Helps researchers in proteomics and oncology work together to understand, prevent, and cure cancer. Proteomic data is increasingly important to understanding the origin and progression of cancer; however, most oncologic researchers who depend on proteomics for their studies do not collect the data themselves. As a result, there is a knowledge gap between scientists, who devise proteomic techniques and collect the data, and the oncologic researchers, who are expected to interpret and apply proteomic data. Bridging the gap between proteomics and oncology research, this book explains how proteomic technology can be used to address some of the most important questions in cancer research. *Proteomic Applications in Cancer Detection and Discovery* enables readers to understand how proteomic data is acquired and analyzed and how it is interpreted. Author Timothy Veenstra has filled the book with examples—many based on his own firsthand research experience—that clearly demonstrate the application of proteomic technology in oncology research, including the discovery of novel biomarkers for different types of cancers. The book begins with a brief introduction to systems biology, explaining why cancer is a systems biology disease. Next, it covers such topics as: Mass spectrometry in cancer research Application of proteomics to global phosphorylation analysis Search for biomarkers in biofluids Rise and fall of proteomic patterns for cancer diagnostics Emergence of protein arrays Role of proteomics in personalized medicine The final chapter is dedicated to the future prospects of proteomics in cancer research. By guiding readers through the latest proteomic technologies and their applications in cancer research, *Proteomic Applications in Cancer Detection and Discovery* enhances the ability of researchers in proteomics and researchers in oncology to collaborate in order to better understand cancer and develop strategies to prevent and treat it.

Rosemary Sassoon alerts those involved in computer interface design that the skills of layout, spacing and typeface are equally vital in the construction of onscreen layouts as they are on the printed page. This second volume of *Computers and Typography* reflects the new developments in this rapidly-changing field. It complements, without in any way supplanting, Volume 1.

## **Humanity Has Lost Its Soul**

Throughout the last two decades, the flat-steel production industry has experienced great success with the introduction of new technologies and manufacturing advances for both hot and cold steel-rolling. These improvements are resulting in significantly reduced production costs and better product quality. Recent consolidation of the steel industry-

In the years following the Civil War, a veritable army of homeless men swept across America's "wageworkers' frontier" and forged a beguiling and bedeviling counterculture known as "hobohemia." Celebrating unfettered masculinity and jealously guarding the American road as the preserve of white manhood, hoboes took command of downtown districts and swaggered onto center stage of the new urban culture. Less obviously, perhaps, they also staked their own claims on the American polity, claims that would in fact transform the very entitlements of American citizenship. In this eye-opening work of American history, Todd DePastino tells the epic story of hobohemia's rise and fall, and crafts a stunning new interpretation of the "American century" in the process. Drawing on sources ranging from diaries, letters, and police reports to movies and memoirs, *Citizen Hobo* breathes life into the largely forgotten world of the road, but it also, crucially, shows how the hobo army so haunted the American body politic that it prompted the creation of an entirely new social order and political economy. DePastino shows how hoboes—with their reputation as dangers to civilization, sexual savages, and professional idlers—became a cultural and political force, influencing the creation of welfare state measures, the promotion of mass consumption, and the

suburbanization of America. Citizen Hobo's sweeping retelling of American nationhood in light of enduring struggles over "home" does more than chart the change from "homelessness" to "houselessness." In its breadth and scope, the book offers nothing less than an essential new context for thinking about Americans' struggles against inequality and alienation.

## **Atlas of Clinical Hematology**

Drawn from our best-selling anthology, *The Bedford Introduction to Literature, Literature to Go* is a brief and inexpensive collection of stories, poems, and plays supported by the superior instruction you expect from a Michael Meyer anthology. With literature from many periods, cultures, and diverse voices, the book is also a complete guide to close reading, critical thinking, and thoughtful writing about literature. The second edition features a new thematic chapter on our working lives and a new in-depth chapter on the fiction of Dagoberto Gilb, created in collaboration with the author himself—continuing the anthology's mission to present literature as a living, changing art form.

The controversial New York City police commissioner and New York Times bestselling author of *The Lost Son* shares the story of his fall from grace and the effects of his incarceration on his views of the American justice system. Bernard Kerik was New York City's police commissioner during the 9/11 attacks, and became an American hero as he led the NYPD through rescue and recovery efforts of the World Trade Center. His résumé as a public servant is long and storied, and includes receiving a Medal of Honor. In 2004, Kerik was nominated by George W. Bush to head the Department of Homeland Security. Now, he is a former Federal Prison Inmate known as #84888-054. Convicted of tax fraud and false statements in 2007, Kerik was sentenced to four years in federal prison. Now, for the first time, he talks candidly about what it was like on the inside: the torture of solitary confinement, the abuse of power, the mental and physical torment of being locked up in a cage, the powerlessness. With newfound perspective, Kerik makes a plea for change and illuminates why our punishment system doesn't always fit the crime. In this extraordinary memoir, Kerik reveals his unprecedented view of the American penal system from both sides: as the jailer and the jailed. With astonishing candor, bravery, and insider's intelligence, Bernard Kerik shares his fall from grace to incarceration, and turns it into a genuine and uniquely insightful argument for criminal justice reform.

