The Little Book of Restorative Justice

Acclaimed as one of the most exciting books in the history of American letters, this modern epic became an instant bestseller upon publication in 1974, transforming a generation and continuing to inspire millions. This 25th Anniversary Quill Edition features a new introduction by the author; important typographical changes; and a Reader's Guide that includes discussion topics, an interview with the author, and letters and documents detailing how this extraordinary book came to be. A narration of a summer motorcycle trip undertaken by a father and his son, the book becomes a personal and philosophical odyssey into fundamental questions of how to live. The narrator's relationship with his son leads to a powerful self-reckoning; the craft of motorcycle maintenance leads to an austere but beautiful process for reconciling science, religion, and humanism. Resonant with the confusions of existence, *Zen and the Art of Motorcycle Maintenance* is a touching and transcendent book of life.

Ethics for the New Millennium

Students and teachers of Chinese history and philosophy will not want to miss Daniel Gardner's accessible translation of the teachings of Chu Hsi (1130-1200) a luminary of the Confucian tradition who dominated Chinese intellectual life for centuries. Homing in on a primary concern of our own time, Gardner focuses on Chu Hsi's passionate interest in education and its importance to individual development. For hundreds of years, every literate person in China was familiar with Chu Hsi's teachings. They informed the curricula of private academies and public schools and became the basis of the state's prestigious civil service examinations. Nor was Chu's influence limited to China. In Korea and Japan as well, his teachings defined the terms of scholarly debate and served as the foundation for state ideology. Chu Hsi was convinced that through education anyone could learn to be fully moral and thus travel the road to sagehood. Throughout his life, he struggled with the philosophical questions underlying education: What should people learn? How should they go about learning? What enables them to learn? What are the aims and the effects of learning? Part One of "Learning to Be a Sage" examines Chu Hsi's views on learning and how he arrived at them. Part Two presents a translation of the chapters devoted to learning in the "Conversations of Master Chu."

Love and Other Thought Experiments

Legal ethics is often described as an oxymoron or contradiction in terms - lay people find the concept amusing and lawyers can find ethics impossible. The best lawyers are those who have come to grips with their own values and actively seek to improve their ethical practise. This book is designed to help law students and new lawyers understand and modify their own ethical priorities, not just because this knowledge makes it easier to practise law and earn an income, but because self-aware, ethical legal practice is right and feels better than anything else. Packed with case studies of ethical scandals and dilemmas from real life legal practice in Australia, each chapter delves into the most difficult issues lawyers face. From lawyers' part in corporate fraud to the ethics of time-based billing, Parker and Evans expose the values that underlie current practice and set out the alternatives ethical lawyers might follow.

By the People

Hailed as “lucid and magisterial” by The Observer, this book is universally acclaimed as the outstanding one-volume work on the subject of Western philosophy. Considered to be one of the most important philosophical works of all time, the History of Western Philosophy is a dazzlingly unique exploration of the ideologies of significant philosophers throughout the ages—from Plato and Aristotle through to Spinoza, Kant and the twentieth century. Written by a man who changed the history of philosophy himself, this is an account that has never been rivaled since its first publication over sixty years ago. Since its first publication in 1945, Lord Russell’s A History of Western Philosophy is still unparalleled in its comprehensiveness, its clarity, its erudition, its grace, and its wit. In seventy-six chapters he traces philosophy from the rise of Greek civilization to the emergence of logical analysis in the twentieth century. Among the philosophers considered are: Pythagoras, Heraclitus, Parmenides, Empedocles, Anaxagoras, the Atomists, Protagoras, Socrates, Plato, Aristotle, the Cynics, the Sceptics, the Epicureans, the Stoics, Plotinus, Ambrose, Jerome, Augustine, Benedict, Gregory the Great, John the Scot, Aquinas, Duns Scotus, William of Occam, Machiavelli, Erasmus, More, Bacon, Hobbes, Descartes, Spinoza, Leibniz, Locke, Berkeley, Hume, Rousseau, Kant, Hegel, Schopenhauer, Nietzsche, the Utilitarians, Marx, Bergson, James, Dewey, and lastly the philosophers with whom Lord Russell himself is most closely associated—Cantor, Frege, and Whitehead, coauthor with Russell of the monumental Principia Mathematica.

