The agroecological transition of agricultural systems in the Global South

Engendering Human Rights brings together distinguished scholars and feminist activists in a collection of essays on human rights in Africa. Contributors explore the formulating, monitoring, reporting, and implementation of human rights in Africa and the African Diaspora. The individual chapters examine how human rights frameworks and practices differ in various political, economic, social, cultural, racial and gendered contexts throughout Africa.

South Africa

The dominant culture of industrial civilisation is highly materialistic, holding up Western-style, consumer lifestyles as the path to happiness and fulfilment. But consumer lifestyles are failing to satisfy the human craving for meaning, and they are degrading our planet in ways that are grossly unsustainable and unjust. We desperately need to explore or rediscover less materialistic, 'simpler' ways of living. 'Simple living' refers to ways of life based on notions such as frugality, sufficiency, moderation, and mindfulness. This anthology brings together twenty-six short essays discussing the most significant individuals, cultures, and movements that have embraced simple living throughout history. What did Buddha

and Jesus think about simple living? What contribution did the ancient Greeks and Romans make? How do the Amish and the Quakers live? And why did Henry Thoreau leave his hometown to live in the woods? Readers will also gain insight into the lives and philosophies of people like Mahatma Gandhi and William Morris, and learn about contemporary eco-social movements, such as those based on permaculture, intentional communities, degrowth, and voluntary simplicity. This deep but engaging book examines these great moments in the story of simple living, and many more, but it looks backwards in order to shed light on the present and future. Read it and be inspired. 'This engaging book raises one of the key questions of our times, presenting a rich tapestry of perspectives on what it means to live simply.' - ROB HOPKINS, *The Transition Handbook* 'Simple Living in History challenges the mentality of waste and extravagance that defines modern industrial lifestyles, reminding us that the answers we need have been here all along, waiting for us to notice them.' - JOHN MICHAEL GREER, *The Wealth of Nature and Green Wizardry* 'This book highlights the continuous cultural lineage that underpins current activism for an ecologically viable and spiritually nourishing life now and in the future. For permaculture practitioners and activists focused on building ecologically smart, localised economies, this book highlights how rethinking our attitudes and behaviour toward consumption can be a fruitful pathway to social and ecological harmony.' - DAVID HOLMGREN, *Permaculture: Principles and Pathways beyond Sustainability*

The Encyclopedia of Addictive Drugs

The Art of Life and Death explores how the world appears to people who have an acute perspective on it: those who are close to death. Based on extensive ethnographic research, Andrew Irving brings to life the lived experiences, imaginative lifeworlds, and existential concerns of persons confronting their own mortality and non-being. Encompassing twenty years of working alongside persons living with HIV/AIDS in New York, Irving documents the radical but often unspoken and unvoiced transformations in perception, knowledge, and understanding that people experience in the face of death. By bringing an "experience-near" ethnographic focus to the streams of inner dialogue, imagination, and aesthetic expression that are central to the experience of illness and everyday life, this monograph offers a theoretical, ethnographic, and methodological contribution to the anthropology of time, finitude, and the human condition. With relevance well-beyond the disciplinary boundaries of anthropology, this book ultimately highlights the challenge of capturing the inner experience of human suffering and hope that affect us all--of the trauma of the threat of death and the surprise of continued life.

Teaching Translation from Spanish to English

The symposium, attended by some 100 participants, discussed the economic

benefits of irradiation to control a number of foodborne diseases, especially those originating from consumption of food of animal origin and of its use as a quarantine treatment for fresh fruits and vegetables. Case studies on the economic feasibility of food irradiation in developing countries were presented, as well as the experience in marketing irradiated food in the USA and elsewhere.

Airport Maintenance Supervisor

A is for algae, B is for barrier reef, C is for clam in this "fantastic" touch-and-feel board book. Babies and toddlers will love to look at the adorable artwork of Mr. Fish's undersea world as they learn their letters from A to Z. Little hands will be eager to touch, feel, and explore the many different textures on each captivating spread.

