## Tomorrow-Land

Motivated by potentially turning Flushing Meadows, literally a land of refuse, into his greatest public park,

Robert Moses—New York's "Master Builder"—brought the World's Fair to the Big Apple for 1964 and '65. Though considered a financial failure, the 1964-65 World's Fair was a Sixties flashpoint in areas from politics to pop culture, technology to urban planning, and civil rights to violent crime. In an epic narrative, the New York Times bestseller *Tomorrow-Land* shows the astonishing pivots taken by New York City, America, and the world during the Fair. It fetched Disney's empire from California and Michelangelo's *La Pieta* from Europe; and displayed flickers of innovation from Ford, GM, and NASA—from undersea and outerspace colonies to personal computers. It housed the controversial work of Warhol (until Governor Rockefeller had it removed); and lured Ken Kesey and the Merry Pranksters. Meanwhile, the Fair—and its house band, Guy Lombardo and his Royal Canadians—sat in the musical shadows of the Beatles and Bob Dylan, who changed rock-and-roll right there in Queens. And as Southern civil rights efforts turned deadly, and violent protests also occurred in and around the Fair, Harlem-based Malcolm X predicted a frightening future of inner-city racial conflict. World's Fairs have always been collisions of eras, cultures, nations, technologies, ideas, and art. But the trippy, turbulent, Technicolor, Disney, corporate, and often misguided 1964-65 Fair was truly exceptional.

### **Forest Trees**

Ranging from simple model variations to those machines built for specific purposes, this industrial-

grade volume chronicles the "other line" of John Deere machinery. A mainstay in heavy industry and construction sites throughout the world, John Deere Industrials begins with coverage of the popular A-series with its yellow paint and the letter "I" added to the model designation that has become the hallmark of these incredible machines. (Delayed from Spring 2002)

### **Power Trains**

For freedom to have a meaning, it must come through the sacrifice of the people. It is on this notion that the book narrates the journey of Nigeria and its people from the colonial perspective; it highlights contemporary realities with critical thoughts and gives an in-depth understanding of power politics. The book is a thorough work on Nigeria's historical and political evolution since the inception of its self-rule, with special appraisal on its political leaders. It provides insight on how Nigeria can be re-shaped by a new definition of power. The author argues persuasively, the road that should be taken by the people of Nigeria, in restoring the meaning of citizenship.

Judge Posner continues to react to the current economic crisis and reflect upon the impact on our

views and reliance on capitalism. Posner helps non-technical readers understand business-cycle and financial economics, and financial and governmental institutions, practices, and transactions, while maintaining a neutrality impossible for persons professionally committed to one theory or another.

## **Audi A4 (B5) Service Manual**

Easy-to-read text with bright, full color photographs brings Nebraska to young students. Presented in a simple, easily understandable, "scrapbook" format, kids will truly enjoy opening this travelogue-like book. This 48-page book is filled with current state facts and statistical data. Important historical information segues to up-to-date details on cities, economics, geography, and climate. Checkerboard Library is an imprint of ABDO Publishing Company.

## **Economic and biological interactions in pre-industrial Europe, from the 13th to the 18th century**

J. M. Adovasio has spent the last thirty years at the center of one of our most fiery scientific debates: Who were the first humans in the Americas, and how and when did they get there? At its heart, *The First Americans* is the story of the revolution in thinking that Adovasio and his fellow archaeologists have brought about, and the firestorm it has ignited. As he writes, "The work of lifetimes has been put at risk, reputations have been damaged, an astounding amount of silliness and even profound stupidity has

been taken as serious thought, and always lurking in the background of all the argumentation and gnashing of tenets has been the question of whether the field of archaeology can ever be pursued as a science.”

Forest trees cover one third of the global land surface, constitute many ecosystems, and play a pivotal role in the world economy. This volume details Populus trees, pines, Fagaceae trees, eucalypts, spruces, Douglas fir and black walnut, and offers a first-ever detailed review of Cryptomeria japonica. It thoroughly discusses innovative strategies to address the inherent problems of genome analysis of tree species.

