## **Tuning for Speed**

294 pages, 130 black & white illustrations, size 5.5 x 8.5 inches. In 1963, Temple Press UK published a revised and expanded 4th UK edition of 'Tuning for Speed' and, in 1965, they published a reprint of that 1963 edition. Both the 1963 and the 1965 publications are identical in content and contain 294 pages, a significant increase from the previous 208 page 1960 printing. With a total of 294 pages, the revised and expanded 4th UK edition is the most comprehensive of all of the 'Tuning for Speed' editions ever published. Earlier editions only stretched to 208 pages and later editions shrunk to 260 pages (or less) as what was thought to be 'dated information' was deleted from the contents. This 'dated information' is considered valuable today by those enthusiasts interested in vintage motorcycle tuning and modification. Consequently, this makes the revised 4th UK publication the most complete and desirable edition. Therefore, it is our pleasure to offer this reprint of the Floyd Clymer 'Revised 4th UK Edition or Second American Edition of 'Tuning for Speed' to motorcycle enthusiasts worldwide. 'Tuning for Speed' was originally published in 1948 and continuously reprinted and updated in order to keep pace with the constantly evolving range of British motorcycles and engines. While the primary focus of this publication is on 1965 and prior British motorcycles, the theory and engineering it contains is still applicable to the current crop of high revving imports. 'Tuning for Speed' is considered by many knowledgeable motorcycle enthusiasts to be one of the best books ever written on how to

improve, modify and fine tune a motorcycle engine and it is often referred to as one of the 'top 10' classic motorcycle books. The Floyd Clymer association with this publication dates back to the early 1960's when he purchased the United States Publishing rights for 'Tuning for Speed' from Temple Press in the UK and, in 1967, Clymer published the 1st American edition of that title. However, by 1967, the Clymer publication had been preceded by 8 printings of the UK edition and was incorrectly identified by Clymer as a 9th edition. In fact, the 1967 Clymer publication is actually a reprint of the less desirable 208 page 1960 UK edition. However, in 1963, the 4th UK edition was revised and expanded to 294 pages (with a second identical re-print in 1965). Therefore, this 2nd American edition of the Floyd Clymer publication of 'Tuning for Speed' includes all of that valuable 'dated information' that was deleted from the later editions and is identical in all respects to the 294 page 1963/1965 revised and expanded 4th UK edition - with the exception that 7 pages of UK-based advertising to the rear of the book are not included in the Clymer publication.

Solution architecture is concerned with the design and definition of (information technology) solutions so they can be subsequently implemented, used, operated and supported securely and efficiently. The solution exists to operate business processes in order to achieve business objectives, meet a business need and deliver business value. Solution architecture is concerned with engaging with the originating business function looking for the solution to create a solution vision and design a solution that meet their needs, subject to a range of constraints such as cost and affordability, time to deliver and organisational standards. The solution must exist as a coherent whole. Solutions must be designed consistently across the solution landscape and make optimum use of appropriate technologies. Solution architecture must focus on creating usable and useful solutions. Solution architecture must have a standard reliable approach to business engagements and the design of solution that emerge from them. Solution architecture must work collaboratively with other information technology functions - other architecture roles, business analysis and service management - to ensure continuity along the solution delivery journey. Effective solution architecture involves: -Have a depth and breadth of solution delivery and technical experience to be able to identify solution design options quickly-Being able to understand the detail of the solution while maintaining a view of the wider (and higher) context of the business need for the solution and being able to explain both these views of sets of information-Being able to communicate effectively with all parties - technical and business - involved in the solution design and delivery journey, assist with decision-making, be realistic and make appropriate compromises and design choices in order to create the best solution design-Being able to apply technology appropriately and with selective innovation (and the desire to constantly acquire new knowledge and ways of applying technology)-Being involved in the solution delivery journey along its entire length-Being able to be the solution advocate and subject matter expert This book is aimed at a variety of potential readers: -Existing solution architects who want to have a more theoretical and a broader understanding of their role-Existing or new managers of solution architecture functions who want to create a high-performing practice within their organisations and who want to articulate the benefits and value solution architect can contribute to the information technology function and the wider business and the potential it can offer to the business organisation-Mangers of information technology functions who want to understand what solution architecture is, where it fits into the wider architecture context and disciplines and solution delivery and operation and the value it can contribute to both the information technology function and the wider business-Other information technology architects who want to understand how the architecture disciplines can work together to deliver value-Business analysts and

managers of business analysis functions who want to understand how they can work more closely with the solution architecture function in order to provide the business with a better overall service-Other information technology personnel who want to move into solution architecture and who want to understand what it is- Consulting organisations and individuals who want to develop and offer value-adding solution architecture services

## **Scootermania**

Scooterboys are the lost tribe of British youth culture. Unrecognised, uncelebrated and unwanted; misunderstood by a general public who mistook us for Mods. We weren't Mods though. By the 1980s myself and tens of thousands of scooter riders collectively rejected that label. Instead, we took the roadmap of British youth disaffection and carved a new bypass. This route took us beyond the UK's faded seaside resorts, allowing us to spread our creed across the continents. Tuned and customised Vespa and Lambretta scooters gave us freedom to roam; transport to live for the weekend. Shared experiences of riots, local hostility and police harassment built strong fraternal bonds that endure to this day. Despite decades of two-wheeled rebellion our threat level was never high enough to put us on the national security radar. This low profile has its benefits. We aren't doomed to follow the same cycle as Mods. First feared, then pilloried, accepted and finally adopted as part of UK's rich culture. As British as a vindaloo. The cult of Scooterboy has escaped death-by-public-acceptance, simply by remaining too underground. Too difficult to distinguish from what came before. And that's just perfect. You'll never see Scooterboys parodied in TV insurance adverts or low budget fly-on-the-walls. The poorly-rendered caricature is always some cliché Mod on a 'Christmas Tree' scooter. If you rode to rallies in the 80s and 90s then this book will mirror your experiences. If you've never had a scooter then it offers a rare glimpse of life inside the lost tribe of two-stroke terrorists.

