This edition is the most visually appealing, with a second colour added, highlighting coding additions and other features. In addition, as usual, the new version of

A revised edition of a controversial attack on modern psychological therapy, from Freud to Carl Rogers. The author begins with the premise that the aim of therapy is to change people. He then argues that if the direction of change, indeed the definition of success in therapy, is determined chiefly by the therapist, then therapy is an inherently corrupt interaction. Why? Because the autocratic structure of therapy serves the interests of the therapist, not the patient. Masson's solution is a non-authoritarian self-help group in which no money changes hands. As a fine art and commercial photographer, perennial student and teacher with a passion for sharing, Halpern has embraced each new technology and applied them to a wide range of subjects. In *Pilgrim Eye*, Halpern's first book to showcase his award-winning fine art and landscape imagery, he provides a revealing glimpse into his lifelong journey of self-discovery. The book showcases 128 color and black-and-white photographs made over more than fifty years of pilgrimages across America from the Great Smoky Mountains of Tennessee to Thomas Bay, Alaska, and

These stunning images are accompanied by the photographer's self-revealing stories and thoughts, most of them pulled from his meticulously written and preserved journals. Neither a how-to manual nor a traditional portfolio, Pilgrim Eye has been called by one reviewer several books at once: a retrospective look at [Halpern's] career as a landscape photographer, an artistic manifesto, and a kind of philosophical autobiography . . . as much fun to look at as it is to read."
