### A Liverpool Girl

Callie Valentine Jones can't think of a better way to check out of her personal Heartbreak Hotel than to accept her cousin Lovie's timely invite to get away in Cozumel, where her brainy beau is digging up bones for research. But the moment Callie and her loyal good luck charm Elvis arrive, trouble greets them in the form of a skeleton too fresh to be ancient history and too dead to spell anything but homicide. Suspicious minds blame ghosts and gods, but Callie knows the guilty party is all too human--and for once, she's determined not to get involved. That determination flies right out the window when Lovie and Elvis go missing. It's now or never, if Callie wants to save her cousin and her canine from someone who's got murder always on his mind. "Prepare to laugh out loud." --Library Journal

### An Aviator's Field Book

Mrs Paws is the creation of Christine Gregory, and through a short series of stories, her antics and adventures with her and her friends come to light. On the door of a small room within the cottage of Mr and Mrs Gregory is a quaint little sign that reads 'Enchanted Teddy and Dolly Sanctuary', so called because there's something quite magical behind this door. It came as such a shock to Mrs Gregory when she realised that her cuddlesome bear, along with some of her friends, actually came to life. So read on and find out just what they get up to in this cosy little cottage, the mystical wood and, of course, the fairy garden, but be sure not to tell anyone, this is your very own secret.

This is the story of Worcestershire's First World War. Using letters, diaries and journals made at the time, the book draws together the vast array of experiences from Worcestershire locals to build up a comprehensive picture of how the county experienced the war. It explores among other things the role of Worcestershire's women in wartime, the local regiment fighting in the Middle East and Worcestershire's huge impact on the development of the medical profession during this period. The First World War was not just about the Tommy fighting in the trenches some had a very different experience. Arthur Pepper was a pilot before being shot down and becoming a prisoner of war, and his story is told, along with those of a Navy rating, an Army chaplain and a conscientious objector. The Home Front and everyday life is also considered, with the hardships of food production and the Women's Land Army. This remarkable collection of voices gives a unique insight into this county's First World War.

## **Fetish Girl**

Tatenda Taibu's first autobiography is his complete life story: from his uncompromising upbringing in the township of Highfield, Harare, to becoming the youngest international cricket captain in history, to quitting the game that made him at the age of 29 to pursue his faith. In this revealing tome, Taibu lifts the lid on the challenges of representing Zimbabwe in the era of Robert Mugabe, and details how constant controversy and conflict ultimately restrict meaningful progress.

## **Memoirs of a Mule Rider**

This book introduces the reader to both neurolinguistics per se and the neuropsychological aspects of bilingualism. Neurolinguistics may roughly be defined as a subset of neuropsychology, namely the study of the representation and

processing of language in the brain. To this effect, the first chapters of the book focus on the basic neuropsychology of language processing and acquisition. The second half of the book addresses the issues of cerebral representation and processing of language in bi-or multilingual subjects. All aspects are systematically dealt with, namely the definition of bilingualism; an analysis of all the issues related to bilingual aphasia, i.e. patterns of recovery of the patients' various languages in diverse population; an investigation of the methodologies used in the study of the neuropsychological aspects of the various linguistic functions, such as comprehension, production and translation; and lastly, the issues of cerebral lateralization and neuroanatomical localization of the numerous cortical and subcortical structures subserving the various language system components in multilingual subjects. It is an excellent introduction to both the neuropsychology of language and the phenomena related to bilingualism. This book will be of particular interest to students of language therapy, aphasiology, applied psycholinguistics, neurolinguistics and, in general, to students of medicine who wish to become more knowledgeable about the specific needs of patients in a multilingual society.

## **Polymer Processing**

This volume creates a bridge across cognitive development and cognitive aging. Pairs of researchers study the rise and fall of specific cognitive functions, such as attention, executive functioning, memory, working memory, representations, language, problem solving, intelligence, and individual differences to find ways in which the study of development and decline converge on common processes and mechanisms. The contributed chapters are framed by an introduction that sets out the problems to be discussed and a conclusion that extracts the common themes and speculates on the implications for theory building. The book is unique in offering a lifespan approach to cognition by experts in the individual facts of cognitive functioning from either the developmental or the aging perspective.

