In this 2004 book, Professor Amerasinghe examines the local remedies rule in terms of both historical and modern international law. He considers both the customary international law as well as the application of the rule to, among others, human rights protection and international organizations. Material includes bilateral investment treaties and state contracts. The law is dealt with in the light of state practice and the jurisprudence of international courts and tribunals. The book also ventures into important areas such as the incidence of the rule, limitations, the burden of proof and the application of the rule to procedural remedies, in which the law is less clear. It adheres to the requirements of juristic exposition and analysis where the law has been determined, but at the same time Amerasinghe offers criticisms and suggestions for improving the law in the light of modern policy considerations.

Recommendation CM/Rec(2012)11 on the role of public prosecutors outside the criminal justice system complements Recommendation Rec(2000)19 on the role of public prosecution in the criminal justice system which was adopted in autumn 2000. Together these two recommendations set European standards for prosecutorial activities with a comprehensive set of principles defining the status, powers and practice of the public prosecution service for all areas of law in a modern democratic State. Whatever the nature of their responsibilities, whether they be criminal, civil, administrative law or other, it behooves public prosecutors to carry them out in full accordance with the rule of law, human rights and other principles which are fundamental to all democratic societies. This recommendation draws upon a number of sources as well as on the practice of the prosecution services of many Council of Europe member States that enjoy extensive powers outside the criminal justice system. A report, prepared in 2008 at the request of the Consultative Council of European Prosecutors (CCPE) of the Council of Europe, not only illustrated the diversity among legal systems but also showed that public prosecutors in most of the Council of Europe's 47 member States are vested with duties that extend

beyond the criminal justice system of their countries. Such powers are based on the various branches of law, with the aim of protecting the public interest as well as the rights and legitimate interests of individuals, especially members of socially vulnerable population groups. Overall, the recommendation represents a step forward in strengthening the protection of human rights and fundamental freedoms, as the manner in which public prosecutors exercise their role, inside and outside the criminal justice system, is crucial to the protection of these rights and freedoms.

Derived from the renowned multi-volume International Encyclopaedia of Laws, this book provides a practical analysis of criminal law in Serbia. An introduction presents the necessary background information about the framework and sources of the criminal justice system, and then proceeds to a detailed examination of the grounds for criminal liability, the justification of criminal offences, the defences that diminish or excuse criminal liability, the classification of criminal offences, and the sanctions system. Coverage of criminal procedure focuses on the organization of investigations, pre-trial proceedings, trial stage, and legal remedies. A final part describes the execution of sentences and orders, the prison system, and the extinction of custodial sanctions or sentences. Its succinct yet scholarly nature, as well as the practical quality of the information it provides, make this book a valuable resource for criminal lawyers, prosecutors, law enforcement officers, and criminal court judges handling cases connected with Serbia. Academics and researchers, as well as the various international organizations in the field, will welcome this very useful guide, and will appreciate its value in the study of comparative criminal law.

This timely work seeks to identify the differences between the domestic procedural rules and principles of an array of EU and non-EU countries and analyse them in the context of European Union law requirements. Specific attention is paid to the impact of State aid rules on procedural law in tax matters, on constitutional law requirements as well as tax treaty law issues. Since customs law is already harmonized in the form of the Community Customs Code, it serves as a starting point to examine the extent to which harmonized procedural law is possible. Harmonized procedural law is also discussed in the context of a possible future Common Consolidated Corporate Tax Base as well as an EU tax levied at the European Union level.

This collection presents a comparative analysis of the principle of effective legal protection in administrative law in Europe. It examines how European states consider and enforce the related requirements in their domestic administrative law. The book is divided into three parts: the first comprises a theoretical introductory chapter along with perspectives from International and European Law; part two presents 15 individual country reports on the principle of effective legal protection in mostly EU member states. The core function of the reports is to provide an analysis of the domestic instruments and procedures. Adopting a contextual approach, they consider the historical, political and legal circumstances as well as analysing the relevant case law of the domestic courts; the third part provides a comparative analysis of the country reports. The final chapter assesses the influence and relevance of EU law and the ECHR. The book thus identifies the most important trends and makes a valuable contribution to the debate around convergence and divergence in European national administrative systems.
