Judging Evil

From the big cities to dense forests to disasters at sea, authors Michael Sasser and Charles W. Sasser present some of the toughest cases and most harrowing missions faced by arson investigators. A brutal inferno snuffs out the lives of eighty-seven at the Happy Land Social Club in New York City The Branch Davidians torch their compound in Waco, Texas, killing eighty-one men, women and children... Flames engulf the streets of Detroit on its deadliest Devil's Day... In each case, some of America's most intrepid detectives were on the case, seeking out the truth amid the ashes. Here are the toughest cases from real arson investigators—men and women who apply steely determination and extraordinary skills in the pursuit of one goal: to catch scheming profiteers, vicious vandals, and diabolical pyromaniacs. Where the untrained eye sees nothing but destruction, these investigators see clues—and they plunge undaunted into the charred debris of destroyed buildings and incinerated lives to seek them out. From big cities to dense forests to disasters at sea, they bring one vow to

every case: to never let justice go up in smoke.

Cowboys, Cops, Killers, and Ghosts

Sophie Katz has just offered a man \$12,000 for his services... Is she desperate or just meshugeneh? Considering the kind of disasters that usually befall the half-black, half-Jewish mystery writer, probably both. Because the last time Sophie saw sexy P.I. Anatoly Darinsky, he practically danced a jig when she waved goodbye—a normal reaction for a man who'd nearly bought the farm trying to protect her from her own foolishness. What are the chances he'd agree to take incriminating pictures of her sister's philandering husband? Or that he'd let her tag along—you know...for research? But when her brother-in-law turns up dead and her sister becomes the prime suspect, Sophie's priority is finding the real killer. With or without Anatoly's help. Her brother-in-law's secret life yields plenty of suspects, but the San Francisco police aren't taking any of them seriously. So Sophie does what comes naturally to her: she stirs up trouble (to lure the killer out, of course). But if her crazy plan works, will Anatoly be there to protect her this time?

Affection and Trust

NOTE FROM THE AUTHOR I have a head full of information, not all of which is useful. It bothers me that the lyrics for Yummy, Yummy, Yummy, I've Got Love in My Tummy are taking up room that could be occupied by something more life-relevant. Still, I've often found myself the person people come to when they want to know something, but aren't sure where to find it, and I enjoy providing that service. Quora is a great outlet for people like me. I stumbled on the site a little more than a year ago, and almost 600 answered questions later, there's enough material for a book. Law enforcement is a passion for me, not for the power trip or the adrenaline rush, but because it can be a truly noble vocation when done right. People depend on law enforcement officers to protect them from predators, see that the bad guys are held to account for their acts, and establish order out of chaos. The authority that cops have is a sacred public trust. Most officers carry out their duties proudly and honorably, but there will always be a few who abuse that trust. The short essays here are about both sides of that issue. These answers are also about separating some of the myths of police work from the reality. There have been so many dramatic depictions of law enforcement, some of them very realistic and others that seem realistic, that people tend to believe they know how cops work and why they do what they do. Here, I've tried to give you the straight scoop, knowledge accumulated from my own experience and from knowing cops from all over the country and the world. Some of it isn't flattering, but otherwise it wouldn't be honest. I hope you enjoy and benefit from these insights into police work. Tim Dees EXCERPT FROM THE BOOK Is It TRUE That Parking Patrol Officers Can NOT Stop Writing A Ticket Once They Have Started? Some agencies do in fact have a policy that an officer, police, parking or otherwise, can't discard a citation once they have started writing it. Virtually all of them have some process for voiding a citation issued in error once the

citation has been issued, but this process is carefully monitored to prevent abuse. Absent a monitored process, the system is easily manipulated. Someone makes a call to a person in the police department who has influence, and that person contacts the officer who issued the ticket. They persuade the officer to void the ticket. If the voided ticket appears to be correct in format, e.g. license plate matches the vehicle description, violation is appropriate for that location, etc. then whoever is in charge of reviewing the voided citations is supposed to follow up and find out if the citation was voided for a legitimate reason or as a favor to someone. Most of the time, when the issuing officer has started the citation form (and many of them are generated via handheld computer these days) and the violator runs up and asks them to stop, the violation is legitimate, and the officer has already looked around for the driver of the vehicle. The typical complaint is "but I was just gone for a minute" (which may or may not be true). In any event, there is seldom a provision in the law for parking there for a minute—you aren't supposed to park there at all. So, in short, it's usually true that the officer is not supposed to stop once they have begun issuing the citation. Buy the book to read more!

The Truth About Cops: A Retired Police Officer's Answers to All Your Burning Questions

This Publication of the Texas Folklore Society has something for everyone. The first section features a good bit of occupational lore, including articles on cowboys—both legendary ones and the relatively unknown men who worked their trade day by day wherever they could. You'll also find a unique, personal look at a famous outlaw and learn about a teacher's passion for encouraging her students to discover their own family culture, as well as unusual weddings, somewhat questionable ways to fish, and one woman's love affair with a bull. The backbone of the PTFS series has always been miscellanies—diverse examinations of the many types of lore found throughout Texas and the Southwest. These books offer a glimpse of what goes on at our annual meetings, as the best of the papers presented are frequently selected for our publications. Of course, the presentations are only a part of what the Society does at the meetings, but reading these publications offers insight into our members' interests in everything from bikers and pioneers of Tejana music to serial killers and simple folk from small-town Texas. These works also suggest the importance of the "telling of the tale," with an emphasis on oral tradition, as well as some of the customs we share. All of these things together—the focus on tradition at our meetings, the fellowship among members, and the diversity of our research—are what sustain the Texas Folklore

Society.

