Five generations of Marnie O. Mamminga's family have been rejuvenated by times together in Wisconsin's Northwoods. In a series of evocative remembrances accompanied by a treasure trove of vintage family photos, Mamminga takes us to Wake Robin, the cabin her grandparents built in 1929 on Big Spider Lake near Hayward, on land adjacent to Moody's Camp. Along the way she preserves the spirit and cultural heritage of a vanishing era, conveying the heart of a place and the community that gathered there. Bookended by the close of the logging era and the 1970s shift to modern lake homes, condos, and Jet Skis, the 1920s to 1960s period covered in these essays represents the golden age of Northwoods camps and cabins—a time when retreats such as Wake Robin were the essence of simplicity. In Return to Wake Robin, Mamminga describes the familiar cadre of fishing guides casting their charm, the camaraderie and friendships among resort workers and vacationers, the call of the weekly square dance, the splash announcing a perfectly executed cannonball, the lodge as gathering place. By tracing the history of one resort and cabin, she recalls a time and experience that will resonate with anyone who spent their summers Up North—or wishes they had.

The cabin is perhaps the most iconic of American structures, harkening back to colonial and pioneer days. They recall a time before cell phones and email, evoking images of cozy fireplaces and quiet contemplation. For many, the cabin also summons forth images of logs and plaid, plank floors and lofted beds. The *Cabin Book* offers a wonderful variety of forms and explores the most innovative designs in cabin architecture. Once rustic and simple, the cabin is now comfortable and

chic, putting owners in the heart of the wilderness while providing comfort and beauty so they can get away in style. Among the 25 cabins included is a little-known Wisconsin cabin designed by Frank Lloyd Wright; an upstate Michigan log cabin designed by renowned architect Anthony Belluschi; and a one-room "urban" cabin in Portland, Oregon. One couple designed a cabin-all on one floor-without the use of right angles. Whether ensconced in glass or surrounded by an enormous porch, these cabins speak of personal style, perfect for the rugged or the sybaritic. Like cottages, the cabin is one of the most popular house styles, since it is small enough to be inexpensive and easy to maintain. Everyone dreams of an idyllic retreat, and this book showcases its best examples. The cabin is perhaps the most iconic of American structures, harkening back to colonial and pioneer days. ### **Popular Science Monthly**

This is the definitive book on the style, architecture, design, and natural beauty of the Adirondack Great Camps. The Adirondack Great Camps as well as their furnishings are some of the most iconic of American architecture and design. Harkening back to nineteenth-century tycoons and continuing today, this style is driven by the call to a simpler life in harmony with these mountains. Approximately forty of these camps both historic and contemporary and their glorious

environments represent this celebration of one of America's true regional treasures. An afterword by a curator of The Adirondack Museum highlights the craft tradition of the Great Camps. The wild beauty and serenity of the Adirondacks have always attracted those who sought a simpler life and a connection to nature. This is a land of spectacular beauty, with iconic elements such as the sugar maple and white birch; bobcat, beaver, and moose; majestic loon and great blue heron. It should come as no surprise then, that the robber barons and business tycoons of the 1800s turned to this leafy haven to escape the urban jungle. They constructed compounds in and around Raquette Lake as rustic getaways, and these grand structures became known as the Great Camps of the Adirondacks. Each Great Camp was more beautiful than the next. The rough-hewn, timber exteriors contrasted the elegant interiors, which included complex stonework and hand-carved furniture. Natural elements such as tree roots, fungi, twigs, and bark, often played an integral part in the décor--the simple yet elegant Adirondack chair has become an international symbol of leisure. Today, approximately 40 Great Camps have survived, including 10 that are National Historic Landmarks. Some are open to the public as landmarks and lodges, while others remain in private hands. These structures echo the greatness of their past and enhance the natural beauty of the region, while providing us with a link to our nation's rich history of environmental preservation balanced with economic growth. Just the list of camp names reads like a history of the Adirondacks: Sagamore, Hedges, Pine Knot, Waldheim, The Point, Santanoni, Top Ridge, White Pine, Clear Lake, Prospect Point, Northbrook, Whiteface Lodge, Carolina, Regis/Applejack, Gull Rock, Huntington, Pritz, Three Star, Wanonah, Wellscroft, Birch Point, Pinebrook, Hemlock Ledge, North Point, Bluff Point at Raquette Lake, Lake Placid Lodge, Moss Ledge, Wildair, Winnetaska, Boulder Isle, Sekon, Kildare, Uplands, Minnowbrook, Uncas, Covewood, Big Moose Chapel, Potluck, Albedor, and Paownyc.

## Cottage Building

Many generations ago, the cabin was the backbone of American life; it was the headquarters of that important unit--the home. It provided shelter, protection, and a foundation upon which to build a great empire. The pioneer cabin, understandably, was a necessity. Even in today's modern and complex world, many people still reside in cabins built to withstand permanent housing. In addition, cabins that serve as hunting and fishing lodges, summer cottages, and bungalows are seen as recreational luxuries. Cabins are healthy investments--when built correctly and cared for continuously, that is. Originally published in 1934, *How to Build Cabins, Lodges, and Bungalows* is both a historical and practical text that offers step-by-step instructions on how to build these structures and their various components: doors, windows, shutters, fireplaces,

chimneys, porches, and more. In addition to shedding light on how cabins, lodges, bungalows—and even wayside stands and tourist homes—are built, the editors of Popular Science Monthly also included ideas for furnishing and decorating the finished homes and lodges, along with suggested lands on which to build them and tips on how to finance them.

Here is the ultimate resource for finally turning your dream into reality. With photos, blueprints, and diagrams, Fears thoroughly covers the process of constructing the cabin you've always wanted. From buying land, construction materials, deciding on lighting, the water system, and on-site constructions—such as shooting ranges, an outhouse, or an outside fire ring—this is a book filled with nuggets of wisdom from a specialist in the field: J. Wayne Fears is a wildlife biologist by training who has organized big-game hunting camps, guided canoe trips, and run commercial getaway operations. He built his own log cabin in the early 1990s and has been enjoying it ever since. Now you can build and enjoy the cabin you've always dreamed of, too.

You know you are walking in to something extraordinary the moment you enter Timberline Lodge on Mt Hood. There is no other building like it in the world. Newels are the posts at the end of each railing on the stairs. At Timberline they were made from recycled cedar telephone poles. Each newel in the main and south stairways feature a unique carving of a bird and animal of the Pacific Northwest. This book is a collection of my drawings of the newels in the order you would see them starting on the ground floor walking up the stairs.

2015 Reprint of 1947 Edition. Exact facsimile of the original edition, not reproduced with Optical Recognition Software. Whether a pioneer log cabin in a clearing or a comfortable, smoothly build lodge at the lake is desired, this is the book for the person who understands the rugged beauty of a cabin made to fit its surroundings. Beginning from the basic step—the selection of a proper sight for the cabin—the author takes the reader through all the problems and work of acquiring materials, as well as building and finishing the smaller type of cabin of two or three rooms. Fundamentals of drainage, construction, finishing and repair are completely and clearly explained in the author's readable, simple text. Drawings by the author illustrate each step in the preparing and building processes, and sharp photographs show the log cabin in various stages of completion. With emphasis on the simple and practical steps in log cabin building, the author takes up the basic requirements for a comfortable log cabin.