Recent publications in food engineering concern mainly food process engineering, which is related to chemical engineering, and deals primarily with unit operations and unit processes, as applied to the wide variety of food processing operations. Relatively less attention is paid to the design and operation of food processing equipment, which is necessary to carry out all of the food processes in the food plant. Significant technical advances on processing equipment have been made by the manufacturers, as evidenced by the efficient modern food processing plants. There is a need to relate advances in process engineering to process equipment, and vice versa. This book is an attempt to apply the established principles of transport phenomena and unit operations to the design, selection, and operation of food processing equipment. Since food processing equipment is still designed empirically, due to the complexity of the processes and the uncertainty of food properties, description of some typical industrial units is necessary to understand the operating characteristics. Approximate values and data are used for illustrative purposes, since there is an understandable lack of published industrial data.

### **From Jailer to Jailed**

What would actually make America great: more people. If the most challenging crisis in living memory has shown us anything, it's that America has lost the will and the means to lead. We can't compete with the huge population clusters of the global marketplace by keeping our population static or letting it diminish, or with our crumbling transit and unaffordable housing. The winner in the future world is going to have more—more ideas, more ambition, more utilization of resources, more people. Exactly how many Americans do we need to win? According to Matthew Yglesias, one billion. From one of our foremost policy writers, *One Billion Americans* is the provocative yet logical argument that if we aren't moving forward, we're losing. Vox founder Yglesias invites us to think bigger, while taking the problems of decline seriously. What really contributes to national prosperity should not be controversial: supporting parents and children, welcoming immigrants and their contributions, and exploring creative policies that support growth—like more housing, better transportation, improved education, revitalized welfare, and climate change mitigation. Drawing on examples and solutions from around the world, Yglesias shows not only that we can do this, but why we must. Making the case for massive population growth with analytic rigor and imagination, *One Billion Americans* issues a radical but undeniable challenge: Why not do it all, and stay on top forever?

### **Introduction to Participatory Community Practice**

Why are the British so Euro-sceptic? Forget about tedious treaties, party politics or international relations. The real reason is that the British do not feel European. This book explores and explains the cultural divide between Britain and Europe, where it comes from and how it manifests itself in everyday life and the academic world.

### **Current Directions in Gender Psychology**

This uniquely illustrated handbook will find a wide audience, ranging from social work and community development students to beginning social service

practitioners and micro-level development professionals working with communities, especially in the Southern African context. An experienced team of authors unpacks the definition that people-centered community practice is a change and management process. This process is facilitated with a community of people to take action to increasingly actualize their fundamental human needs to enhance the quality of their own lives and those of the wider community that they are part of. The book's assets/strengths-based approach to community practice is consistent with fundamental social work values. This approach ensures that even beginners would work with communities in a respectful way so that communities would not be imposed upon or disempowered in the process. Since the approach is strongly grounded in theory, this equips facilitators with the basic knowledge to approach any community and facilitate any potential project. The authors - as tertiary educators, researchers, and facilitators - have richly harvested from their engagement with students, colleagues, and communities to write this user-friendly textbook.

A guide to building and modifying Tcl scripts to automate network administration tasks Streamline Cisco network administration and save time with Tcl scripting Cisco networking professionals are under relentless pressure to accomplish more, faster, and with fewer resources. The best way to meet this challenge is to automate mundane or repetitive tasks wherever possible. In this book, three Cisco experts show you how to use Tcl scripting for Cisco IOS devices to do just that. You'll learn easy techniques for creating, using, and modifying Tcl scripts that run directly on Cisco network devices from the Cisco IOS command line. The authors first teach basic Tcl commands and concepts for capturing and manipulating data and for querying or controlling Cisco equipment. Building on these core skills, they

show you how to write scripts that automate and streamline many common IOS configuration, monitoring, and problem-solving tasks. The authors walk through the entire script development process, including planning and flowcharting what you want to accomplish, formatting your code, adding comments, and troubleshooting script errors. They also present many downloadable sample scripts, along with practical guidance for adapting them to your own environment. Whatever your role in managing, monitoring, or securing Cisco IOS networks and equipment, this book will help you get the job done more rapidly and efficiently. Automate routine administration tasks you've always performed manually Instantly collect and modify IOS router configurations and other data Write Syslog scripts to document failures, monitor network health, collect statistics, and send alarm messages Implement automated network performance measurement using IP SLA Use the Embedded Event Manager's event detectors, server, and policies to customize device operation Trigger preplanned actions to correct problems as they arise Simplify policy management using the Tcl script refresh feature Protect Tcl script security with digital signatures and PKI Understand how Tcl functions within the Cisco IOS environment Master Tcl syntax and commands through hands-on practice Learn best scripting practices through expert examples Quickly modify this book's examples for your own environment This book is part of the Networking Technology Series from Cisco Press®, which offers networking professionals valuable information for constructing efficient networks, understanding new technologies, and building successful careers.

In the spring of 2010, Harvard Business School's graduating class asked HBS professor Clay Christensen to address them—but not on how to apply his principles and thinking to their post-HBS careers. The students wanted to know how to apply his wisdom to their personal lives. He shared with them a set of guidelines that have helped him find meaning in his own life, which led to this now-classic article. Although Christensen's thinking is rooted in his deep religious faith, these are strategies anyone can use. Since 1922, Harvard Business Review has been a leading source of breakthrough ideas in management practice. The Harvard Business Review Classics series now offers you the opportunity to make these seminal pieces a part of your permanent management library. Each highly readable volume contains a groundbreaking idea that continues to shape best practices and inspire countless managers around the world.
