As markets become more dynamic and competitive, companies must reconsider how they view inventory and make changes to their production and inventory systems. They must begin to think outside the classical box and develop a new paradigm of inventory management. Exploring the trend away from classical models based on economic order quantities to dependent demand systems, *Inventory Management: Non-Classical Views* comes as a just-in-time resource. Explore the new role of inventories in business enterprises This book discusses a new paradigm for inventory management that is responsive to dynamic changes in the economy. It explores: Inventory systems that provide flexibility Inventory performance measures other than using cost as a means to control inventory Inventory as a contributor to customer value creation, rather than a liability The book also examines why energy and the environment are to be considered in inventory decisions, the non-classical application of inventory management in fields such as healthcare and disaster relief, and non-classical approaches to measuring the performance of inventory such as information theory, fuzzy sets, and thermodynamics. While many factors may change, one certainty is that the global economy is becoming increasingly dynamic. It explores how to create inventory management as a tool for continued success regardless of market fluctuations and economic variances.

This new model of human interaction has been chosen by Google to train the entire company worldwide (30,000 employees), is the #1 book for your career chosen by The Wall Street Journal's website, and is labeled "phenomenal" by Lawyers' Weekly and "brilliant" by Liza Oz of the Oprah network. Based on more than 20 years of research and practice among 30,000 people in 45 countries, *Getting More* concludes that finding and valuing the other party's emotions and perceptions creates far more value than the conventional wisdom of power and logic. It is intended to provide better agreements for everyone no matter what they negotiate - from jobs to kids to billion dollar deals to shopping. The book, a New York Times bestseller and #1 Wall Street Journal business best seller, is based on Professor Stuart Diamond's award-winning course at the Wharton Business School, where the course has been the most popular over 13 years. It challenges the conventional wisdom on every page, from "win-win" to BATNA to rationality to the use of power.
