Education' as it travelled from political vision to classroom practice? What are the lasting legacies of 13 years of a reforming Labour government? And what are the key messages for a coalition government? These are the questions addressed to the architects of educational reform, their critics and the prophets of better things to come. The 37 interviewees include ministers past and present, journalists, union officials, members of lobby groups and think tanks. Reinventing Schools, Reforming Teaching considers the impact of educational policies on those who have to translate political priorities into the day to day work of schools and classrooms. The authors argue that an evidence-informed view of policy-making has yet to be realised, graphically illustrating how many recent political decisions in education can be explained by the personal experiences, predilections and short-term needs of key decision-makers. The interviews, which explore the dynamics behind the creation of education policies, cover a wide range of themes and issues, including: policy-makers' attitudes to schools, the staff who work in them and the communities they serve the drivers of politicians' reform agendas and the constraints on radical reform the shaping and reshaping of curriculum and assessment the search for a more effective marriage between inspection and

school self evaluation the relationship of academic research to policy making how a vision for teaching and teachers might be constructed for the 21st century Contributions from leading figures including; David Puttnam, Kenneth Baker, Estelle Morris, Gillian Shepherd, Jim Knight, Pauline Perry, Michael Barber, Peter Mortimore, Judy Sebba, Paul Black, Mary James, Kevan Collins, David Hargreaves, Mike Tomlinson, David Berliner, Andreas Schleicher, Tim Brighouse, Conor Ryan, Keith Bartley, Michael Gove and Philippa Cordingley are woven in with the insights of teachers and headteachers such as Alasdair MacDonald and William Atkinson. The book's findings and proposals will be of interest not only to professional educators and those with an interest in the current and future state of education but to those interested in the process of policy-making itself.