Simple Living in History

This is the rare manuscript of a book George DeMohrenschildt was writing at the time of his death in March 1977 - right before he was scheduled to appear before the House Committee on Assassinations. In it, DeMohrenschildt gives many details about his activities and associations, and perhaps most significantly, an insight into how he perceived his relationship with Lee Harvey Oswald. The facts and

information in this manuscript differ from, and occasionally boldly contradict, statements made by DeMohrenschildt to several government agencies at the time of the assassination. While there is no longer any way to confront DeMohrenschildt with the discrepancies, the manuscript nevertheless sheds light on at least how George DeMohrenschildt, himself, viewed those facts, and how he wanted the public record to read about himself and Oswald.

The Cheater's Guide to Love

This essential manual helps educators comfortably and knowledgeably bring comprehensive sex education to the special education classroom. Drawing on firsthand experience and real-world examples, the first half provides background material—including common roadblocks—and tools for how to effectively partner with parents. The second half breaks down the how-tos of implementing a successful sex education program and troubleshoots tricky situations that might come up in the special education classroom. Written in accessible, person-first language, this guide equips you with best practices for providing students with developmental disabilities with the knowledge and tools to engage in healthy relationships and live full lives as self-advocating sexual beings.

The AIDS Conspiracy

* A one-stop source for current developments, cutting-edge planning and managing techniques, new technologies, statistics, trends, and regulatory issues * Expert guidance on airport site selection, design, access, financing, law and regulation, security, capacity, and technological advances * NEW and expanded airspace and air traffic control system coverage * NEW breakout of key Federal Aviation Regulations, Advisory Circulars, forms, etc.

Ben & Jerry's Homemade Ice Cream & Dessert Book

Agroforestry in Sustainable Agricultural Systems

Agroforestry in Sustainable Agricultural Systems examines the environmental and social conditions that affect the roles and performance of trees in field- and forest-based agricultural production systems. Various types of ecological settings for agroforestry are analyzed within temperate and tropical regions. The roles of soil, water, light, nutrient and pest management in mixed, annual, woody perennial and livestock systems are discussed. Important new case studies from around the world offer innovative strategies that have been used successfully in raising forests and tree products on a sustainable basis for commercial harvesting and for providing other environmental services in land conservation and watershed

management.

A History of Cornell

With little skill, surprisingly few ingredients, and even the most unsophisticated of ice-cream makers, you can make the scrumptious ice creams that have made Ben & Jerry's an American legend. Ben & Jerry's Homemade Ice Cream & Dessert Book tells fans the story behind the company and the two men who built it—from their first meeting in 7th-grade gym class (they were already the two wisest kids on the field) to their "graduation" from a \$5.00 ice-cream-making correspondence course to their first ice-cream shop in a renovated gas station. But the best part comes next. Dastardly Mash, featuring nuts, raisins, and hunks of chocolate. The celebrated Heath Bar Crunch. New York Super Fudge Chunk. Oreo Mint. In addition to Ben & Jerry's 11 greatest hits, here are recipes for ice creams made with fresh fruit, with chocolate, with candies and cookies, and recipes for sorbets, sundaes, and baked goods.

Restless Legs Syndrome/Willis Ekbohm Disease

Mountains Beyond Mountains

Paris. The name alone conjures images of chestnut-lined boulevards, sidewalk cafés, breathtaking façades around every corner--in short, an exquisite romanticism that has captured the American imagination for as long as there have been Americans. In 1995, Adam Gopnik, his wife, and their infant son left the familiar comforts and hassles of New York City for the urbane glamour of the City of Light. Gopnik is a longtime New Yorker writer, and the magazine has sent its writers to Paris for decades--but his was above all a personal pilgrimage to the place that had for so long been the undisputed capital of everything cultural and beautiful. It was also the opportunity to raise a child who would know what it was to romp in the Luxembourg Gardens, to enjoy a croque monsieur in a Left Bank café--a child (and perhaps a father, too) who would have a grasp of that Parisian sense of style we Americans find so elusive. So, in the grand tradition of the American abroad, Gopnik walked the paths of the Tuileries, enjoyed philosophical discussions at his local bistro, wrote as violet twilight fell on the arrondissements. Of course, as readers of Gopnik's beloved and award-winning "Paris Journals" in *The New Yorker* know, there was also the matter of raising a child and carrying on with day-to-day, not-so-fabled life. Evenings with French intellectuals preceded middle-of-the-night baby feedings; afternoons were filled with trips to the Musée d'Orsay and pinball games; weekday leftovers were eaten while three-star chefs debated a "culinary crisis." As Gopnik describes in this funny and tender book, the dual processes of navigating a foreign city and becoming a parent are not completely dissimilar journeys--both hold new routines, new languages, a new set