## **Graphic Violence**

From its origins the Italian battlefields of the Second World War, to movie roles as Audrey Hepburn's transport in Roman Holiday and Sting's stylish companion in Quadrophenia and on through the current vintage revival, the classic Italian motor scooter is an enduring design classic from the 20th century. Scootermania celebrates the superbly simple vehicles that are so symbolic of freedom, style and the modern world. Originating in the 1940s in Milan and Pontedera, Tuscany, the scooter became an enduring transport choice for young people and urban environments. Early chapters look at scooter racing and long-distance attempts,

and their role as an anti-tank weapon in the French army. There is engaging coverage of place of scooters in popular culture from films, music and fashion including the way that a host of disparate groups has made the bikes their own – from the British Mods of the 1960s and 1980s to their role in American and Japanese fashion and in their Italian homeland. The evolution and design of classic models as the Vespa 150 GS and the Lambretta Li 150 Series 3 are covered while scooter stars such as Enrico Piaggio and Georges Monneret are celebrated in their own words. The book also includes a number of specially photographed features on modern scooter designers, collectors and artists.

Thielicke here studies the themes of doubt and appropriation in modern Protestant thought. A leading advocate of dialectical theology, Thielicke examines the work of the great German Protestant religious philosophers from Lessing and Schliermacher through Barth and Tillich, probing these theologians' understanding of their context and how this tradition can impact our own engagement with our times. Clear, finely nuanced, historically and philosophically mature, this is a vital reflection on the history of theology and in systematic theology.

Phoenix from the Ashes is a comprehensive look at the state of the Catholic Church since the Second Vatican Council--one of a series of recurrent periods of moral and intellectual crisis to which it has succumbed in its history. A chapter on the Council describes in detail how Pope Paul VI diverted it by placing it under the exclusive control of European liberals. An equally close study is devoted to the liturgical "reform" entrusted by the same pope to a group of radicals whose work undermined the spiritual and devotional legacy of the faithful. The loss of orthodox teaching and the disorientation following upon these changes produced a grave crisis in both clergy and laity, but the movement of return to tradition visible today promises a revival of the full Catholic life of the Church. Catholic readers now have a complete and eminently accessible account of the last 50 years of momentous changes in the Church, right up to the pontificates of Benedict XVI and Francis I. "This wide-ranging account of the self-destruction of the Roman Catholic Church and its identification of her only realistic route back to the land of the living simultaneously strikes a blow at history's two most prevalent temptations: rejection or twisting of evidence in the service of an ideological thesis, and honest dedication to intense research on subjects whose ultimate existential value the 'unbiased' historian somehow fears to reveal to his readers. Henry Sire courageously shuts no doors and stifles no evidence, employing a passionate and lively prose that leaves no doubt regarding his sense of the crucial moral and cultural importance of his topic."--JOHN RAO, author of Black Legends and the Light of the World and Removing the Blindfold "For Catholics feeling lost at sea as a

result of the turbulent crisis tossing and flooding the Barque of Peter, Henry Sire's work identifies clear landmarks to steady our gaze. He situates the present disarray within the larger historical context of the Arian heresy and Protestant revolution, and points to the buoys of tradition--liturgical, doctrinal, and philosophical--as sure guides to our way out. Sire distills entire epochs of history, from the first centuries of the Church through the current pontificate, into a highly readable and thought-provoking story. In the course of his tale he exposes the radical progressivism of the Second Vatican Council and its after-effects as well as the tepid conservatism of the Reform of the Reform and the Hermeneutic of Continuity."--BRIAN M. MCCALL, author of *To Build the City of God* "Historian H.J.A. Sire has compiled a balanced assessment of the revolution in the Roman Catholic Church. His mastery of the material is complete. The book flows along easily and readers will finish it confident that they have a comprehensive understanding of the last 60 years in the Church."--ROGER MCCAFFREY, President, Roman Catholic Books "Thanks to Henry Sire's penetrating book, we have some profound answers to nagging questions. How did the West end up so quickly in a post-Christian age, when only decades ago one could still speak of a Christian culture? How did we go from the seemingly healthy Roman Catholic Church of the 1950s to the mass apostasy and grave scandals of recent years? As Sire shows, the antecedents go back quite far, in fact many centuries, but the possibility of healing and regeneration is not as remote as we think."--STEPHEN KLIMCZUK-MASSION, Senior Adviser, Hildebrand Project H.J.A. SIRE was born in 1949 in Barcelona of a family of French ancestry and was educated in England, at Stonyhurst College and at Exeter College, Oxford, where he took a degree in Modern History. He has written several books on subjects of Catholic history and biography and currently lives in Rome, where he works professionally as a historian.
