First, Carroll's theory includes  $g$  (global or general ability) at stratum III and the Cattell-Horn theory does not, as these theorists disagreed over the existence of an overarching intellectual ability. This dispute is an ongoing debate in the field (see Schneider & McGrew, 2012 for a discussion on the existence of  $g$ ). Second, in the Cattell-Horn model,  $Gq$  is comprised of quantitative

Many children in developing countries grow up in economically poor environments and often also suffer from poorly performing educational systems. Dillon et al. designed inexpensive, locally sourced games—five for mathematics and five for social cognition—for use in preschools in Delhi. They measured the effects of these interventions 3, 9, and 15 months later.