of rules by which everyday life is lived. With singular wit and insight, Gopnik weaves the magical with the mundane in a wholly delightful, often hilarious look at what it was to be an American family man in Paris at the end of the twentieth century. "We went to Paris for a sentimental reeducation-I did anyway-even though the sentiments we were instructed in were not the ones we were expecting to learn, which I believe is why they call it an education."

Airport Planning & Management

The definitive guide to airport planning and management—fully updated with the latest advances in the industry. This thoroughly revised guide covers all aspects of airport infrastructure—from the airfield and runway to airspace, air traffic control, and terminal and security systems. Airport Planning & Management, Seventh Edition clearly explains the FAA's National Plan of Integrated Airport Systems (NPIAS), historical and current legislation and regulations, FAR Part 139, and more. You'll explore cutting-edge concepts such as automation, smart baggage handling, enhanced security, and analytics. Updated questions for review and discussion will bring new insights to your knowledge of how airports are planned and managed. Coverage includes:

- An introduction to airports and airport systems
- Airport and airport systems organization and administration
- Historical and legislative perspectives
- The airfield
- Airspace and air traffic management
- Airport operations management under FAR Part 139
- Airport terminals and ground access

•Airport security •Airport financial management •Economic, political, and social role of airports •Airport planning •Airport capacity and delay •The future of airport management

Engendering Human Rights

A richly illustrated anthology on the textiles and clothing cultures of China, India and Europe.

Chemistry , Biochemistry and Ayurveda of Indian Medicinal Plants

Psychedelic Resource List

The Laguna Madre of Texas and Tamaulipas is the only hypersaline coastal lagoon on the North American continent and only one of five worldwide. Extending along 277 miles of shoreline in South Texas and northeastern Mexico, the lagoon is renowned for its vast seagrass meadows, huge wintering redhead population, and bountiful fishing grounds. Recent concerns about increasing human activity have focused attention on the long-term health of the Laguna Madre as growing

population pressures, pollution problems, and dredging threaten this unique ecosystem. The Nature Conservancy, whose mission is the conservation of biodiversity through protection of habitat, recognized the need to compile all known information about the Laguna Madre in order to move ahead with a science-based conservation agenda. This book is the result. Taking an ecosystem approach to the study of this rich habitat, the authors first provide an overview of the natural history of the Laguna Madre and adjacent areas, including an essay on the importance of the region's private ranches. Succeeding chapters discuss the diverse natural resources of the lagoon—seagrasses, open bays, tidal flats, barrier islands, abundant waterfowl, colonial waterbird rookeries, sea turtles, and fisheries. A final section identifies information gaps, offers a conservation framework, and makes recommendations for preserving the biodiversity of this complex and special ecosystem. Over seventy years of literature on the Laguna Madre and surrounding environments has been synthesized here. With 150 figures and illustrations, the book is the first to take a broad and comprehensive look at both the Texan and Tamaulipan Laguna Madre. For scientists, conservationists, resource managers, and policy makers involved in the future of the Texas and Mexico coasts, the value of this book is clear. And coastal residents, birders, anglers, and nature lovers who want to learn about and take care of the Laguna Madre will find this to be an indispensable guide.

I Am a Patsy! : My Contact with Lee Harvey Oswald, the Warren

Commission, and the JFK Assassination Conspiracy

Food security, jobs, ecological transition of agricultural production models and consumption patterns Agroecology could be one of the solutions to meet the future challenges of humanity. Part of the United Nation's 17 Sustainable Development Goals, it requires a lasting commitment from all of us. To meet the food and economic needs of growing rural and urban communities, fulfil increasingly demanding consumer requirements, conserve natural resources and adapt to climate change, we have to find new ways of agricultural production. Over the last decade, CIRAD and AFD have conducted experiments in agroecological transitions with farmers, researchers, development agents and policymakers in many countries of the Global South. In this book, they reflect on the future of agroecology as a way for agriculture in the developing world to adapt to global changes and they examine the conditions necessary for a successful agroecological transition.

