## Finance and Accounting for Business

Financial literacy for leaders A solid understanding of finance and accounting is critical in every aspect of business. In order to gauge business performance, make investment decisions or devise effective strategies, managers must be able to access and use the information contained in financial statements and work with the concepts that underlie them. Financial literacy is an absolute requirement for the successful manager. In direct and simple terms, Richard A. Lambert, Miller-Sherrerd Professor of Accounting at the Wharton School of the University of Pennsylvania, demystifies financial statements and concepts and shows you how you can apply this information to make better business decisions for long-term profit. In Wharton Executive Education Finance & Accounting Essentials, you will learn to use and interpret financial data, including income statements and balance sheets; strengthen your knowledge of financial reporting concepts; discover how to identify and estimate the relevant costs for decisions; learn how to evaluate investment strategies; apply your financial know-how to develop a coherent business strategy; and find out what you can learn from Pepsi, Krispy Kreme, General Motors, and other companies.

## Management Decisions and Financial Accounting Reports

The third edition of Financial Accounting for Management is a comprehensive textbook designed to meet the syllabi requirements of management students. The text has been restructured to include several new topics, examples, cases,

exercises, and two new chapters.

### **The Illiterate Executive**

David Spiceland, Wayne Thomas and Don Herrmann have developed a unique text based on over 50 collective years of experience in the classroom. They've brought together best practices like highlighting Common Mistakes, offering frequent Let's Review exercises, integrating the course with a running Continuing Problem, demonstrating the relevance of the course to non-majors with a Career Corner, and communicating it all in a student-friendly Conversational Writing Style. The new 2nd edition of Financial Accounting, Spiceland, Thomas, Herrmann, has been developed with feedback from over 330 reviewers and focus group participants from across the country. The following list of changes and improvements is a testament to the many hours that reviewers spent analyzing the 1st edition, helping make Financial Accounting, 2nd edition, the best book of its kind.

## **Financial Accounting for Decision Makers**

Accounting and Finance for Managers is specifically designed for the needs of MBA, EMBA and MA Business and Management students. It includes worked examples throughout the chapters, as well as real-world scenarios and full exercises at the end of each chapter. The book also includes 'Expert view' notes, which encourage students to think more broadly and present them with further issues to consider. For lecturers, the book begins with an indication of how the course material throughout the book might be divided over different time periods. Providing coverage of basic bookkeeping, readers will learn how to interpret financial statements and grasp underlying theory, interpret a cash budget and identify

potential problems, identify appropriate pricing strategies to fit different markets and products/services and incorporate financial evaluation into operational decision making and problem solving. Online supporting resources for this book include bonus chapters covering topics such as cash flow, investment decisions and business planning, and lecture slides for each chapter.

## **B&W Accounting for Managers**

Fad-Free Strategy provides a ground-breaking approach to making better business strategy decisions: more efficient, open to out-of-the-box opportunities and evidence-based. Most strategy books focus on Grand Strategy, the process that leads to high-level recommendations or, more accurately, hypotheses about where and how to compete. While this book briefly covers critical Grand Strategy practices, it deep dives into Operational Strategy, the process of validation, adaptation and possible rejection of those hypotheses. Operational Strategy is based on an in-depth understanding of customer preferences and anticipating the choices they make. Those choices rather than managers' ambitions determine whether a strategy will generate the aspired financial results. The book explains, by means of detailed real-world cases across industries, how to generate validated solutions to any strategic problem such as: how to enter successfully into new markets, either as an innovator or as a latecomer? How to defend one's position against aggressive new entrants? Or how to sustain margins when price is the only thing customers seem to care about? This remarkable book contains expert advice from accomplished strategic advisors and thought leaders Daniel Deneffe and Herman Vantrappen. Fad Free Strategy will be a useful tool for smart business executives at mainstream companies who are disappointed with strategy fads and simplistic solutions based on cherry-picked, anecdotal evidence from today's hero companies. It will also appeal to economics faculty members teaching graduate courses in business strategy who are looking for an economics-based strategy textbook that is both rigorous and comprehensive. The book's core ideas have been taught successfully in continuing and executive education programs at Harvard University and Hult International Business School.

## **FINANCE FOR EXECUTIVES**

J. Fred Weston provides managers and executives with the information they need to understand essential accounting principles, from vocabulary and financial statements to cash flow and valuation. Covering balance sheets, income statements, reporting measures, and even essential ratios, this practical, in-depth book provides a one-stop, reference for all aspects of finance and accounting, and will help managers take essential steps toward making informed decisions based on the numbers they face every business day.

## **Managerial Accounting**

Effective financial planning for executives and entrepreneurs is complex, dense, and impossible to reduce to a single, easy-to-understand formula. Designed to emphasize the importance of effective, targeted financial planning, this book begins by telling a story about a fictional, but plausible, power couple and their family who (spoiler alert!) do pretty much everything wrong in securing their financial future. In most cases, they don't do the things needed because they don't know what they are. Using this story as a case study of executives and entrepreneurs, the book breaks down the case into chapters and offers practical

discussions of all the key financial planning pillars—investment planning, tax planning, estate planning, philanthropic planning, risk management, and equity-based compensation to name a few—with the tools needed to tailor a plan for virtually every circumstance and need. While there is no single plan that works for everybody, this book will provide a guide with complicated, technical information alongside specific guidance on how to build an effective financial plan.

