This junior level electronics text provides a foundation for analyzing and designing analog and digital electronics throughout the book. Extensive pedagogical features including numerous design examples, problem solving technique sections, Test Your Understanding questions, and chapter checkpoints lend to this classic text. The author, Don Neamen, has many years experience as an Engineering Educator. His experience shines through each chapter of the book, rich with realistic examples and practical rules of thumb. The Third Edition continues to offer the same hallmark features that made the previous editions such a success. Extensive Pedagogy: A short introduction at the beginning of each chapter links the new chapter to the material presented in previous chapters. The objectives of the chapter are then presented in the Preview section and then are listed in bullet form for easy reference. Test Your Understanding Exercise Problems with provided answers have all been updated. Design Applications are included at the end of chapters. A specific electronic design related to that chapter is presented. The various stages in the design of an electronic thermometer are explained throughout the text. Specific Design Problems and Examples are highlighted throughout as well.

How Pornography Harms paints a complete picture of who uses today's pornography, to what effect, and how it compares to the use of previous generations. Citing the latest studies, interviews with prominent authors on the topic, and drawing from interviews with people whose lives have been affected, Dr. John Foubert exposes the devastating impact of porn. Dr. Foubert explores the effects of pornography on the brain, the spirit, the individual, men, women, teenagers, relationships, and its connection to sexual violence. The author ends with a chapter on how to recover from addictive pornography use, making it an important resource for counselors, parents, clergy, clinicians, and their clients."

Aging and Older Adulthood

For courses in Motor Controls, Electric Machines, Power Electronics, and Electric Power. This best-selling text employs a theoretical, practical, multidisciplinary approach to provide introductory students with a broad understanding of modern electric power. The scope of the book reflects the rapid changes that have occurred in power technology over the past few years—allowing the entrance of power electronics into every facet of industrial drives, and expanding the field to open more career opportunities.

Insights on current research and recent developments in understanding global savanna systems Increasingly recognized as synonymous with tropical grassy biomes, savannas are found in tropical and sub-tropical climates as well as warm, temperate regions of North America. Savanna Woody Plants and Large Herbivores examines the interactions between woody plants and browsing mammals in global savannas—focusing primarily on the C4 grassy ecosystems with woody components that constitute the majority of global savannas—and discusses contemporary savanna management models and applications. This much-needed addition to current research examines topics including the varying behavior of browsing mammals, the response to browsing by woody species, and the factors that inhibit forage intake. Contributions from an international team of active researchers and experts compare and contrast different savanna ecosystems, offering a global perspective on savanna functioning, the roles of soil and climate in resource availability and organism interaction, and the possible impacts of climate change across global savannas. Fills a gap in literature on savanna management issues, including biodiversity conservation and animal production Applies concepts developed in other biomes to future savanna research Complements contemporary books on savanna or large herbivore ecology Focuses on the woody component of savanna ecosystems and large herbivore interactions in savannas Compares tree-mammal systems of savannas and other eco-systems of temperate and boreal regions Provides numerous case studies of plant-mammal interactions from various savanna ecosystems Savanna Woody Plants and Large

Herbivores is a valuable addition to those in fields such as ecology, wildlife and conservation biology, natural resource management, and environmental science.

Prostitution and Trafficking in Nevada

Written by a life-long language practitioner who has spoken isiXhosa since childhood, this grammar represents a significant advance in understanding the structure of isiXhosa, the language of more than 8 million South Africans. In this ground-breaking book isiXhosa is described in its own right, freeing it from preconceived grammatical ideas derived from European languages. All the features of the language are portrayed in this revisionist grammar that reinvents isiXhosa as a language with its own genius. All students of isiXhosa urgently need this book. Both mother-tongue speakers and those studying isiXhosa as a second or third language have to take cognisance of this new approach to escape the restrictions imposed by a Eurocentric bias. It is essential to authors of textbooks and those who prescribe syllabi. It is also of significance for those attempting to gain insight in the structure of related African languages.

Unwanted

This book covers research findings on the language and education situations in Tanzania and South Africa. It outlines the policies governing language of instruction for education in the two countries, and assesses the extent to which existing policies are being implemented. It presents the history of the development of language policies in the two countries and considers how they are actually working in practice at classroom level. The contributors further consider the economic viabilities of language policies, and the necessity to rationalise languages and dialects for education purposes.