The Pout-Pout Fish Undersea Alphabet

Examines conspiracy theories surrounding HIV and AIDS, focusing on two main widely believed falsehoods--that America manufactured AIDS to be a biological weapon and the belief that HIV is harmless and the true cause of AIDS are

antiretroviral drugs.

The Art of Life and Death

Due to the fact that Restless Legs Syndrome/Willis-Ekbom Disease is usually a chronic condition, this book aims to provide physicians with the necessary tools for the long-term management of patients with RLS. The first part of the book addresses the various comorbidities and long-term consequences of RLS on life quality, sleep, cognitive, psychiatric and cardiovascular systems, while the second part focuses on the management of long-term treatment and the drug-induced complications in primary RLS and in special populations. Written by experts in the field, this practical resource offers a high-quality, long-term management of RLS for neurologists, sleep clinicians, pulmonologists and other healthcare professionals.

Airport Planning & Management, Seventh Edition

"If you're just beginning to dive into the world of 3D, this is the book for you."
—Animation Magazine Alias' Academy Award winning Maya 3D animation and effects software leads the industry in technological innovation. Film and video artists, computer game developers, and design professionals rely on Maya to

create brilliant digital imagery, animation, and visual effects. Now you can enter this exciting, imaginative world and learn to build, render, and animate your own digital characters and scenes. Brought to you by Maya Press, a publishing partnership between Sybex and Alias, *Introducing Maya 6: 3D for Beginners* is the ideal initiation to 3D and Maya. Written explicitly for the Maya novice, the easy-to-grasp text offers a practical and fun approach to learning Maya's core features. Clear-cut, engaging lessons let you try out these features using working files provided on the CD. You'll also find an abundance of instructional and inspirational art on the CD and full-color insert. Enter a New Dimension Get a solid grasp of the core Maya and 3D Learn to navigate the new Maya 6 interface Experiment with Maya modeling Explore the basics of NURBS, polygons, and subdivision surfaces Discover the nuances of shading and texturing Try your hand at animation Get a feel for Maya lighting, rendering, and dynamics Find out how to use Maya and Photoshop in unison Note: CD-ROM/DVD and other supplementary materials are not included as part of eBook file.

Heritage, Culture and Society

Draws together information from a variety of sources to list and describe more than 130 addictive drugs, including both natural substances and pharmaceutical products.

Twelve Years a Slave

This book aims to discuss and practices all the issues pertaining to medicinal plants research, documentation, utilization. conservation activities, standardization, quality control, tissue culture, biotechnology, biochemistry, phytochemistry and chemical characterization taking place in various Universities, Institutions, Colleges and their impact on medicinal plants.

AIDS in Africa

This pioneering work defines spasticity in the broad context of Upper Motor Neuron Syndrome and focuses not on a single component, but on the entire constellation of conditions that make up the UMNS and often lead to disability. Spasticity: Diagnosis and Treatment clearly defines the process for the diagnosis of spasticity, the basic science behind its pathophysiology, the measurement tools used for evaluation, and reviews the available treatment options. Divided into five sections, this comprehensive clinical resource provides a roadmap for assessing the complicated picture of spasticity and choosing the appropriate interventions. Therapies including oral medications, intrathecal baclofen, botulinum toxin and phenol, and surgical options are thoroughly discussed, as are non-medical therapies and the role of the emerging technologies. The full spectrum of diseases

involving spasticity in adults and children and the unique diagnostic and management challenges they present is addressed by experienced clinicians. This text is a one-stop source for physicians, therapists and other members of the spasticity management team tasked with the goal of improving patient care and outcomes.

