The Reforming of General Education

Told in two voices Mati, a devout Muslim from Afghanistan, and Elise, a seventeen-year-old whose brother was killed there, try to keep their budding

romance secret from their families.

FileMaker Pro 13: The Missing Manual

This book is an in-depth examination of the much needed process of “self” study known as self observation. We live in an age where the “attention function” in the brain has been badly damaged by TV and computers-up to 90 percent of the public under age 35 suffers from attention-deficit disorder! This book offers the most direct, non-pharmaceutical means of healing attention dysfunction. The methods presented here are capable of restoring attention to a fully functional and powerful tool for success in life and relationships. This is also an age when humanity has lost its connection with conscience. When humanity has poisoned the Earth’s atmosphere, water, air and soil, when cancer is in epidemic proportions and is mainly an environmental illness, the author asks: What is the root cause? And he boldly answers: Failure to develop conscience! Selfobservation, he asserts, is the most ancient, scientific, and proven means to develop this crucial inner guide to awakening and a moral life. This book is for the lay-reader, both the beginner and the advanced student of self observation. No other book on the market examines this practice in such detail. There are hundreds of books on self-help and meditation, but almost none on self-study via self-observation, and none with the depth of analysis, wealth of explication, and richness of experience which this book offers. Red Hawk, author of 5 collections of poetry, was the Hodder Fellow at

The second part presents an intertemporal equilibrium theory of inter and intra-sectoral trade and concludes by analyzing the debt mechanics inducing the huge imbalances among eurozone countries. The book is primarily addressed to graduate students wishing to proceed to the analytically more demanding journal literature.

Self Observation

Equal parts swoonworthy romance and deeply affecting family drama, this debut novel about the boy next door turned super hot bad boy will have readers hooked from the very first kiss. After his father's stroke, Max Holden isn't himself. As his long-time friend, Jillian Eldridge only wants to help, but she doesn't know how. When Max climbs through her window one night, Jill knows she shouldn't let him kiss her. But she can't resist, and when they're caught in the act by her dad, Jill swears it'll never happen again. Because kissing Max Holden is a terrible idea. With a new baby sibling on the way, her parents fighting all the time, and her dream of culinary school suddenly up in the air, Jill starts spending more and more time with Max. And even though her father disapproves and Max still has a girlfriend, not kissing Max is easier said than done. Will Jill follow her heart, and allow their friendship to blossom into something more, or will she listen to her head and stop kissing Max Holden once and for all? Chosen by readers like you for Macmillan's young adult imprint Swoon Reads, Katy Upperman's debut novel *Kissing Max Holden* skillfully navigates the tenuous territory of bad

The Rough Guide to the Philippines

Kissing Max Holden

When you lose weight, where does the fat go? Most people assume it turns into heat and energy, but Albert Einstein showed us that diets would be devastating if this were true. The correct answer is that fat is converted to carbon dioxide and water. Energy is released, but no mass is created or destroyed. This was known when the First Fleet sailed into Sydney and yet it took two more centuries for Ruben Meerman to show that precisely 8.4 kilograms out of every 10 kilograms of fat are exhaled, while the remaining 1.6 kilograms become crystal clear water. His calculations were published in The British Medical Journal in December 2014. Meerman begins this diet myth-busting book by reminding us what we already know: that human beings are carbon-based, oxygen-dependent life forms. Where do the carbon atoms we exhale come from? Carbohydrates are hydrated carbon, and so are fats, whether they're saturated or not. Eat less, and you'll exhale the excess carbon stored under your skin. Big Fat Myths lifts the veil on weight loss by tracing every atom you eat into and out of your body. Diet myths and wellness nonsense topple like dominoes along the way, restoring your confidence in common sense and the age-old wisdom that to lose weight, you simply need to eat less and move more.

Principles of Accounting Volume 1 - Financial Accounting

As a leading Confederate general, Braxton Bragg (1817–1876) earned a reputation for incompetence, for wantonly shooting his own soldiers, and for losing battles. This public image established him not only as a scapegoat for the South's military failures but also as the chief whipping boy of the Confederacy. The strongly negative opinions of Bragg's contemporaries have continued to color assessments of the general's military career and character by generations of historians. Rather than take these assessments at face value, Earl J. Hess's biography offers a much more balanced account of Bragg, the man and the officer. While Hess analyzes Bragg's many campaigns and battles, he also emphasizes how his contemporaries viewed his successes and failures and how these reactions affected Bragg both personally and professionally. The testimony and opinions of other members of the Confederate army--including Bragg's superiors, his fellow generals, and his subordinates--reveal how the general became a symbol for the larger military failures that undid the Confederacy. By connecting the general's personal life to his military career, Hess positions Bragg as a

Olin Stephens is the most successful racing-yacht designer of the 20th century, a legend in his own time almost from the day in 1931 when he and his brother Rod and father Roderick, Sr. finished a transatlantic race to England in the revolutionary 52' yawl Dorade a full two days ahead of the competition. His autobiography begins with youthful family sailing, moves on to Six-Metre designs and victories, to J-Boat experience in the 1930s, to war work in the 1940s, to American Cup design and sailing from 1958 to 1983, and to a fleet of great cruising and racing yachts in between. This personal history of Olin and his brother, Rod, of the renowned design firm of Sparkman and Stephens, and of international yachting in this century, is informed, introspective, eloquent.