## **Personal Financial Planning for Executives and Entrepreneurs**

For intermediate and financial accounting courses at the MBA and undergraduate level, or a supplement to financial statement analysis texts. This collection of financial accounting cases is designed to help students become financial statement users. Each case utilizes financial statement information (balance sheet, income statement, statement of cash flow and/or footnotes) and a number of topical questions. Students use the financial statement information to infer and interpret the economic events underlying the numbers. Related articles taken from business publications accompany some cases, and information from the articles is incorporated into the case question material. Also available the Pearson Custom Case Program.

Ideal for both aspiring managers and experienced executives, the Fourth Edition of FINANCE FOR EXECUTIVES: MANAGING FOR VALUE CREATION illustrates the importance of financial information in maximizing firm value. Respected authors Gabriel Hawawini and Claude Viallet draw on their wealth of business and teaching experience to provide a concise, analytically sound introduction to financial management that is neither too simplistic nor too theoretical. In fact, the text masterfully balances a thorough exploration of modern finance principles with a strong practical focus on real-world applications and rigorous analysis, even while

avoiding complicated formulas with little value for decision-making. Perfect for executive education courses, M.B.A. programs, or any class with an emphasis on translating theory into practice or learning through real-world cases, FINANCE FOR EXECUTIVES employs a strong problem-scenario approach to present key concepts within the context of realistic financial management issues that executives commonly face. In addition, a series of integrated case studies analyzes the same set of companies throughout the text to explore concepts in greater depth and reinforce learning. The new Fourth Edition maintains the text's highly reader-friendly structure and presentation. Because each chapter is self-contained, instructors can enjoy great flexibility in structuring their courses, while students will find the text an invaluable reference and resource to use throughout their careers. In addition, the current edition features extensive updates incorporating the most recent financial data and latest references, as well as a new chapter devoted to managing corporate risk, an essential topic for success in today's high-stakes business environment. Accounting for Value teaches investors and analysts how to handle accounting in evaluating equity investments. The book's novel approach shows that valuation and accounting are much the same: valuation is actually a matter of accounting for value. Laying aside many of the tools of modern finance the cost-of-capital, the CAPM, and discounted cash flow analysis Stephen Penman returns to the common-sense principles that have long guided fundamental investing: price is what you pay but value is what you get; the risk in investing is the risk of paying too much; anchor on what you know rather than speculation; and beware of paying too much for speculative growth. Penman puts these ideas in touch with the quantification supplied by accounting, producing practical tools for the intelligent investor. Accounting for value provides protection from paying too much for a stock and clues the investor in to the likely return from buying growth. Strikingly, the analysis finesses the need to calculate a "cost-of-capital," which often frustrates the application of modern valuation techniques. Accounting for value recasts "value" versus "growth" investing and explains such curiosities as why earnings-to-price and book-to-price ratios predict stock returns. By the end of the book, Penman has the intelligent investor thinking like an intelligent accountant, better equipped to handle the bubbles and crashes of our time. For accounting regulators, Penman also prescribes a formula for intelligent accounting reform, engaging with such controversial issues as fair value accounting.

Corporate Financial Reporting and Analysis: A Global Perspective/3e by David Young and Jacob Cohen is an introductory textbook on financial reporting for MBA students. This book is intended to offer the rigor and comprehensive coverage required of an MBA text, while at the same time offering an accessible and practical reference for participants in executive programs. David Young is based at INSEAD Business School in France, and Jacob Cohen is based at MIT Sloan School of Management in the USA. This book offers a rigorous, yet accessible, treatment of contemporary financial reporting practice. Examples are drawn from a broad range of companies to illustrate key concepts. Particular emphasis is given to the latitude and flexibility granted to managers in reporting financial performance, and the steps that financial statement readers can take to identify potential trouble areas in the accounts. Topics include the analysis and interpretation of the three principal financial statements, revenue recognition, inventory accounting, receivables and bad debts, accounting for long-term assets, provisions and contingencies, income taxes, and the accounting for mergers and acquisitions. A unique feature of this book is the seamless way in which it deals with differences in U.S. GAAP and IFRS. Both regimes are covered simultaneously, i.e. when a topic is discussed, including the relevant journal entries and disclosures, the discussion applies equally to GAAP companies and to IFRS companies. It doesn't matter whether the company used in a given example is from the U.S., Europe, or elsewhere. Thanks to the ongoing GAAP/IFRS convergence project, the two regimes are close enough to allow for a somewhat generic approach that allows for coverage of both regimes at the same time. In this way, the examples that are covered in the book are relevant to all readers, regardless of which regime

dominates in their business environment. The content of this book has been classroom tested over the past 20 years at INSEAD with the MBA class which has students from 80 different countries.