Capability Development in Support of Comprehensive Approaches: Transforming Internation Civil-Military Interactions

When the late Professor Joachim Illies suggested in 1980 that I edit a volume of the *Monographiae Biologicae* on Sri Lanka, I was glad to accept the challenge. Although I had spent only six years of my research and teaching career in Sri Lanka, I had made personal contact or corresponded with many scientists who had worked in, still work in, or who have studied material from Sri Lanka. The present domicile of the authors of the chapters in this volume shows the wide geographic spread of interest in Sri Lanka, and indicates also the dispersion of Sri Lankan scientists like myself. Sri Lanka has had a relatively long history of indigenous scientific research in the natural sciences. From the early work of Kelaart (1852, *Prodromous Fauna Zeylanicae*, Ceylon Govt. Press, 250 pp.) to the present time, there has been a more or less sustained research effort in the natural sciences.

The Colombo Museum, which celebrated its centenary only a few years ago, and the world famous Peradeniya Botanical Gardens, served as repositories and bases for continued research on the fauna and flora. There are a number of land marks in these studies.

Paris to the Moon

While many professional translators believe the ability to translate is a gift that one either has or does not have, Allison Beeby Lonsdale questions this view. In her innovative book, she demonstrates how teachers can guide their students by showing them how insights from communication theory, discourse analysis, pragmatics, and semiotics illuminate the translation process. Challenging long-held assumptions, she establishes a fascinating framework on which to base the structure of a professional prose-translation class. Her original contributions to the question of directionality and to the specific strategies of translating are applicable to not only the teaching of translation from Spanish to English, but to other teaching situations and to other pairs of languages as well. She also reviews the latest attempts in translation theory to define and contextualize ideal translator competence, student translator competence, and general translation strategies. Beeby Lonsdale completes her book by applying her conclusions to selecting and organizing the content of teaching translation from Spanish to English. She illustrates one or more of the basic translation principles through 29 teaching units,

which are prefaced by objectives, tasks, and commentaries for the teacher, and through 48 task sheets, which show how to present the material to students.

Global Textile Encounters

Prepare the Army for War

Our day-to-day experiences over the past decade have taught us that there must be limits to our tremendous appetite for energy, natural resources, and consumer goods. Even utility and oil companies now promote conservation in the face of demands for dwindling energy reserves. And for years some biologists have warned us of the direct correlation between scarcity and population growth. These scientists see an appalling future riding the tidal wave of a worldwide growth of population and technology. A calm but unflinching realist, Catton suggests that we cannot stop this wave - for we have already overshot the Earth's capacity to support so huge a load. He contradicts those scientists, engineers, and technocrats who continue to write optimistically about energy alternatives. Catton asserts that the technological panaceas proposed by those who would harvest from the seas, harness the winds, and farm the deserts are ignoring the fundamental premise that "the principals of ecology apply to all living things." These principles tell us that,

within a finite system, economic expansion is not irreversible and population growth cannot continue indefinitely. If we disregard these facts, our sagging American Dream will soon shatter completely.

Governing the Nexus

The Airport Maintenance Supervisor Passbook(R) prepares you for your test by allowing you to take practice exams in the subjects you need to study. It provides hundreds of questions and answers in the areas that will likely be covered on your upcoming exam, including but not limited to: maintenance and repair of airport facilities; airport snow and ice removal; mechanical and electrical repairs; office record keeping; preparing written material; supervision; and other related areas.

AIRPORT PLANNING AND MANAGEMENT 6/E

Heritage, Culture and Society contains the papers presented at the 3rd International Hospitality and Tourism Conference (IHTC2016) & 2nd International Seminar on Tourism (ISOT 2016), Bandung, Indonesia, 10—12 October 2016). The book covers 7 themes: i) Hospitality and tourism management ii) Hospitality and tourism marketing iii) Current trends in hospitality and tourism management iv) Technology and innovation in hospitality and tourism v) Sustainable tourism vi)

Gastronomy, foodservice and food safety, and vii) Relevant areas in hospitality and tourism Heritage, Culture and Society is a significant contribution to the literature on Hospitality and Tourism, and will be of interest to professionals and academia in both areas.