Ibn Tufayl's Hayy Ibn Yaqzān

Three narratives, set in the fifth, fourteenth, and twentieth centuries, all revolving around an ancient text and each with a love story at its centre, are the elements of this brilliantly ingenious novel, a follow-up to the international bestseller An Instance of the Fingerpost. Now Ian Pears returns with a greatly anticipated novel, so expertly imagined and perfectly constructed the author himself describes it as “a complexity.” The centuries are the 5th (the final days of the Roman Empire); the 14th (the years of the Plague — the Black Death); and the 20th (World War II). The setting for each is the same — Provence — and each has at its heart a love story.

The narratives intertwine seamlessly, and what joins them thematically is an ancient text — “The Dream of Scipio” — a work of neo-Platonism that poses timeless philosophical questions. What is the obligation of the individual in a society under siege? What is the role of learning when civilization itself is threatened, whether by acts of man or nature? Does virtue lie more in engagement or in neutrality? “Power without wisdom is tyranny; wisdom without power is pointless,” warns one of Pears’s characters. The Dream of Scipio is a bona fide novel of ideas, a dazzling feat of storytelling, fiction for our times.

Breaking Stalin's Nose

Originally published in German in 1936, *The Natural Law* is the first work to clarify the differences between traditional natural law as represented in the writings of Cicero, Aquinas, and Hooker and the revolutionary doctrines of natural rights espoused by Hobbes, Locke, and Rousseau. Beginning with the legacies of Greek and Roman life and thought, Rommen traces the natural law tradition to its displacement by legal positivism and concludes with what the author calls “the reappearance” of natural law thought in more recent times. In seven chapters each Rommen explores “The History of the Idea of Natural Law” and “The Philosophy and Content of the Natural Law.” In his introduction, Russell Hittinger places Rommen’s work in the context of contemporary debate on the relevance of natural law to philosophical inquiry and constitutional interpretation. Heinrich Rommen (1897–1967) taught in Germany and England before concluding his distinguished scholarly career at Georgetown University. Russell Hittinger is William K. Warren Professor of Catholic Studies and Research Professor of Law at the University of Tulsa.

An Introduction to Medieval Philosophy

As an increasingly polarized America fights over the legacy of racism, Susan Neiman, author of the contemporary philosophical classic *Evil in Modern Thought*, asks what we can learn from the Germans about confronting the evils of the past. In the wake of white nationalist attacks, the ongoing debate over reparations, and the controversy surrounding Confederate monuments and the contested memories they evoke, Susan Neiman’s *Learning from the Germans* delivers an urgently needed perspective on how a country can come to terms with its historical wrongdoings. Neiman is a white woman who came of age in the civil rights-era South and a Jewish woman who has spent much of her adult life in Berlin. Working from this unique perspective, she combines philosophical reflection, personal stories, and interviews with both Americans and Germans who are grappling with the evils of their own national histories. Through discussions with Germans, including Jan Philipp Reemtsma, who created the breakthrough *Crimes of the Wehrmacht* exhibit, and Friedrich Schorlemmer, the East German dissident preacher, Neiman tells the story of the long and difficult path Germans faced in their effort to atone for the crimes of the Holocaust. In the United States, she interviews James Meredith about his battle for equality in Mississippi and Bryan

Stevenson about his monument to the victims of lynching, as well as lesser-known social justice activists in the South, to provide a compelling picture of the work contemporary Americans are doing to confront our violent history. In clear and gripping prose, Neiman urges us to consider the nuanced forms that evil can assume, so that we can recognize and avoid them in the future.