This volume contains six papers presented by speech therapists at a conference dealing with principles and procedures that are crucial to transfer and maintenance of the modification of stuttering and the

production of increased fluency. E. G. Conture, in "The General Problem of Change," addresses some of the general issues which affect the transfer of speech improvement skills learned during speech therapy to speech incidents outside of the therapeutic environment. In "Working with Children in the School Environment," D. E. Williams considers ways to accomplish--and some of the problems associated with--transfer and maintenance in stuttering therapy for elementary school aged children. The third paper, "Behavioral Transfer and Maintenance Programs for Adolescent and Adult Stutterers" by E. Boberg, discusses the rationale and strategies used in transfer and maintenance programs for adults and adolescents. "An Alternative to Automatic Fluency," by W. H. Perkins considers the question of automaticity of fluent speech and whether it can be achieved and maintained through speech therapy. In "Body Concept, Self Concept and Balance," E. Versteegh-Vermeij encourages the added dimension of body awareness, individual needs and self-concept development in speech therapy programs. J. G. Sheehan, "Relapse and Recovery from Stuttering," identifies sources and causes of relapse in stuttering and ways in which to make these factors work in favor of the stutterer. A final commentary paper by H. H. Gregory, highlights topics discussed at the conference, including: attitude change; acceptance; therapy intervention; and maintenance. (CB)

More than 100 unique recipes for decadent desserts and healthy baked goods from the kitchen of Renée Kohlman, named one of the Canada's top food bloggers by the National Post. On a cold January morning, Renée Kohlman followed the advice of her sister and friends and started the foodblog, Sweetsugarbean.com. A year later, she was named one of the National Post's top Canadian food bloggers. And now, in her debut cookbook, Kohlman shares more than 100 of her favorite baking recipes--including more than 60 brand-new recipes that have never been posted to the blog--along with a pinch of encouragement and a smidge of humor. Readers of Sweetsugarbean know that Kohlman's first love is baking, so it will come as no surprise that All the Sweet Things is chock-full of delectable dessert recipes for muffins, cookies, cakes, pies, custards, pastries, truffles, and ice cream. She'll show you how to reinvent last night's dessert for this morning's breakfast, inspire you to make your very first pie (and to pick the fruits yourself), and convince you that the best gifts are baked goods. With wit and warmth, she acknowledges that baking can be intimidating, but has ensured that each recipe--whether you're a beginner baker or a seasoned pro--is doable, and

delicious. With a list of pantry essentials and useful tools and equipment, a photograph to accompany every recipe, healthful variations for gluten free bakers, and a number of essays written in Kohlman's signature signature style, this gorgeous new cookbook will pull you into the kitchen to bake, then back to the couch to curl up and read.

This document discusses the physical processes of the hydrologic cycle that are important to highway engineers. These processes include the approaches, methods and assumptions applied in design and analysis of highway drainage structures. Hydrologic methods of primary interest are frequency analysis for analyzing rainfall and ungaged data; empirical methods for peak discharge estimation; and hydrograph analysis and synthesis. The document describes the concept and several approaches for determining time of concentration. The peak discharge methods discussed include log Pearson type III, regression equations, the SCS graphical method (curve number method), and rational method. The technical discussion of each peak flow approach

also includes urban development applications. The document presents common storage and channel routing techniques related to highway drainage hydrologic analyses. The document describes methods used in the planning and design of stormwater management facilities. Special topics in hydrology include discussions of arid lands hydrology, wetlands hydrology, snowmelt hydrology, and hydrologic modeling, including geographic information system approaches and applications. This edition includes new sections on wetlands hydrology and snowmelt hydrology, an expanded section on arid lands hydrology, corrections of minor errors, and inclusion of dual units.