Outreach magazine 2018 Resource of the Year—Counseling & Relationships! Unwanted: How Sexual Brokenness Reveals Our Way to Healing is a ground-breaking resource that explores the “why” behind self-destructive sexual choices. The book is based on research from over 3,800 men and women seeking freedom from unwanted sexual behavior, be that the use of pornography, an affair, or buying sex. Jay Stringer’s (M.Div, MA, LMHC) original research found that unwanted sexual behavior can be both shaped by and predicted based on the parts of our story—past and present—that remain unaddressed. When we pay attention to our unwanted sexual desires and identify the unique reasons that trigger them, the path of healing is revealed. Although many of us feel ashamed and unwanted after years of sexual brokenness, the book invites the reader to see that behavior as the very location God can most powerfully work in their lives. Counselors, pastors, and accountability partners of those who experience sexual shame will also find in this book the deep spiritual and psychological guidance they need to effectively minister to the sexually broken around them.

True family literacy is not just a matter of establishing parent-child book nights and encouraging parents to read aloud to their children. Effective family literacy programs recognize and validate the important ways teachers, families, and community members learn from one another. Family literacy also relies on bringing students' home literacy routines into the classroom then back home again. This important book sheds light on family literacy practices that consider-and celebrate-students' complex and diverse home lives. Cultural considerations are key, and several chapters deal with the need to recognize, respect, and capitalize on home contexts for literacy in order to engage students, families, and communities. In these pages you will Read about successful family literacy programs Gain ideas for incorporating home culture and literacy practices into school settings to better engage students Learn how to effectively communicate literacy practices and goals to parents This volume differs from other books on family literacy in that the contributors themselves reflect the demographic diversity in today's schools. So in addition to presenting their research and classroom experiences, they give rich, personal accounts of their own interactions with students, teachers, and families. And they raise questions about power and access, calling for true learning partnerships. Book jacket.

<l>Curriculum and the Culture Wars offers a fresh perspective on perennial debates about the role of religion in public schools, focusing on the intersection of religion and curriculum. This debate has been renewed in part due to the growth of elective Bible courses in public schools in many parts of the country. The first half of the book presents new scholarship on the use of the Bible in schools, including a historical analysis of what the Founders had to say about the use of the Bible in public education, a more current assessment of the politics behind the elective Bible class movement in the early twenty-first century, and a critique of such educational programs from constitutional and pedagogical perspectives. This edited volume also offers new insights into long-standing battles that pit religious and secular advocates against one another in the areas of evolution and sex education and considers whether school choice programs that would allow parents the right to send their children to sectarian schools are an affront to promoting the goals of a liberal democracy.

Prostitution and Trafficking in Nevada addresses the scope of the sex industry in Nevada, including human rights violations against women in the Nevada legal brothels. The book describes how the multibillion-dollar illegal sex industry in Las Vegas works. Sex trafficking from within and outside of the US, advertising for prostitution, political corruption, pornography, organized crime and the constant demand of men for paid sex - all contribute to prostitution and trafficking in Nevada.

Coiled like a snake at the base of the spine, kundalini is the spiritual force that lies dormant in every human being. Once awakened, often through meditation and yoga practices, it rises up the spine and finds expression in the form of spiritual knowledge, mystical vision, psychic powers, and ultimately, enlightenment. This is the classic first-person account of Gopi Krishna, an ordinary Indian householder who, at the age of thirty-four, after years of unsupervised meditation, suddenly experienced the awakening of kundalini during his morning practice. The story of this transformative experience, and the author's struggle to find balance amid a variety of powerful physiological and psychic side effects, forms the core of the book. His detailed descriptions of his dramatic inner experiences and symptoms such as mood swings, eating disorders, and agonizing sensations of heat—and of how, with the help of his wife, he finally stabilized at a higher level of consciousness—make this one of the most valuable classics of spiritual awakening available.