The Four Loves

Harold Bloom explores our Western literary tradition by concentrating on the works of twenty-six authors central to the Canon. He argues against ideology in literary criticism; he laments the loss of intellectual and aesthetic standards; he deplores multiculturalism, Marxism, feminism, neoconservatism, Afro-centrism, and the New Historicism.

Conformity and Conflict

In the preface to *A Contribution to the Critique of Political Economy*, published in Berlin, 1859, Karl Marx relates how the two of us in Brussels in the year 1845 set about: "to work out in common the opposition of our view" -- the materialist conception of history which was elaborated mainly by Marx -- "to the ideological view of German philosophy, in fact, to settle accounts with our erstwhile philosophical conscience. The resolve was carried out in the form of a criticism of post-Hegelian philosophy. The manuscript, two large octavo volumes, had long reached its place of publication in Westphalia when we received the news that altered circumstances did not allow of its being printed. We abandoned the manuscript to the gnawing criticism of the mice all the more willingly as we had achieved our main purpose -- self-clarification!" Since then more than 40 years have elapsed and Marx died without either of us having had an opportunity of returning to the subject. We have expressed ourselves in various places regarding our relation to Hegel, but nowhere in a comprehensive, connected account. To Feuerbach, who after all in many respects forms an intermediate link between Hegelian philosophy and our conception, we never returned.

Classic Philosophical Questions

Discourses on Livy is the founding document of modern republicanism, and Harvey C. Mansfield and Nathan Tarcov have provided the definitive English translation of this classic work. Faithful to the original Italian text, properly attentive to Machiavelli's idiom and subtlety of thought, it is eminently readable. With a substantial introduction, extensive explanatory notes, a glossary of key words, and an annotated index, the Discourses reveals Machiavelli's radical vision of a new science of politics, a vision of "new modes and orders" that continue to shape the modern ethos. "[Machiavelli] found in Livy the means to inspire scholars for five centuries. Within the Discourses, often hidden and sometimes unintended by their author, lie the seeds of modern political thought. . . . [Mansfield and Tarcov's] translation is careful and idiomatic."—Peter Stothard, *The Times* "Translated with painstaking accuracy—but also great readability."—*Weekly Standard* "A model of contemporary scholarship and a brave effort at Machiavelli translation that allows the great Florentine to speak in his own voice."—Choice

The Norton Field Guide to Writing with Handbook

For thirty years, Peter Singer's *Practical Ethics* has been the classic introduction to applied ethics. For this third edition, the author has revised and updated all the chapters and added a new chapter addressing climate change, one of the most important ethical challenges of our generation. Some of the questions discussed in this book concern our daily lives. Is it ethical to buy luxuries when others do not have enough to eat? Should we buy meat from intensively reared animals? Am I doing something wrong if my carbon footprint is above the global average? Other questions confront us as concerned citizens: equality and discrimination on the grounds of race or sex; abortion, the use of embryos for research and euthanasia; political violence and terrorism; and the preservation of our planet's environment. This book's lucid style and provocative arguments make it an ideal text for university courses and for anyone willing to think about how she or he ought to live.

Learning from the Germans

Comprehensive coverage of classic and contemporary approaches to argument, including Aristotle, Toulmin, and a range of alternative views, making it a versatile text. Readings on contemporary controversies (including the purpose of a college education, immigration, a peacetime draft, and obesity) and classic philosophical questions (such as, "How free is the will of the individual?") are sure to spark student interest and lively discussion and writing. Refined through seven previous editions, it has been revised to address current student interests and trends in argument, research, and writing, and has been updated with compelling new topics and readings and more on analyzing visuals and presenting oral arguments.

