Family and Succession Law in the Portuguese Civil Code of 1867

This book is one of the first to link company law to the law of succession by concentrating on family businesses. It shows that, to understand the legal framework underlying the daily operations of family businesses, one needs legal analysis, empirical data, psychological and sociological knowledge. The book works on the premise that, since many businesses have been founded by families, practitioners need to develop an understanding of the legal background of such businesses and build up experience to be able to create contracts, trusts, foundations and other legal mechanisms to give shape to systems and procedures for the transfer of shares and control within the family. Comparing the national legal order, techniques, and mechanisms in a range of countries, the book examines parallel developments in these fields of law across the world. Finally, it demonstrates the room for companies, shareholders and the

members of a family to develop individual solutions within the legal framework for transferring businesses and shares to the next generation.

The Landmark Cases series highlights the historical antecedents of what are widely considered to be the leading cases in a discipline, and seeks to provide contexts in which to better understand how and why certain cases came to be regarded as the 'landmark' cases in any given field. Succession law's long pedigree, near-universal application, immense capacity for human interest stories, somewhat uncertain future in England and Wales, and close connection to demographics make it an ideal candidate for a Landmark Cases volume. The distinguished contributors to this collection consider cases ranging from 1720 to 2017, covering issues such as will-making and interpretation, the position of beneficiaries and personal representatives,

testamentary promises, and the extent of testamentary freedom in England and Wales and beyond. The cases are relevant not only to scholars and students of succession law per se, but also those working in fields such as tax, trusts, tort and land law. They raise issues as diverse as class, colonialism, familial dynamics, expectations and obligations, mental health, and the proper roles of the legal profession and the welfare state. The collection will provoke much discussion on what makes a 'landmark' case, as well as on the peculiarities and limitations of the case law method.

Family and Succession

Family and succession law are tightly bound together. Succession law is usually based on kindred relationships as established by family law. The trends established in the marital property laws and succession laws are often a result of developments in family law. Equality of spouses and of all children, regardless of their descent, is not without consequences for marital property laws and succession law. Therefore, this comprehensive comparative looseleaf set covers family law together with marital property law and succession law. In addition to the national monographs that follow the outline below, this subset of the International Encyclopaedia of Laws currently includes a monograph for the European Union. Forthcoming supplements will include international monographs describing the activities of several international organizations in the domain of family and succession

Intestate Succession is the second volume in the Comparative Succession Law series which examines the principles of succession law from a comparative and historical perspective. This volume discusses the rules which apply where a person dies either without leaving a valid will, or leaving a will which fails to dispose of all of the person's assets. Among the questions considered are the following: What is the nature of the rules for the disposal of the deceased's assets? Are they mechanical or is there an element of discretion? Are particular types of property dealt with in particular ways? Is there entitlement to individual assets (as opposed to money)? Do the rules operate

in a parentelic system or a system of some other kind? Are spouses treated more favourably than children? What provision is made for extra-marital children, for adopted children, for step-children? Does cohabitation give rise to entitlement? How are same-sex couples treated? Broader questions also arise of a historical and comparative nature. Where, for example, do the rules in intestate succession come from in particular legal systems? Have they been influenced by the rules in other countries? How are the rules explained and how are they justified? To what extent have they changed over time? What are the long-term trends? And finally, are the rules satisfactory, and is there pressure for their reform? As in the first volume, this book will focus on Europe and on countries which have been influenced by the European experience such as Australia, New Zealand, South Africa, the United States of America, Quebec, and the countries of Latin America. Further chapters are devoted to Islamic Law and Nordic law. Opening with a discussion on Roman law and concluding with an assessment of the overall development of the law in the countries surveyed, this book will provide a wider reflection on the nature and purpose of the law of intestate succession.

With contributions from a selection of highly regarded and leading scholars in this field, the Routledge Handbook of Islamic Law is an essential resource for students and scholars who are interested in the field of Islamic Law.

Muslim law and rules for dealing with the distribution of a dead person's property differ greatly from western law. The system of Muslim law, the Shar'ah, is derived from the Qur'an and the words of the Prophet himself, and is therefore believed to be of divine inspiration, and not man-made. A variety of schools of law have grown up which interpret the Prophet's sayings, and the practical effect of these different rules of interpretation varies considerably. Recent codifications have not necessarily remained within the classical Muslim legal traditions, and have introduced further differences. With western law it is assumed that a man will make a will, and, broadly speaking, his

property will be distributed in accordance with its provisions. It is only in the event of a man dying without making a will that the rules of intestacy are applied. Muslim law makes the opposite assumption.

Derived from the renowned multi-volume International Encyclopaedia of Laws, this concise exposition and analysis of the essential elements of law with regard to family relations, marital property, and succession to estates in the USA covers the legal rules and customs pertaining to the intertwined civic status of persons, the family, and property. After an informative general introduction, the book proceeds to an in-depth discussion of the sources and instruments of family and succession law, the authorities that adjudicate and administer the laws, and issues surrounding the person as a legal entity and the legal disposition of property among family members. Such matters as nationality, domicile, and residence; marriage, divorce, and cohabitation; adoption and guardianship; succession and inter vivos arrangements; and the acquisition and administration of estates are all treated to a degree of depth that will prove useful in nearly any situation likely to arise in legal practice. In addition to the national monographs that follow the outline below, this subset of the International Encyclopaedia of Laws currently includes a monograph for the European Union. Forthcoming supplements will include international monographs describing the activities of several international organizations in the domain of family and succession law, such as the United Nations, the Council of Europe, and the International Commission on Civil