Data Modeling and Database Design

Professor Gail Dines has written about and researched the porn industry for over two decades. She attends industry conferences, interviews producers and performers, and speaks to hundreds of men and women each year about their experience with porn. Students and educators describe her work as “life changing.” In *Pornland*—the culmination of her life’s work—Dines takes an unflinching look at porn and its affect on our lives. Astonishingly, the average age of first viewing porn is now 11.5 years for boys, and with the advent of the Internet, it’s no surprise that young people are consuming more porn than ever. But, as Dines shows, today’s porn is strikingly different from yesterday’s *Playboy*. As porn culture has become absorbed into pop culture, a new wave of entrepreneurs are creating porn that is even more hard-core, violent, sexist, and racist. To differentiate their products in a glutted market, producers have created profitable niche products—like teen sex, torture porn, and gonzo—in order to entice a generation of desensitized users. Going from the backstreets to Wall Street, Dines traces the extensive money trail behind this multibillion-dollar industry—one that reaps more profits than the film and music industries combined. Like Big Tobacco—with its powerful lobbying groups and sophisticated business practices—porn companies don’t simply sell products. Rather they influence legislators, partner with mainstream media, and develop new technologies like streaming video for cell phones. Proving that this assembly line of content is actually limiting our sexual freedom, Dines argues that porn’s omnipresence has become a public health concern we can no longer ignore.

Pornography is menacing people, relationships, and society, and this book has the research and stories to prove it. John D. Foubert, Ph.D., an interdisciplinary scholar who has studied sexual violence since 1993, shares the life stories of more than twenty people directly affected by pornography. He also interviews scholars and explains how pornography affects our brains. In examining the many ways pornography is devouring the God-given sexual health of the Internet generation, he highlights its connection to sexual violence and how it ruins lives. He also focuses on who makes pornography and their motives, recent trends in pornography, and how pornography is changing the way people have sex. Perhaps most importantly, he explains what we can do to confront pornography in our own lives, the lives of our loved ones, and in society. Whether you are a teen, young adult, a parent, pastor, scholar, or you are just curious about what pornography does to people, your conscience will be shocked and your points of view deeply challenged by what Foubert has uncovered about the reality of today's pornography.

State Religious Education and the State of Religious Life

In the past decade, the national preoccupation has been on the crisis in secondary schools. Lurking behind the intractable problem of low pass rates, the dysfunctional schools and the small number of higher grade mathematics and science graduates is the calamity in primary education. Drawing on the work of researchers in a range of fields including psychology, sociology, anthropology, linguistics, economics, the health sciences, and mathematics education, this book documents the depth and scope of the primary education crisis and provides a comprehensive and rigorous explanation of its causes. Primary education in crisis pulls together the wealth of research on health, poverty, resources, language and teaching as factors in academic achievement in reading, writing and mathematics. At the centre of the book is an analysis of the published studies that systematically document what teachers teach and fail to teach, and why it is that teaching is at the heart of the crisis in primary education. The author suggests that there are no quick fixes, but only hard choices and that, for reform to succeed, it must be evidence-based.

This book explores recent calls to increase instruction of the Bible in American public schools. The work develops a distinctive philosophical and trans-Atlantic

assessment of these proposals by critiquing European approaches to religious education and by reviewing the role of religion in contemporary democracies. The work will spark debate among political scientists, policy experts, Religious Education instructors, theologians, and social and educational theorists.

How Pornography Harms

Every two minutes, evil strips innocence from a child and sells her into slavery for sex. Not in a third-world country, but in the United States of America. Before you take another breath, the next victim will be tricked or taken from her family by a profit-hungry criminal. She could be a neighbor. A friend. Your sister. Your daughter. You. At fourteen, Hope Ellis is the all-American girl with a good life—until the day she tries to help her mom with their cross-town move by supervising the movers. When they finish, one of the men returns to the house and rapes her. Held silent by his threats, darkness begins to engulf her. But the rape proves to be the least of Hope's troubles. In a gasping attempt at normalcy, she succumbs to the attention of a smooth-talking man on the subway. He promises acceptance. He declares his love. He lures her out from under the shelter of her suburban life. Hope's disappearance sets a community in motion. She's one of their own. They determine to find Hope, whatever the cost, before she's lost forever. Will you?