Putting Your Passion Into Print

Why do killers deserve punishment? How should the law decide? These are the questions Samuel H. Pillsbury seeks to answer in this important new book on the theory and practice of criminal responsibility. In an argument both traditional and fresh, Pillsbury holds that persons deserve punishment according to the evil they choose to do, regardless of their psychological capacities. Using real case examples, he offers concrete proposals for legal reform, urging that modern preoccupations with subjective aspects of wrongdoing be replaced with rules that focus more on the individual's motives.

In this collection, published for the first time, we follow Harry S. Truman and Dean Acheson, two giants of the post-World War II period, as they move from an official relationship to one of candor, humor, and personal expression. In these letters, spanning the years from when both were newly out of office until Acheson's death at age 78, we find them sharing the often surprising opinions, ideas, and feelings that the strictures of their offices had previously kept them from revealing. They felt a powerful need to keep in touch as they viewed with dismay what they considered to be the Eisenhower administration's

fumbling of foreign affairs and the impact of Joseph McCarthy. After Kennedy won in 1960, they discussed Acheson's reluctant involvement in the Cuban missile crisis and the Allied position in Berlin--From publisher description.

Cops and Constables

How to Write a Damn Good Novel, II

Opening with a powerful letter to former Tacoma police chief David Brame, who shot his estranged wife before turning the gun on himself, Norm Stamper introduces us to the violent, secret world of domestic abuse that cops must not only navigate, but which some also perpetrate. Former chief of the Seattle police force, Stamper goes on to expose a troubling culture of racism, sexism, and homophobia that is still pervasive within the twenty-first-century force; then he explores how such prejudices can be addressed. He reveals the dangers and temptations that cops face, describing in gripping detail the

split-second life-and-death decisions. Stamper draws on lessons learned to make powerful arguments for drug decriminalization, abolition of the death penalty, and radically revised approaches to prostitution and gun control. He offers penetrating insights into the "blue wall of silence," police undercover work, and what it means to kill a man. And, Stamper gives his personal account of the World Trade organization debacle of 1999, when protests he was in charge of controlling turned violent in the streets of Seattle. *Breaking Rank* reveals Norm Stamper as a brave man, a pioneering public servant whose extraordinary life has been dedicated to the service of his community.

Fire Cops

"They're library dogs, Charlie. They're all dog-faces," laughed the space station manager, as he waved goodnight to his security dogs and locked the gates. "They're not just dogs with jobs, but detective canines with investigative sniffing careers at the space station and in outer space." At night, the space station's library is eerie, dim lighted, and in places, simply velvet-shadow dark, except for the human's dogs. They mingle with the shape-shifting immortal space dogs that prowl the space station library's corridors and live among the rows of computers. Career dogs just want to have fun traveling onboard the space shuttles as working companion dogs, never locked behind gates. These dogs don't bite. They are dogs with purpose and passion. This is a team of working dogs that can shape-shift from dog to human and human to dog live outside of time. And in this century, they work for a mother and daughter astronaut team. "Which dog sprayed wolf graffiti on the space shuttle?" A ground controller dog, a mellow, Chocolate Labrador retriever, studied the photo. "But how did it get there?" "Maybe it's a paste-on tattoo that the astronauts put on board to celebrate all those years here," the pack leader howled in a licorice-sweet yelp. The omega canine hurried to switch off another computer. 'Retriever,' formerly a "library greeter dog" but now the ground controller's pet, sniffed with curiosity. He stretched and curled up on top of the filing cabinet.

Crimes of Passion

This is a book about scholarship in the broadest sense. The writing of this book has shown how through scholarship we can bring together academics, practitioners, scientists, radio logists, and administrators from around the world to begin the kinds of conversations that promise to move us to a new way of thinking about and enacting radiology education. Over the past century, we have witnessed tremendous change in biomedical science and the scope of this change has demanded new approaches to medical education. The most significant of the changes in medical education has been a fundamental paradigm shift from a teacher-centered approach to a student-centered approach. This shift, c- bined with the explosion of knowledge, has pressed medical schools to undertake major curricular and institutional reform. At the same time, progress in medical education research methods has led to innovative approaches to support the improvement of learning methods and evaluation. Over the past several years there has also been a shift toward thinking about and planning for medical education beyond the undergraduate level to include postgraduate and continuing medical education, but also to consider learning within the professional environment and the development of professional continuous education. Viewing medical education as a continuum that spans from the first year of medical school until retirement introduces new ways to conceptualize the teaching and learning needs that address lifelong learning demands that extend over 30 or 40 years.