Gender and sexuality have been neglected topics in the history of Chinese civilization, despite the fact that there is a massive amount of historical evidence on the subject. China's late imperial government was arguably more concerned about gender and sexuality among its subjects than any other pre-modern state. How did these and other late imperial legacies shape twentieth-century notions of gender and sexuality in modern China? Susan Mann answers this by focusing on state policy, ideas about the physical body and notions of sexuality and difference in China's recent history, from medicine to the theater to the gay bars; from law to art and sports. More broadly, the book shows how changes in attitudes toward sex and gender in China during the twentieth century have cast a new light on the process of becoming modern, while simultaneously challenging the universalizing assumptions of Western modernity.

## **The Prairie Gardener's Sourcebook**

"We are created in rhythm, kept alive in rhythm, evolve through rhythm. Tides, breath, and blood flow in rhythm. We are born into a universe of currents, and our heart is the great conductor of the body, orchestrating our flow." The mystical foundations of all the world's spiritual paths meet in a single, sacred place: the heart of the seeker. We have reached a

time when scientific understanding mirrors the teachings of the great wisdom traditions in revealing our energetic heart as the light of consciousness, the fire of love, a field of intelligence. Tending the Heart Fire, the first book by pioneering yogini Shiva Rea, is an invitation to embody our extraordinary potential at this turning point in time, to reconnect your life to the rhythms of your body and the natural world—to live in flow with the pulse of life. Weaving together wisdom from the great world traditions—including yoga, Ayurveda, Tantra, and modern science—Shiva presents an essential resource for becoming a firekeeper of the sacred heart. This diverse treasury is filled with meditations, life guidance, seasonal rituals, and daily practices, including:

- Insights for harmonizing with the sacred junctures of time—the daily, weekly, lunar, and solar cycles of manifestation and renewal
- Aligning with the seasons—how to adapt your diet, exercise, and yoga rhythms throughout the annual cycle
- Ways to honor the great sacred holidays, rites, and festivals
- Awakening of sahaja—the natural flow at the origins and source of yoga asana and sacred embodiment at the heart of yoga and Tantra
- Skills for tending your inner fire in every aspect of life and healing imbalances that can support a renewable energy lifestyle
- A visual teaching with over a hundred full-color images, including reference charts, diagrams, illustrations, and ancient poetry for inspiration

The legacy of the Heart Fire is more than eight hundred thousand years old—and in our modern world, we need more than ever to consciously reconnect to the radiant field that transcends time, space, and culture. "The direct awakening of the heart often happens when we are at a crisis point, when the

armor of our heart has to crack," writes Shiva Rea. "Let us return to the power and magnificence of our hearts—as living fire, as intelligent energy and electromagnetic radiance, and as our illuminating guide toward love, creativity, and deep knowing of our true sacred nature."

### **Bringing Down this House**

The intent of this book is to provide the interior design student a well-rounded knowledge of Autodesk Revit tools and techniques. These skills can then be applied to enhance professional development in both academia and industry. The overall premise of the book is to learn Revit while developing the interior of a two story law office. The reader is provided an architectural model with established columns, beams, exterior walls, minimal interior walls and roofs in which to work. This allows more emphasis to be placed on interior design rather than primary architectural elements. The chapters chronology generally follows the typical design process. Students will find this book helps them more accurately and efficiently develop their design ideas and skills. The first chapter introduces the reader to Revit, Building Information Modeling (BIM) and the basics of opening, saving and creating a new project. The second provides a quick introduction to modeling basic elements in Revit including walls, doors, windows and more. This chapter is designed to show students how

powerful Revit is and hopefully make them more excited about learning it. The remainder of the book is spent developing the interior space of the law office with an established space program. A student will learn how to view and navigate within the provided 3D architectural model, managing and creating materials and develop spaces with walls, doors and windows. Once all the spaces are added to the model, several areas are explored and used as the basis to cover Revit commands and workflows. At the end of this tutorial, the reader will be able to model floor finishes, ceilings with soffits, casework, custom reception desk, restrooms, furniture and light fixtures. Additional features such as tags, schedules and photo-realistic rendering will be covered.

