American Ammunition and Ballistics

John Nosler - Going Ballistic is the story of John Nosler - a hunter, innovator and self-taught ballistics engineer. Born in California, he came of age in the Great Depression and raced his home-built cars on the dirt tracks of Huntington Beach and Pomona. From California, he moved to Oregon and embarked on a legendary big game hunting career. He first hunted moose in Canada in the 1940s and recognized the need for a projectile that would stand up to the velocity generated by the new magnum rifle cartridges. When hunters want a bullet they can depend on, the name they trust, more than any other, is Nosler. From the Partition, introduced to the shooting public in the late 1940s, to the Zippedo, Solid Base and Ballistic Tip, to today's cutting-edge AccuBond, John Nosler built a reputation on accuracy and performance, one bullet at a time. You know his bullets, now read his story.

Reloading for Handgunners

Learning how to reloading ammunition can be a daunting task. Technical manuals and books full of arcane data can make the subject mysterious and overwhelming. No more! The Practical Guide to Reloading Ammunition teaches the subject in a fun, easy-to-understand, and safe manner. Starting from the very beginning, The Practical Guide to Reloading Ammunition

will help readers understand the gear they need - and what can wait. Chapter by chapter, the book explains the entire process from brass cleaning to final inspection. Loaded with pictures and illustrations, the process is made simple and clear. With this book, readers will be reloading their own cost-effective ammunition quickly and safely. The Practical Guide to Reloading ammunition focuses on the "how-to" aspects of reloading. Author Tom McHale explains. "Think of reloading manuals as sheet music. And this book as Mrs. Clutterbuck's piano lessons. If one develops a sudden urge to play Carnegie Hall, or even Bodean's Wet Whistle Bar and Bait Shop, they could just order sheet music from the Internet. But it probably wouldn't be the most direct path to ivory key success. Take some lessons first, then order the sheet music." Although the author believes reading this book will be a far more pleasant experience than weekly lessons in Mrs. Clutterbuck's den, the idea is the same. The guide will teach aspiring reloaders how to get started. Topics Include: * Why take up reloading? * Is reloading right for you? * What equipment do you need? * Cleaning and processing brass. * The reloading process: step by step. * Pistol caliber reloading. * Rifle caliber reloading. * Buying reloading components. * Advanced equipment options - how gear can speed up the process. * Introduction to advanced topics.

Accuracy and Precision for Long Range Shooting

“Over half a century has passed since I cut my teeth on an old .36 Navy Colt. For 40 years I have almost never been out of easy reach of a good sixgun. Thirty years I spent in the saddle, packing, punching cows and breaking saddle brones. The sixgun was worn just as regularly as my pants and many times was much more important to my existence. It pulled me out of several tight scrapes with wild horses, wilder cattle and some big game. Though I have witnessed several gun fights, have had guns pulled on me and have been shot at several times, I have never had to use my gun on a man. Several times it was touch-and-go and perhaps only the current knowledge that I was both fast and accurate with a sixgun saved me from being embroiled. Though I do not recommend a sixgun for big game, thirty head of big game have fallen to mine, including elk, bear, deer, cougar, mountain goat and javelina. I have also trailed up a great many big game animals of various species that were wounded by sportsmen and then I finished them off. No record was kept of these or the many coyotes, bobcats and lesser game, or the livestock I have had to kill.” This classic includes the following chapters: Introduction I. History of the Sixgun II. Selecting the Handgun III. Learning To Shoot IV. Sixgun Sights V. Long Range Shooting VI. Game Shooting VII. Double Action Shooting VIII. Gun Rigs and Holsters IX. Quick Draw and Hip Shooting X. Gun Fighting XI. Revolver Versus Auto Pistol XII. Aerial and Trick Shooting XIII. Slip Shooting, Fanning, Cavalry Guns XIV. Loading and Management of Cap and Ball Sixguns XV. Repairs, Remodeling, Resighting XVI. A Bullet Chapter XVII. Cartridge Reloading XVIII. Selection of Cartridges XIX. Ornamentation, Barrel Lengths, Balance, Velocities XX.
