Don't miss B. A. Shapiro's new novel, *The Collector's Apprentice*, available now! "Vibrant and suspenseful . . . Like *The Art Forger*, this new story takes us into the heart of what it means to be an artist." —The Washington Post "B. A. Shapiro captivated us in 2012 with her 'addictive' novel *The Art Forger*. Now, she's back with another thrilling tale from the art world." —Entertainment Weekly

When Alizée Benoit, an American painter working for the Works Progress Administration (WPA), vanishes in New York City in 1940, no one knows what happened to her. Not her Jewish family living in German-occupied France. Not her artistic patron and political compatriot, Eleanor Roosevelt. Not her close-knit group of friends, including Mark Rothko, Jackson Pollock, and Lee Krasner. And, some seventy years later, not her great-niece, Danielle Abrams, who while working at Christie's auction house uncovers enigmatic paintings hidden behind works by those now-famous Abstract Expressionist artists. Do they hold answers to the questions surrounding her missing aunt?

On January 19, 2012, the Eastman Kodak Company filed for Chapter 11 protection in U.S. bankruptcy court because it was late to absorb the fact that it was not in the film and camera business. It was in the imaging business. Beginning in 1973, Xerox's Palo Alto Research Center developed numerous breakthroughs in personal computer technology including a graphical user interface, mouse, and laser printing. But perceiving itself as primarily an office copier business, Xerox never brought this research to market. Apple did and sold 70,000 units in the first 100 days. Lessons learned. CVS Health, which operates drugstores and pharmacy benefit programs, with Aetna, an insurer, are looking to merge as they see themselves poised to deliver a holistic approach to health: leveraging CVS' approximately 10,000 drugstores into health care hubs for Aetna subscribers. None other than the New England Journal of Medicine wrote that "it aims to be the new front door to healthcare in America." Amazon, Berkshire Hathaway, and JP Morgan have just announced their intention to enter the healthcare arena. This frenzy of mergers and additional alliances is occurring at a

feverish pace. Why? Simply put, to attract and capture patients as revenue sources while healthcare providers remain somewhat intractable in fixing their own houses And patients are learning about choices; becoming active players in their own care: using walk-in clinics, urgent care centers, apps on their cellphone to post a rash or their blood sugars. They are looking for convenience and less expense which is hard to find in an emergency room or spending hours in a physician's office. So battle lines are being drawn to see "who will control the patient and who will capture their hearts." For physicians and hospital systems the choice is clear, reinvent or risk a debacle like Kodak or Xerox. Attack the many fault lines in healthcare now! These issues will take a number of years to accomplish correctly and therefore will remain timely for years to come. Very few providers think proactively, creatively and complete their initiatives. That is why this book and the ideas presented therein are so important. The templates of change demonstrated here are reproducible and proven.

American business folklore is awash with the adventures of successful entrepreneurs. Still, most of these stories are about Americans, neglecting important and courageous entrepreneurs from other countries. Made in Korea recounts the story of how Chung Ju Yung rose from poverty to build one of the world's largest and most successful building empires - Hyundai - through a combination of creative thinking, tenacity, timing, political skills, and a business strategy that few competitors ever understood. Chung entered the shipbuilding business with no experience and went on to create the world's largest shipyard. He began making automobiles when foreign experts unanimously predicted he would fail, and he started a global construction company that has built some of today's greatest architectural wonders. He even convinced the International Olympic Committee to select South Korea over Japan as the site for the highly successful 1988 Olympics. Unlike most CEO's of major firms, Chung has always preferred the company of his workers to that of the global executive elite. Hard work, creativity and a capacity to never give up - this is the essence of Chung's life. In each of his ventures, he exhibited a sheer determination to succeed, regardless of the obstacles, and he worked tirelessly to instil this drive in all of his employees. Even today, in the midst of Korea's worst

Illustrated with 32 pages of colour photographs not previously seen in the West, including photos of Chung's recent historic visit to North Korea in 1998, *Made in Korea* takes stock of Chung's entire life, highlighting both his contributions to society and the lessons his work can teach to aspiring entrepreneurs.

