The Routledge Linguistics Encyclopedia

Tourism, Biodiversity and Information

From tourist paradises to immigrant detention camps, from offshore finance centres to strategic military bases, islands offer distinct identities and spaces in an increasingly homogenous and placeless world. The study of islands is important, for its own sake and on its own terms. But so is the notion that the island is a laboratory, a place for developing and testing ideas, and from which lessons can be learned and applied elsewhere. The Routledge International Handbook of Island Studies is a global, research-based and pluri-disciplinary overview of the study of islands. Its chapters deal with the contribution of islands to literature, social science and natural science, as well as other applied areas of inquiry. The collated expertise of interdisciplinary and international scholars offers unique insights: individual chapters dwell on geomorphology, zoology and evolutionary biology; the history, sociology, economics and politics of island communities; tourism, wellbeing and migration; as well as island branding, resilience and 'commoning'. The text also offers pioneering forays into the study of islands that are cities, along rivers or artificial constructions. This insightful Handbook will appeal to

geographers, environmentalists, sociologists, political scientists and, one hopes, some of the 600 million or so people who live on islands or are interested in the rich dynamics of islands and island life.

The Business of Tourism

This book is unique in expertly linking three populations tourists, migrants, and refugees and forcing the reader to face the dilemmas and opportunities each poses for development in poor countries. Linda Richter, Kansas State University As travelers increasingly seek out the exotic wildlife and idyllic sunsets of the

developing world, a complex relationship involving tourism, the migration of workers, and the involuntary displacement of peoples has emerged. Milica Bookman explores that relationship and the connection between population movements and economic development in third world countries. Bookman's multicountry analysis demonstrates forcefully that tourism both induces migration and displacement and is enabled by them, in a self-reinforcing circular flow. These population movements, she argues, likewise are both a cause and effect of economic growth. They are not, however, a panacea for developing countries. Throughout her study, Bookman underscores the human costs of tourism-led development, emphasizing the need for greater attention to the social dislocations that it brings about. Milica Z. Bookman is professor of economics at St. Joseph's University. She is author of eight books, including *Ethnic Groups in Motion* and *The Demographic Struggle for Power*, and is the recipient of the Tengelman Award for Excellence in Teaching and Research. Contents: Introduction. Growth and Population Movements in Tourist-Friendly Countries. Tourists and Other Travelers. Migrants and Immigrants. Refugees and Internally Displaced Peoples. The Circular Flow of Populations and the Global Economy.