Overshoot

This comprehensive volume provides a balanced and easily readable account of the rise of modern sleep medicine, its history and developmental milestones. Authored by an international group of experts, the remarkable progress and fascinating evolution from rudimentary concepts of the ancient prehistoric and early classical periods to our contemporary knowledge are covered in detail. These examples and their relationship to modern therapies offer neurologists, psychiatrists, respiratory specialists, clinicians, researchers and those interested in sleep medicine an important perspective to the origins of current practice.

Introducing Maya 6

“[A] masterpiece . . . an astonishing book that will leave you questioning your own life and political views . . . Kidder opens a window into Farmer’s soul, letting the reader peek in and see what truly makes the good doctor tick.”—Nicholas Thomas,

USA Today In medical school, Paul Farmer found his life's calling: to cure infectious diseases and to bring the lifesaving tools of modern medicine to those who need them most. Tracy Kidder's magnificent account shows how one person can make a difference in solving global health problems through a clear-eyed understanding of the interaction of politics, wealth, social systems, and disease. Profound and powerful, *Mountains Beyond Mountains* takes us from Harvard to Haiti, Peru, Cuba, and Russia as Farmer changes people's minds through his dedication to the philosophy that "the only real nation is humanity." Praise for *Mountains Beyond Mountains* "A true-to-life fairy tale, one that inspires you to believe in happy endings . . . Its stark sense of reality comes as much from the grit between the pages as from the pure gold those pages spin."—Laura Claridge, *Boston Sunday Globe* "Stunning . . . *Mountains Beyond Mountains* will move you, restore your faith in the ability of one person to make a difference in these increasingly maddening, dispiriting times."—John Wilkens, *The San Diego Union-Tribune* "Easily the most fascinating, most entertaining and, yes, most inspiring work of nonfiction I've read this year."—Charles Matthews, *San Jose Mercury News* "It'll fill you equally with wonder and hope."—Cathy Burke, *People* "In this excellent work, Pulitzer Prize-winner Kidder immerses himself in and beautifully explores the rich drama that exists in the life of Dr. Paul Farmer. . . . Throughout, Kidder captures the almost saintly effect Farmer has on those whom he treats."—*Publisher's Weekly* (starred review) "[A] skilled and graceful exploration of the soul of an astonishing human being."—*Kirkus Reviews* (starred review)

Ecology and Biogeography in Sri Lanka

Originally published by the U. S. Army in 1993 to mark the 20th anniversary of the Army's establishment of the Training and Doctrine Command, or TRADOC, as the major innovation in its post-Vietnam War organization. The Office of the Command Historian has produced a historical assessment that surveys the reasons for the 1973 reorganization and the role TRADOC played in carrying out its assigned mission responsibilities as the instrument for change and development in the Army.

The Laguna Madre of Texas and Tamaulipas

Cornell University is fortunate to have as its historian a man of Morris Bishop's talents and devotion. As an accurate record and a work of art possessing form and personality, his book at once conveys the unique character of the early university—reflected in its vigorous founder, its first scholarly president, a brilliant and eccentric faculty, the hardy student body, and, sometimes unfortunately, its early architecture—and establishes Cornell's wider significance as a case history in the development of higher education. Cornell began in rebellion against the obscurantism of college education a century ago. Its record, claims the author, makes a social and cultural history of modern America. This story will undoubtedly

entrance Cornellians; it will also charm a wider public. Dr. Allan Nevins, historian, wrote: "I anticipated that this book would meet the sternest tests of scholarship, insight, and literary finish. I find that it not only does this, but that it has other high merits. It shows grasp of ideas and forces. It is graphic in its presentation of character and idiosyncrasy. It lights up its story by a delightful play of humor, felicitously expressed. Its emphasis on fundamentals, without pomposity or platitude, is refreshing. Perhaps most important of all, it achieves one goal that in the history of a living university is both extremely difficult and extremely valuable: it recreates the changing atmosphere of time and place. It is written, very plainly, by a man who has known and loved Cornell and Ithaca for a long time, who has steeped himself in the traditions and spirit of the institution, and who possesses the enthusiasm and skill to convey his understanding of these intangibles to the reader." The distinct personalities of Ezra Cornell and first president Andrew Dickson White dominate the early chapters. For a vignette of the founder, see Bishop's description of "his" first buildings (Cascadilla, Morrill, McGraw, White, Sibley): "At best," he writes, "they embody the character of Ezra Cornell, grim, gray, sturdy, and economical." To the English historian, James Anthony Froude, Mr. Cornell was "the most surprising and venerable object I have seen in America." The first faculty, chosen by President White, reflected his character: "his idealism, his faith in social emancipation by education, his dislike of dogmatism, confinement, and inherited orthodoxy"; while the "romantic upstate gothic" architecture of such buildings as the President's house (now Andrew D. White Center for the