The new industry standard on landscape architectural detailing *Detailing for Landscape Architects* takes the reader on an educational journey across three major areas of landscape architectural detailing—aesthetics, function, and constructibility—to demonstrate how powerful design patterns can transform thematic ideas into awe-inspiring built realities. Richly illustrated examples accompany concise discussions of a varied blend of landscape design/detailing issues such as water movement, soil environments, articulating structures and construction assemblies, life cycle costing, sustainability, health and safety, and more. This book approaches the subject of detailing in a systematic manner, and provides a balanced framework for design and workmanship that conveys the essence of the built landscape. *Detailing for Landscape Architects* shows how details can:

- Reinforce design ideas through the continuity and discontinuity of patterns
- Actively contribute to the overall form or geometry of the design
- Be designed to be durable and flexible while enhancing the entire

His wife has turned him into a malicious and bitter man. It doesn't help that he has vivid fantasies about killing Nicole, murdering her in such gruesome and barbaric ways. But strangely he can't leave her. Nicole is his vital link to the man he once was. Mark loves his sister, Jackson. He divulges his most private secrets to her and he trusts her more than anyone. He is relieved when she moves in with him and his treacherous wife. Jackson moves in with hopes to keep Mark from falling down the rabbit hole of destruction. But something is wrong. Things aren't adding up. Mark gets the oddest feeling that his wife and sister are both keeping important information from him. They are lying to him. Things are not as they appear. Mark soon learns that he can't trust the main people he should always be able to rely on--his family. When Jackson moves in, it causes his picture perfect family image to crack and shatter. The people in his life have created the quintessential loving family but it's all smoke and mirrors. Mark is starting to see past the illusion. He can't shake the sense of impending danger and the feeling of doom constantly nipping at the back of his ankles. He has to accept the fact that nothing is what it seems.

As customers take control over what, when, why, and how they buy products and services, brands face the complete breakdown and utter failure of passive marketing strategies designed more than a half-century ago. To connect with a new generation of customers, companies must embrace and deploy a new marketing mix, powered by a more effective discipline: experiences. Experiential marketing, the use of live, face-to-face engagements to connect with audiences, create relationships and drive brand affinity, has become the fastest-growing form of marketing in the world as the very companies that built their brands on the old Madison Avenue approach—including Coca-Cola, Nike, Microsoft, American Express and others—open the next chapter of marketing. . . as experiential brands. Using hundreds of case studies, exclusive research, and interviews with more than 150 global brands spanning a decade, global experiential marketing experts Kerry Smith and Dan Hanover present the most in-depth book ever written on how companies are using experiences as the anchor of reinvented marketing mixes. You'll learn: The history and fundamental principles of experiential marketing How top brands have reset marketing mixes as experience-driven portfolios The anatomy of a brand experience The psychology of engagement and experience design The 10 habits of highly experiential brands How to measure the impact of experiential marketing How to combine digital and social media in an experiential strategy The experiential marketing vocabulary How to begin converting to experiential marketing Marketers still torn between outdated marketing models and the need to reinvent how they market in

Forty-eight percent of U.S. households perform at least some automobile maintenance on their own, with women now accounting for one third of this \$34 billion automotive do-it-yourself market. For new or would-be do-it-yourself mechanics, this illustrated how-to guide has long been a must and now it's even better. A complete reorganization now puts relevant repair and maintenance information directly after each automotive system overview, making it much easier to find hands-on fix-it instructions. Author Deanna Sclar has updated systems and repair information throughout, eliminating discussions of carburetors and adding coverage of hybrid and alternative fuel vehicles. She's also revised schedules for tune-ups and oil changes, included driving tips that can save on maintenance and repair costs, and added new advice on troubleshooting problems and determining when to call in a professional mechanic. For anyone who wants to save money on car repairs and maintenance, this book is the place to start. Deanna Sclar (Long Beach, CA), an acclaimed auto repair expert and consumer advocate, has contributed to the Los Angeles Times and has been interviewed on the Today show, NBC Nightly News, and other television programs.