Inside Lawyers' Ethics

Howard Zehr is the father of Restorative Justice and is known worldwide for his pioneering work in transforming understandings of justice. Here he proposes workable principles and practices for making Restorative Justice possible in this revised and updated edition of his bestselling, seminal book on the movement. (The original edition has sold more than 110,000 copies.) Restorative Justice, with its emphasis on identifying the justice needs of everyone involved in a crime, is a worldwide movement of growing influence that is helping victims and communities heal, while holding criminals accountable for their actions. This is not soft-on-crime, feel-good philosophy, but rather a concrete effort to bring justice and healing to everyone involved in a crime. In *The Little Book of Restorative Justice*, Zehr first explores how restorative justice is different from criminal justice. Then, before letting those appealing observations drift out of reach into theoretical space, Zehr presents Restorative Justice practices. Zehr undertakes a massive and complex subject and puts it in graspable form, without reducing or trivializing it. This resource is also suitable for academic classes and workshops, for conferences and trainings, as well as for the layperson interested in understanding this innovative and influential movement.

The Natural Law

The science fiction genre maintains a remarkable hold on the imagination and enthusiasm of the filmgoing public, captivating large audiences worldwide and garnering ever-larger profits. Science fiction films entertain the possibility of time travel and extraterrestrial visitation and imaginatively transport us to worlds transformed by modern science and technology. They also provide a medium through which questions about personal identity, moral agency, artificial consciousness, and other categories of experience can be addressed. In *The Philosophy of Science Fiction Film*, distinguished authors explore the storylines, conflicts, and themes of fifteen science fiction film classics, from *Metropolis* to *The Matrix*. Editor Steven M. Sanders and a group of outstanding scholars in philosophy, film studies, and other fields raise science fiction film criticism to a new level by penetrating the surface of the films to expose the underlying philosophical arguments, ethical perspectives, and metaphysical views. Sanders's introduction presents an overview and evaluation of each essay and poses questions for readers to consider as they think about the films under discussion. The first section, "Enigmas of Identity and Agency," deals with the nature of humanity as it is portrayed in *Blade Runner*, *Dark City*, *Frankenstein*, *Invasion of the Body Snatchers*, and *Total Recall*. In the second section, "Extraterrestrial Visitation, Time Travel, and Artificial Intelligence," contributors discuss *2001: A Space Odyssey*, *The Terminator*, *12 Monkeys*, and *The Day the Earth Stood Still* and analyze the challenges of artificial intelligence, the paradoxes of time travel, and the ethics of war. The final section, "Brave Newer World: Science Fiction Futurism," looks at visions of the future in *Metropolis*, *The Matrix*, *Alphaville*, and screen adaptations of George Orwell's 1984.

John Buridan

In a storytelling approach that weaves contemporary examples together with historical context, *By the People* explores the themes and ideas that drive the great debates in American government and politics. It introduces students to big

questions like: Who governs? How does our system of government work? What does government do? and Who are we? By challenging students with these questions, the text gets them to think about, engage with, and debate the merits of U.S. government and politics. Ideal for professors who prefer a shorter text, *By the People, Brief Second Edition*, condenses the content of the comprehensive edition while also preserving its essential insights, organization, and approach.

The Western Canon

John Buridan (ca. 1300-1361) was the most famous philosophy teacher of his time, and probably the most influential. In this important new book, Jack Zupko offers the first systematic exposition of Buridan's thought to appear in any language. Zupko uses Buridan's own conception of the order and practice of philosophy to depict the most salient features of his thought, beginning with his views on the nature of language and logic and then illustrating their application to a series of topics in metaphysics, natural philosophy, and ethics. Part 1 of *John Buridan* considers the picture of language and logic developed in Buridan's *Summulae de dialectica*. Buridan systematically overhauled the logic he first learned and later taught at the University of Paris, redeeming the older tradition of Aristotelian logic in terms, propositions, and arguments. This made possible newer and more powerful forms of philosophical discourse. The second part of this volume provides a reading of Buridan's philosophy, showing how this discourse shaped his treatment of speculative questions such as the relation between soul and body, the nature of knowledge, the proper subject of psychology, the function of the