## **A Murderer's Game**

Many years have now passed since the greatest period of European dominance by any English football club came to an end. Between 1977 and 1984, Liverpool won the European Cup an unprecedented four times and established themselves as the number-one team in Europe. It was during the successful European Cup campaigns of 1981 and 1984 that the unlikely figure of Alan Kennedy came to dominate the headlines. Folk-hero left-back Alan Kennedy - nicknamed 'Barney Rubble' by

fans after The Flintstones character due to his straightforward, no-frills approach to the game - scored the winning goal in the 1981 European Cup final against Real Madrid, as well as the nerve-twanging winning shoot-out penalty against AS Roma in 1984, a feat which secured his position in European football history. Kennedy's Way examines Kennedy's footballing career under manager Bob Paisley (and, later, under Joe Fagan) and provides a retrospective account of Liverpool's dominance during those years. Drawing on Kennedy's memories of the period, as well as those of other players and backroom staff involved with the Reds at that time, it is an irreverent, revealing account of the dressing-room culture at the club while it was at the height of its powers. The book concludes with reflections on Kennedy's post-playing life and on the trajectory of Liverpool since the Heysel and Hillsborough tragedies, in 1985 and 1989 respectively, right up to recent events at the club, including the exit of Gerard Houllier and the team's dramatic return to the pinnacle of European club football under new manager Rafael Benitez.

A telephone message is left at a chess club, instructing one of its members, insurance agent William Wallace, to meet a Mr. Qualtrough. But the address given by the mystery caller does not exist, so Wallace returns home--only to find his wife Julia has been bludgeoned to death. The case turns on the telephone call. Who made it? The police thought it was Wallace, creating an alibi that might have come straight from an Agatha Christie thriller. Others believe Wallace innocent but disagree on the identity of the murderer. This Cold Case Jury book recreates the unsolved crime in an evocative and compelling way, presents fresh evidence, exposes the strengths and weaknesses of past evidence, and then asks the reader to decide what happened in one of the most celebrated cold cases of all time.

The broad and developing scope of ergonomics - the application of scientific knowledge to improve people's interaction with products, systems and environments - has been illustrated over the past 15 years by the books which make up the Contemporary Ergonomics series. Presenting the proceedings of the Ergonomics Society's annual conference, the series embraces the wide range of topics covered by ergonomics. Individual papers provide insight into current practice, present new research findings and form an invaluable reference source. The volumes provide a fast track for the publication of suitable papers from international contributors. These are chosen on the basis of abstracts submitted to a selection panel in the autumn prior to the Ergonomics Society's annual conference held in the spring.

There are several theories of executive function(s) that tend to share some theoretical overlap yet are also conceptually distinct, each bolstered by empirical data (Norman and Shallice, 1986; Shallice & Burgess, 1991; Stuss and Alexander, 2007; Burgess, Gilbert, & Dumentheil, 2007; Burgess & Shallice, 1996; Miyake et al., 2000). The notion that executive processes are supervisory, and most in demand in novel situations was an early conceptualization of executive function that has been adapted and refined over time (Norman & Shallice, 1986; Shallice, 2001; Burgess, Gilbert & Dumentheil, 2007). Presently there is general consensus that executive functions are multi-componential (Shallice, 2001), and are supervisory only in the sense that attention in one form or another is key to the co-ordination of other hierarchically organized 'lower' cognitive processes. Attention in this sense is defined as (i) independent but interrelated attentional control processes (Stuss & Alexander, 2007); (ii) automatic orientation towards stimuli in the environment or internally-driven thought (Burgess, Gilbert & Dumontheil, 2007); (iii) the automatically generated interface between tacit processes and strategic conscious thought (Barker, Andrade, Romanowski, Morton and Wasti, 2006; Morton and Barker, 2010); and (iv) distinct but interrelated executive processes that maintain, update and switch across different sources of information (Miyake et al., 2000). One problem is that executive dysfunction or dysexecutive syndrome (Baddeley & Wilson, 1988) after brain injury typically produces a constellation of deficits across social, cognate, emotional and motivational domains that rarely map neatly onto theoretical frameworks (Barker, Andrade & Romanowski, 2004). As a consequence there is debate that conceptual theories of executive function do not always correspond well to the clinical picture

(Manchester, Priestley & Jackson, 2004). Several studies have reported cases of individuals with frontal lobe pathology and impaired daily functioning despite having little detectable impairment on traditional tests of executive function (Shallice & Burgess, 1991; Eslinger & Damasio, 1985; Barker, Andrade & Romanowski, 2004; Andrés & Van der Linden, 2002; Chevignard et al., 2000; Cripe, 1998; Fortin, Godbout & Braun, 2003). There is also some suggestion that weak ecological validity limits predictive and clinical utility of many traditional measures of executive function (Burgess et al, 2006; Lamberts, Evans & Spikman, 2010; Barker, Morton, Morrison, McGuire, 2011). Complete elimination of environmental confounds runs the risk of generating results that cannot be generalized beyond constrained circumstances of the test environment (Barker, Andrade & Romanowski, 2004). Several researchers have concluded that a new approach is needed that is mindful of the needs of the clinician yet also informed by the academic debate and progress within the discipline (McFarquhar & Barker, 2012; Burgess et al., 2006). Finally, translational issues also confound executive function research across different disciplines (psychiatry, cognitive science, and developmental psychology) and across typically developing and clinical populations (including Autism Spectrum Disorders, Head Injury and Schizophrenia – Blakemore & Choudhury, 2006; Taylor, Barker, Heavey & McHale, 2013). Consequently, there is a need for unification of executive function approaches across disciplines and populations and narrowing of the conceptual gap between theoretical positions, clinical symptoms and measurement.