Humanities), Sage Chapel, and Franklin Hall may be said to "portray the taste and Soul of Andrew Dickson White." Other memorable characters are Louis Fuertes, the beloved naturalist; his student, Hugh Troy, who once borrowed Fuertes' rhinoceros-foot wastebasket for illicit if hilarious purposes; the more noteworthy and the more eccentric among the faculty of succeeding presidential eras; and of course Napoleon, the campus dog, whose talent for hailing streetcars brought him home safely—and alone—from the Penn game. The humor in *A History of Cornell* is at times kindly, at times caustic, and always illuminating.

Sleep Medicine

Presents a collection of stories that explores the heartbreak and radiance of love as it is shaped by passion, betrayal, and the echoes of intimacy.

Spasticity

Now a major motion picture nominated for nine Academy Awards. Narrative of Solomon Northup, a Citizen of New-York, Kidnapped in Washington City in 1841, and Rescued in 1853. *Twelve Years a Slave* by Solomon Northup is a memoir of a black man who was born free in New York state but kidnapped, sold into slavery and kept in bondage for 12 years in Louisiana before the American Civil War. He

provided details of slave markets in Washington, DC, as well as describing at length cotton cultivation on major plantations in Louisiana.

Sexuality for All Abilities

Global trends such as urbanization, demographic and climate change that are currently underway pose serious challenges to sustainable development and integrated resources management. The complex relations between demands, resource availability and quality and financial and physical constraints can be addressed by knowledge based policies and reform of professional practice. The nexus approach recognizes the urgent need for this knowledge and its interpretation in a policy- relevant setting that is guided by the understanding that there is a lack of blueprints for development based on integrated management of water, soil and waste resources in the Member States. Generation and application of knowledge is both a priority for individual but also institutional capacity development.

This Is How You Lose Her

This book includes papers presented at the Second International Transformation (ITX2) Conference, held in Rome, Italy, at the NATO Defense College (NDC) June

21-23, 2011, as well as a summary of the conference discussions. Co-hosted by NDC, Allied Command Transformation (ACT), and the International Transformation (ITX) Chairs Network, the conference brought together academics, policymakers, and practitioners from 13 nations to discuss the topic of "Capability Development in Support of Comprehensive Approaches: Transforming International Civil-Military Interactions."

Ngoma

This comprehensive reference book addresses the unique challenges facing many African nations as poor infrastructure and economics continue to obstruct access to advanced treatments and AIDS care training. It takes into account the context of settings with limited resources. Information on how to best utilize existing resources and prioritize scaling-up of infrastructure is a critical aspect of this book for those working in HIV/AIDS-related fields in Africa.

Cost-benefit Aspects of Food Irradiation Processing

The definitive, up-to-date guide to airport planning and management Fully revised, updated, and reorganized to reflect the latest advances in the aviation industry, Airport Planning and Management, Sixth Edition offers comprehensive coverage of

this challenging field. Airports, airport systems, operations management, and administration are discussed in detail. This authoritative volume addresses changes in technology, structure, and political environment, including enhanced security, environmental impact, and regulatory issues. The Sixth Edition of this landmark guide to the planning, development, and management of airports is ideal as a course text, self-study tool, and professional reference. Coverage includes:

- Introduction to airports and airport systems
- Airport and airport systems: organization and administration
- Historical and legislative perspectives
- The airfield
- Airspace and air traffic management
- Airport operations management under FAR Part 139
- Airport terminals and ground access
- Airport security
- Airport financial management
- Economic, political, and social role of airports
- Airport planning
- Airport capacity and delay
- The future of airport management
