Textile Analysis, Quality Control & Innovative Uses

Subject Catalog

This user-friendly guide to evaluating apparel quality presents the roles of product designers, manufacturers, merchandisers, testing laboratories, and retailers from product inception through the sale of goods, to ensure quality products that meet customer expectations. Bubonia provides an overview of apparel production, with emphasis on quality characteristics and cues, consumer influences and motivations impacting purchasing decisions, and the relationship of apparel manufacturing and production processes, cost, price point and the quality level of an apparel product.

Making Vintage 1950s Clothes for Women

Nothing epitomizes the look of the 1950s more for women than the hour-glass silhouette of the tightly fitted bodice and full skirt. This ubiquitous style - first introduced in 1947 with Dior's New Look - was so widely adopted by the mid-50s that it came to define the decade. This practical book introduces and explores the styles and construction techniques used in the 1950s. Step-by-step instructions and photographs demonstrate how to achieve a well-finished and authentic look using equipment easily obtainable at home. Chapters explain the processes from fabric selection, cutting out and preparation through to garment assembly using traditional techniques for creating the silhouette of the day. There are photographs

and analysis of original pieces from private collections and museum archives and scaled patterns that have been standardized to a modern size 12 and can be graded up and down in size. With patterns and instructions for making your own bullet bra and girdle, each project includes a materials and equipment list and a section on specialist stockists and suppliers. Additional chapters include practical advice on measuring and fitting, and how to create the 1950s look. Aimed at students, teachers of costume, re-enactment societies and costume designers for TV, theatre and film and superbly illustrated with 300 colour photographs and 14 patterns.
