Keep in mind that since most digital SLR cameras don't come with built-in storage, you'll need a memory card, probably either an SD (secure digital) card or a CF (compact flash) card, so you can save the shots you want to keep, at the image file size you prefer.

### **Digital single-lens reflex camera - Wikipedia**

A digital single-lens reflex camera (digital SLR or DSLR) is a digital camera that combines the optics and the mechanisms of a single-lens reflex camera with a digital imaging sensor.. The reflex design scheme is the primary difference between a DSLR and other digital cameras. In the reflex design, light travels through the lens and then to a mirror that alternates to send the image to either

Before digital photography the only way to work in black and white was to use black and white film. Thankfully, now it's much easier to work in black and white, just by switching your camera to Monochrome Mode (check your camera's manual if you are unsure how to do so, look for Picture Styles settings).