The Social System of the Zulus

Reflects the most important theoretical foundations and research directions concerning aging and older adulthood This authoritative volume provides the latest insights into, and theoretical interpretation of, our understanding of the human aging process. Newly updated and revised, this edition of the well-established student textbook offers relatable scenarios that touch upon real-world issues faced by older adults and their families. The book explains how research studies attempt to answer questions of both theoretical and practical importance as they relate to aging and older adulthood, and it explains the hypotheses and findings of the studies in a manner that is comprehensible to readers of all levels of research experience. *Aging and Older Adulthood* begins by describing the demographic characteristics of the older population, and follows with a chapter on theoretical

models that apply to the study of adult development and aging, as well as approaches commonly taken to conduct research and ethical concerns involved in the study of this group. It then offers a series of chapters exploring biological aging, sensation perception and attention, memory, intellectual functioning, cognition and real-world problem-solving, personality and coping, social interaction and social ties, lifestyles and retirement, mental health and psychotherapy, and death and bereavement. The final chapter looks at aging in the future. Each chapter includes fully updated research findings, as well as new and expanded coverage of concepts and ideas in areas such as neuroscience, and diabetes. New edition of a highly respected text exploring our contemporary understanding of a broad range of topics related to older adulthood and the psychology of aging Offers thematic treatment of core issues including health, sensory perception, memory, intellect, social interactions, employment and retirement, and mental health Uses a dual lens of two models - the selective optimization with compensation model and the ecological model - to provide cohesiveness to the presentation of both theoretical and applied material Introduces each chapter with a relevant real-world scenario and refers back to it throughout the chapter Includes pedagogical feature boxes that reflect current understanding of contemporary issues in the field as well as key points and issues for further discussion Aging and Older Adulthood, 4th Edition is an excellent text for upper division undergraduate and graduate courses focusing on the older adulthood and aging, the psychology of aging, gerontological studies, and lifespan development.

Applied ethnomusicology is an approach guided by principles of social responsibility, which extends the usual academic goal of broadening and deepening knowledge and understanding toward solving concrete problems and toward working both inside and beyond typical academic contexts (International Council for Traditional Music 2007). This edited volume is based on the first symposium of the ICTM's Study Group on Applied Ethnomusicology in Ljubljana, Slovenia in 2008 that brought together more than thirty specialists from sixteen countries worldwide. It contains a Preface, an extensive Introduction, and twelve selected peer-reviewed articles by authors from Australia, Austria, Canada, Germany, Slovenia, Serbia, South Africa, the United Kingdom, and the United States of America, divided into four thematic groups. These groups encompass: diverse perspectives on the growing field of applied ethnomusicology in various geographical and problem-solving contexts; research and teaching-related connotations; the potential in contributing to sustainable music cultures; and the use of music in conflict resolution situations. The edited volume Applied Ethnomusicology: Historical and Contemporary Approaches brings together previously dispersed knowledge and perspectives, and offers new insights to various disciplines within the humanities and social sciences. Rooted in diverse scholarly traditions, it addresses a variety of challenges in today's world and aims to benefit the quality of human existence.

A Platteland Pilgrimage

This book investigates the role of wealth in achieving sustainable rural economic development. The authors define wealth as all assets net of liabilities that can contribute to well-being, and they provide examples of many forms of capital – physical, financial, human, natural, social, and others. They propose a conceptual framework for rural wealth creation that considers how multiple forms of wealth provide opportunities for rural development, and how development strategies affect the dynamics of wealth. They also provide a new accounting framework for measuring wealth stocks and flows. These conceptual frameworks are employed in case study chapters on measuring rural wealth and on rural wealth creation strategies. Rural Wealth Creation makes numerous contributions to research on sustainable rural development. Important distinctions are drawn to help guide wealth measurement, such as the difference between the wealth located within a region and the wealth owned by residents of a region, and privately owned versus publicly owned wealth. Case study chapters illustrate these distinctions and demonstrate how different forms of wealth can be measured. Several key hypotheses are proposed about the process of rural wealth creation, and these are investigated by case study chapters assessing common rural development strategies, such as promoting rural energy industries and amenity-based development. Based on these case studies, a typology of rural wealth creation strategies is proposed and an approach to mapping the potential of such strategies in different contexts is demonstrated. This book will be relevant to students, researchers, and policy makers looking at rural community development, sustainable economic development, and wealth measurement.
