A twelve-and-a-half-year-old boy who is impoverished and abused has an amazing change in his life after he decides to help a discharged Canadian alcoholic war veteran survive for a few cold months from October to December 1945. The veteran is killed when he is run down by a streetcar. While the boy is spiritually motivated, his parents are infected with the archon disease. You will follow his life from twelve and a half until eighty years of age. This book tells a true story of someone who has, at this date, served forty-seven years in the light. It is not sentimental or is it namby-pamby. It describes what life is, like in the lower levels of a large Canadian city Toronto. It also describes what it is like to make a complete U-turn away from disaster.

In 1790 came that "extraordinary outburst of passionate intelligence," Mary Wollstonecraft's reply to Edmund Burke's attack on the principles of the French Revolution entitled a "Vindication of the Rights of Men." In this pamphlet she held up to scorn Burke's defence of monarch and nobility, his merciless sentimentality. "It is one of the most dashing political polemics in the language," Mr. Taylor writes enthusiastically, "and has not had the attention it deserves. . . . For sheer virility and grip of her verbal instruments it is probably the finest of her works. Some of her sentences have the quality of a sword-edge, and they flash with the rapidity of a practised duellist. It was written at a white heat of indignation; yet it is altogether typical of the writer that, in the midst of the work, quite suddenly, she had one of her fits of callousness and morbid temper, and declared she would not go on. With great skill Johnson persuaded her to take it up again; and with equal suddenness her eagerness returned, and the book was finished and published before any one else could answer Burke."

This book uses an in-depth, phenomenological interview approach to explain the generational characteristics of today's Chinese university youths and the critical dispositions they believe indispensable in acquiring English as an academic language in and outside school settings. By presenting the authentic voices of the recruited participants, the book clarifies how English for academic purposes (EAP), as an emerging global phenomenon and a research-informed practice, enables and empowers them for conscious self-transformation and critical awareness development through language study. The book also explores issues arising in the fields of general English language teaching as well as traditional and critical EAP, and discusses university English language learners' learning needs and rights. The book further promotes a dynamic and transformative University EAP pedagogy of particularity, practicality, and possibility moving from the oppression of language education to its liberation, and the increasing critical consciousness among the present and future university youths in a time of great social changes.

One of the most significant developments in school education in recent years has been the development and introduction of standards, a subject of considerable controversy. This book is the result of a symposium held in Kiel, a symposium that was arranged by two leading science education groups, one at IPN (Leibniz Institute for Science Education at the University of Kiel) in Germany and the other at the University of York, UK. The seminar brought

together experts from 15 countries. These countries include those that have extensive experience with the effects of standards on the educational system, on individual schools and teachers and on students. Other reports concern countries which are introducing them shortly and yet others on countries that are in the early stages of development of standards. 11 are from Europe and the others are from Australia, Israel, Taiwan and the U.S. The book is divided into three parts. In Part A, two of the organizers set the scene, describing the reasons for arranging the symposium and outlining the preparations and the work done at the meeting. Part B contains 17 reports from the 15 countries and in Part C, there are two summaries, analysing the conclusions, taken from two different vantage points. The controversies surrounding standards remain. However, this book gives a succinct and authoritative overall account of the advantages and disadvantages of their introduction taken from the experiences of many countries.

A Vindication of the Rights of Men

The rise and fall of the British Empire profoundly shaped the history of modern Scotland and the identity of its people. From the Act of Union in 1707 to the dramatic fall of the British Empire following the Second World War, Scotland's involvement in commerce, missionary activity, cultural dissemination, emigration, and political action could not be dissociated from British overseas endeavours. In fact, Scottish national pride and identity were closely associated with the benefits bestowed on this small nation through its access to the British Empire. By examining the opinions of Scots towards the empire from numerous professional and personal backgrounds, Scotland emerges as a nation inextricably linked to the British Empire. Whether Scots categorized themselves as proponents, opponents, or victims of empire, one conclusion is clear: they maintained an abiding interest in the empire even as it rapidly disintegrated during the twenty-year period following the Second World War. In turn, the end of the British Empire coincided with the rise of Scottish nationalism and calls for Scotland to extricate itself from the Union. Decolonization had

a major impact on Scottish political consciousness in the years that followed 1965, and the implications for the sustainability of the British state are still unfolding today.