## **The Crisis of Capitalist Democracy**

Various mining methods as well as applications have been discussed in this all-inclusive updated book. The economic feasibility of a contemporary mine greatly depends on cautious planning and management. Declining trends in average ore grades, growing mining costs and environmental concerns indicate that this situation is likely to remain this way in near future. Mining techniques for underground as well as surface mineral deposits have been elucidated in this book. The methodologies have been generalized and aimed at conventional applications from distinct mining areas across the world. However, it has been kept in mind that each mineral deposit, with its geology, shape, volume, and grade, is distinct. The aim of this book is to serve as a useful source of

reference for engineers, researchers and managers engaged in mining industry, as well as for NGOs, legal organizations, universities, financial institutions and lecturers as well as students engaged in mining engineering.

When Bruce's school principal told his parents he was too smart to be a logger, everything changed. Set apart from a family heritage society had deemed not 'good enough' for a smart son, Bruce's childhood was tortured by the thought of leaving a life he loved. Dutifully, he moved away, went to college and got a job in a city. Until he and his wife, fed up with their ill-suited life, shucked all social expectations and moved

their family back to Libby, Montana. Expecting to settle into a hard but rewarding life in logging, Bruce's family and community were rocked by a growing antagonism towards their industry. Soon, he was thrust into the forefront of a national debate in which loggers were denigrated for destroying the environment. Dubbed the Timber Wars, the conflict raged from the late 80s through the 90s, while Bruce was front and center, working himself to exhaustion to preserve their heritage and ensure good forest management. As the logging contracts dried up, he could only watch in agony as his family's business closed and his community began to fall apart. Bruce and his fellow loggers had become Public Enemy No. 1 and their livelihoods were being eradicated. Yet Americans continued to enjoy their wood furniture and products. Only now, timber imports were on the rise and our national forests were exploding into flames from a massive fuel overload that management and controlled logging could have mitigated. Confronting this harsh reality, he and his team faced the hardest work yet - looking in the mirror. What had they been doing wrong? What can we do to work towards real, meaningful progress?

If you suffer from post-traumatic stress disorder (PTSD), you know how debilitating the symptoms can be. Many times, people with PTSD will suffer flashbacks, have intense nightmares and difficulty sleeping, and may feel angry, anxious, and constantly “on alert.” Living with PTSD is extremely difficult, but there are ways that you can manage your symptoms and, in time, recover. In *The iRest Program for Healing PTSD*, clinical psychologist and yogic scholar Richard C. Miller-named one of the top twenty-five yoga teachers by *Yoga Journal*-offers an innovative and proven-effective ten-step yoga program for treating post-traumatic stress disorder (PTSD). The

deep relaxation meditations in this book will help you overcome the common symptoms of PTSD, such as anxiety, insomnia, and depression, and maintain emotional stability so that you can return to living a full, meaningful life. The author's iRest protocol is an integrative approach that heals the various unresolved issues, traumas, and wounds that are present in the body and mind. It recognizes the underlying sense of calm that is always present, even amidst all changing circumstances of life. Extensive research has shown that iRest effectively supports the healing process across a broad range of populations. Currently, there are iRest programs in military hospitals across the US, as well as in correctional facilities, hospices, clinics, schools, and organizations supporting personal growth and well-being. iRest has been endorsed by the US Army Surgeon General and Defense Centers of Excellence as a complementary and alternative medicine (CAM). If you are ready to start healing from your trauma and get back to living the life you once knew—a life free from fear, anxiety, and sleepless nights—this book will help you find your way. To find out more about Richard C. Miller and the iRest program, visit [www.irest.us](http://www.irest.us).