## **Elvis and the Tropical Double Trouble**

Misty memories of a boy born to a poor sharecropper in the worst economic depression the world has ever known come to life with dramatic clarity in this troubling memoir. Trapped into surviving on the pittance realized by his family for growing the deadly health killing tobacco plant, Jeff struggles to understand the societal contradictions that control his existence throughout the twentieth century. Imagination and dreamy fantasies fertilize larger hopes for him as he plows his father's lonely fields and wrestles with the arbitrary behavioral imperatives that control his life. Cruelly deprived of broad cultural stimulation, Jeff struggles to realize dreams fostered by Hollywood myths and pulp fiction. Plentiful food--a gift of the land--adequate housing and most of all, a pervasive love and caring concern by others sharing this community of poverty and hard work, not only are sustaining but give him sweet lasting memories of those hard times. Anger at deprivations endured by his parents fuel ambitions to escape a life growing the noxious crops of tobacco. Nourished by the love, warmth and generosity of a large extended family living a similar life, Jeff survives to engage the larger world where he encounters the many problems that befall allhuman beings.

It can be stated with some justification that polymers, because of their mainly synthetic origins, are important because of their applications, perhaps more than in the case of more familiar and conventional materials such as metals and wood, which would exist apart from their use in human activities. The majority of polymers have been synthesized under the impetus of requirements for new and improved properties. The preparative routes to new polymers and blends, and the exploration of their structures and properties constitute absorbing subjects for study, but it is the final application of these materials in real, commercial products that provides the driving force for such developments. In recent years a number of excellent books have appeared which deal with the chemistry, structure, properties and engineering aspects of polymers. The processing of polymers, as products of the chemical industry, into engineering and consumer goods has received much less attention. There are some valuable texts for individual processes, especially the extrusion and injection moulding of thermoplastics, but others are less well served. This book provided a review of all the important processing routes for transforming polymers into products.

'Did you kill Lynsey?' 'Wait and find out. Wait and find out.' Southport, Christmas 1998. Young mother of two Lynsey Quy disappears without a trace. The police believe she is dead. Her husband Mitchell is their prime suspect but there is no evidence of a murder. Mitchell Quy embarks on an eighteen-month-long campaign of national publicity and self-promotion. He tells the world that Lynsey is alive, that he is an innocent man wrongly accused, a good father abandoned by his wife. Southport holds its breath, awaits the truth. When it finally emerges, this truth is darker than anyone ever imagined. 'A Murderer's Game' is the true story of a highly unusual criminal investigation and the consequences of a terrible crime. It is also a meditation on the community in which this crime took place, a town that helped shape the lives of the people involved, a place of secrecy and the obscured.

## **The Official History of the UK Strategic Nuclear Deterrent**

Volume II of The Official History of the UK Strategic Nuclear Deterrent provides an authoritative and in-depth examination of the British government's strategic nuclear policy from 1964 to 1970. Written with full access to the UK documentary record, Volume II examines the controversies that developed over nuclear policy following the arrival in office of a Labour government led by Harold Wilson in October 1964 that openly questioned the independence of the deterrent. Having decided to preserve the Polaris programme, Labour ministers were nevertheless committed not to develop another generation of nuclear weapons beyond those in the pipeline, placing major doubts over the long-term future of the nuclear programme and collaboration with the United States. Defence planners also became increasingly concerned that the deployment of Soviet anti-ballistic missile (ABM) defences around Moscow threatened to undermine the ability of Polaris to fulfil its role as a national strategic nuclear deterrent. During 1967, under heavy pressures to control defence spending, a protracted debate was conducted within Whitehall over the future of Polaris and how to respond to the evolving ABM challenge. The volume concludes with Labour's defeat at the general election of June 1970, by which time the Royal Navy had assumed the nuclear deterrent role from the RAF, and plans had already been formulated for a UK project to improve Polaris which could both ensure its continuing credibility and rejuvenate the Anglo-American nuclear relationship. This book will be of much interest to students of British politics, Cold War history, nuclear proliferation and international relations.

### **Function**

An unassuming book, still one of those which grip the reader from beginning to end. When the author started to write his daily impressions and adventures, it was to keep in touch with his people, to quiet those who feared for his safety every moment, and at the same time to give them a clear idea of his life. Without boasting, modestly and naturally, he describes the adventures of an aviator in the great World War.