Friedrich Wilhelm Marpurgh is widely recognized today as a highly important, prolific, and influential writer of the 18th-century musical scene. His Handbuch,

however, has not received the study and recognition it deserves as one of the most significant and complete composition methods from any period in history. Within its 341 pages and almost 1000 musical examples, Marpurg leads his reader through an extensive course in musical composition beginning with the handling of every conceivable interval, then proceeding to writing for two or more voices, and ending with instruction in canon, fugue, and various types of interval counterpoint. The section devoted to fugue constitutes both a distillation and a refinement of Marpurg's *Abhandlung von der Fuge* (1753-54), the first monograph devoted to the subject. David Sheldon is a recognized authority on music theory in the critical mid-18th century decades when the Baroque as a musical concept passes into the great Classic Era. This volume carefully examines the material of the *Handbuch* with regard to origin and influence, while organizing it in such a way as to clarify Marpurg's main concepts and contributions. In this new, translated form the *Handbuch* will offer much to the present-day scholar and student.

development of intelligent vehicles; it also includes advances made to date, challenges, and future trends. Significant strides in the field have been made to date; however, so far there has been no single book or volume which captures these advances in a comprehensive format, addressing all essential components and subspecialties of intelligent vehicles, as this book does. Since the intended users are engineering practitioners, as well as researchers and graduate students, the book chapters do not only cover fundamentals, methods, and algorithms but also include how software/hardware are implemented, and demonstrate the advances along with their present challenges. Research at both component and systems levels are required to advance the functionality of intelligent vehicles. This volume covers both of these aspects in addition to the fundamentals listed above.

Rooms of Nancy Vernon Kelly's childhood home in Hollywood, California, provide scaffolding for *Souls at Risk*, a memoir about the roots and consequences of her writer-producer father's sudden turn to right-wing extremism. Radicalization didn't occur in a vacuum. Its grip had clear public and personal roots and consequences. The narrative pivots around a 1960 concert the author's father produced in San Diego for blacklisted folksinger Pete Seeger. When Seeger refused to sign a loyalty oath to use a public high school auditorium, the American Legion accused him of being a communist and protested to the San Diego

School Board. Although the concert went on (and Kelly sang along!), the fallout continued for many years, entrenched in Cold War American-Soviet hostility. *Souls at Risk* weaves together the long view of a personal, public, and historical story that embodies both the disruption of extremism and the disruption of grace. While remembering the unwelcome parts of life with hateful extremism, the author also delights in the memory of experiences and people who kept her fledgling soul from completely flattening out in a turbulent time. Indeed, the sweetest touch of mercy arrived in Kelly's inbox almost fifty years after the concert.

Today, some suppliers have grown increasingly powerful and in certain cases, earn revenues that rival or even exceed that of their automaker clients. In the pre-globalisation period, automakers wielded absolute power over their significantly smaller suppliers. This book reveals the upending of this relationship, with the gradual shift in the balance of power from automakers to their suppliers in this era of globalisation. The book examines how suppliers in the global tyres, seats, constant velocity joints (hereafter 'CVJs'), braking systems and automotive semiconductor industries have evolved into powerful oligopolies through a mix of acquisition and organic growth strategies. It also highlights how joint ventures could be strategically deployed as springboards to acquisition, as they enable firms to familiarise themselves with their partners' markets and operations. Moreover, the book analyses the disruption stirred by the entry of well-resourced technology titans into this industry and their inevitable clash with the traditional incumbents. This book is an invaluable reference for anyone interested

Four years into a five-year contract with General Motors to be the exclusive website vendor to its U.S. network of more than 4,000 dealers, CDK Digital faced a crucial contract renewal at the end of 2012. The case follows Melissa McCann, director of strategic marketing, and Chris Reed, CMO, as they prepared for a critical meeting in July 2011: a presentation to the customer relationship management (CRM) subcommittee of the Chevrolet dealer council. Although GM dealers, like all auto dealers in the

United States, were independent franchisees, GM saw the renewal of CDK Digital's exclusive contract as a collaborative decision between dealers and GM. According to Ed Vogt, GM's executive in charge of the renewal, if the dealer councils said no, the contract would not be renewed. This case challenges students to use CDK's big data and analytics capabilities to address the inherent conflict between dealers and manufacturers: when marketing to potential customers, manufacturers wanted consistency across dealer websites to maximize sales of their targeted brands, while dealers wanted flexibility to sell what they had in inventory. After analyzing the case, students will be able to:

- Demonstrate how big data and analytics can be used to solve channel conflict
- Explain how franchisors and franchisees have different perspectives on the value of data on retail operations
- Recognize benefits of big data and analytics beyond the obvious potential improvements to marketing and operational effectiveness
- Articulate the value of data analytics for channel management
- Appraise the benefits of real-time website customization.
