If your Honda airbag light remains on, it most likely means that the Supplemental Restraint System (SRS) has detected a problem with the airbag system. When your Honda airbag system functions properly, the airbag light comes on when you turn on the ignition but should turn off once you start the engine. If the airbag system detects a problem, you will see the airbag light stay on.

Honda Reliability - 2021 Ratings | RepairPal

Even though Hondas are quite reliable, a few models, such as the Honda Odyssey or Honda Accord, were prone to having transmission problems. Once the transmission starts to fail or slip, you could end up with a check engine light on and a fault code in the P0700-P0799 range indicating a transmission problem.
