## **The Crocodile**

In one moment Nicole Burns's life changes forever. The sound of gunfire at an Anne Frank exhibit, the panic, the crowd, and Nicole is no longer Nicole. Whiplashed through time and space, she wakes to find herself a privileged Jewish girl living in Nazi-occupied Paris during World War II. No more Internet diaries and boy troubles for Nicole-now she's a carefree Jewish girl, with wonderful friends and a charming boyfriend. But when the Nazi death grip tightens over France, Nicole is forced into hiding, and begins a struggle for survival that brings her face to face with Anne Frank. "This is a powerful and affecting story." (KLIATT)

For the aficionado of farm equipment, or the scion of an old farming family nostalgic for the old days, or the grown-up boy who still loves a classic piece of old-time machinery, the vintage tractor can be a thrilling find like no other. This book tells dozens of stories of such discoveries, of the treasured old tractor parked in a shed since 1927, of the pristine model unearthed at an estate sale, of the broken-

down old beauty stashed in a barn where generations of children have made their secret hideaways. These are the classic tractors that are often as hard to find as a needle in a haystack—but far more fun to discover, as all of these delightful stories make abundantly clear.

### **Fighting Handguns**

The Serge Lifar Collection of Theater Designs, Costumes, and Paintings at the Wadsworth Atheneum Serge Lifar, the last great protege dancer of famed Russian ballet producer Serge Diaghilev, collected paintings, set designs, and costume designs from Diaghilev's Ballets Russes and from his own later productions at the Paris Opera. In 1933 Lifar's European dance company met financial disaster on tour in the United States, and Lifar was forced to sell his collection to pay for return

fires for his troupe. The \$10,000 he received from the Wadsworth Atheneum's flamboyant and imaginative director A. Everett "Chick" Austin was considered extravagant at the time. This collection, recognized as invaluable evidence of the emergence of modernism in theater and in Western art, is today unrivaled as a comprehensive documentation of the Ballets Russes. This catalogue presents the 188 works of art and thirty-two costumes that compose the Serge Lifar Collection. It has been enlarged since 1933, most notably with the 1996 acquisition of original costumes. Most of the set and costume designs and all of the costumes were made for thirty-seven Ballet Russes productions, from the first in 1909 to the last in 1929. The Ballet Russes was one of the greatest artistic movements of the early twentieth century, which fused the efforts of composer, choreographer, dancer, and designer into total works of art. Diaghilev commissioned prominent Russian painters and artists from the School of Paris -- among them Bakst, Picasso, Matisse, Braque, and Miro -- to design sets and costumes. This book provides notes about each production and the corresponding items in the collection, as well as a new assessment of their immediate impact and lasting influence of the renowned Ballet Russes.

## **The Oil Engine and Gas Turbine**

By the end of the twentieth century there were some half-million tractors on British farms - more machines than people to drive them. Brian Bell's encyclopaedic book

traces the evolution of the farm tractor from the days of starting handle and pan seat to current 4-wheel drive machines with air-conditioned cabs and computer management systems. He deals in particular with developments of the classic period from the 1950s to the 1990s. The book is arranged alphabetically by manufacturer from Allis-Chalmers to Zetor, one hundred marques in total. These are all machines to be found on British farms irrespective of their country of manufacture. Brian runs concisely through the histories of the companies and their major models, illustrated with a wealth of photographs and extracts from sales literature. He adds some special features on items such as hydraulic systems and cold-starting aids. He includes a glossary and full index. This book replaces the author's earlier, successful, *Fifty Years of Farm Tractors*. Many of the photographs are new and the text has been brought up to date to include developments of the early twenty-first century.

#1 New York Times bestselling author Nora Roberts begins a new trilogy of adventure, romance, and magick in *The Awakening*. In the realm of Talamh, a

teenage warrior named Keegan emerges from a lake holding a sword—representing both power and the terrifying responsibility to protect the Fey. In another realm known as Philadelphia, a young woman has just discovered she possesses a treasure of her own When Breen Kelly was a girl, her father would tell her stories of magical places. Now she’s an anxious twentysomething mired in student debt and working a job she hates. But one day she stumbles upon a shocking discovery: her mother has been hiding an investment account in her name. It has been funded by her long-lost father—and it’s worth nearly four million dollars. This newfound fortune would be life-changing for anyone. But little does Breen know that when she uses some of the money to journey to Ireland, it will unlock mysteries she couldn’t have imagined. Here, she will begin to understand why she kept seeing that silver-haired, elusive man, why she imagined his voice in her head saying Come home, Breen Siobhan. It’s time you came home. Why she dreamed of dragons. And where her true destiny lies—through a portal in Galway that takes her to a land of faeries and mermaids, to a man named Keegan, and to the courage in her own heart that will guide her through a powerful, dangerous destiny

Computer Science and Applied Mathematics: Algorithm-Structured Computer Arrays and Networks: Architectures and Processes for Images, Percepts, Models,

Information examines the parallel-array, pipeline, and other network multi-computers. This book describes and explores arrays and networks, those built, being designed, or proposed. The problems of developing higher-level languages for systems and designing algorithm, program, data flow, and computer structure are also discussed. This text likewise describes several sequences of successively more general attempts to combine the power of arrays with the flexibility of networks into structures that reflect and embody the flow of information through their processors. This publication is useful as a textbook or auxiliary textbook for students taking courses on computer architecture, parallel computers, arrays and networks, and image processing and pattern recognition.

Commemorating the 150th anniversary of one of the most beloved classics of children's literature, this illustrated edition presents Alice like you've never seen her before. In 1865, Charles Lutwidge Dodgson, an Oxford mathematician and Anglican deacon, published a story about a little girl who tumbles down a rabbit hole. Thus was the world first introduced to Alice and her pseudonymous creator, Lewis Carroll. This beautiful new edition of Alice's Adventures in Wonderland features rarely seen illustrations by Salvador Dalí that illuminate the surreal yet curiously logical and mathematical realm into which Alice famously falls. In an informative and wide-ranging introduction, Carroll expert Mark Burstein discusses Dalí's connections with Carroll, his treatment of the symbolic figure of Alice, and the mathematical nature of Wonderland. In addition, mathematician Thomas Banchoff reflects on the friendship he shared with Dalí and explores the mathematical undercurrents in Dalí's work.

In *Fighting Handguns*, author Jeff Cooper not only takes the reader through the development of this weapon from its beginnings in mid-16th-century Europe through the various iterations of single- and double-action revolvers and semiautomatic pistols, he also discusses some important aspects of carrying and shooting a fighting handgun under combat conditions. “For good or ill, man is a fighting animal. While most feel that this is an unmitigated evil, it may, like most aspects of nature, have its positive side. Certainly man’s combative nature is responsible for most of the massive tragedy of history, but it’s possible that history of any sort just wouldn’t have happened had it not been characteristic of the race to struggle against its environment. And man’s environment, of course, includes man. A placid, gentle, contented creature—a koala, for instance—is nice to contemplate but does not progress, and if it encounters a challenge it simply dies. Whether progress, at the price of a fighting disposition, is worth it is a question, but it’s a bit on the academic side. Man is the way he is, and gets along as he must. Being human, we are involved in strife. Much as we may deplore this, we

must master the techniques of strife or perish. “This book is devoted to one of these techniques—the one-hand firearm as used by man against man.”—Jeff Cooper
