Language Learners in Study Abroad Contexts

This book is a thorough revision of the highly successful text first published in 1994. The authors retain the multidisciplinary approach that presents research from linguistics, sociology, psychology, and education, in a format designed for use in an introductory course for undergraduate or graduate students. The research is updated throughout and there are new sections and chapters in this second edition as well. New chapters cover child language acquisition (first and second), Universal

Grammar, and instructed language learning; new sections address issues, such as what data analysis doesn't show, replication of research findings, interlanguage transfer (multilingual acquisition and transfer), the aspect hypothesis, general nativism, connectionist approaches, and implicit/explicit knowledge. Major updates include nonlanguage influences and the lexicon. The workbook, *Second Language Learning Data Analysis, Second Edition*, makes an ideal accompaniment to the text.

Strategies for Natural Language Processing

This book traces the historical development of major language teaching methods in terms of theoretical principles and classroom procedures, and provides a critical evaluation of each. Drawing from seminal, foundational texts and from critical commentaries made by various scholars, Kumaravadivelu examines the profession's current transition from method to postmethod and, in the process, elucidates the relationship between theory, research, and practice. The chief objective is to help readers see the pattern that connects language, learning, teaching methods, and postmethod perspectives. In this book, Kumaravadivelu: *brings together a critical vision of L2 learning and teaching--a vision founded at once on historical development and contemporary thought; *connects findings of up-to-date research in L2 learning with issues in L2 teaching thus making the reader aware of the relationship between theory, research and practice; *presents language teaching methods within a coherent framework of language-, learner-, and learning-centered pedagogies, thus helping the reader to see how they are related to each other; *shows how the three categories of methods evolved historically leading ultimately (and inevitably) to the emergence of a postmethod condition; and *provides the reader with a solid background in several interconnected areas of L2 pedagogy, such as concepts of competence, input factors, intake processes, interactional modifications, and instructional design. *Understanding Language Teaching: From Method to Postmethod* is intended for an international audience of teacher educators, practicing teachers and graduate students, researchers, curriculum planners, and materials designers in the field of second and foreign language teaching.

Educating Young Children With Autism Spectrum Disorders

A Doody's Core Title 2012 Thoroughly updated and expanded, the new edition of the classic comprehensive reference on pediatric rehabilitation brings together specialists from the various wings of the pediatric rehabilitation community. This market-leading text covers everything from basic examination and psychological assessment to electrodiagnosis, therapeutic exercise, orthotics and assistive devices, and in-depth clinical management of the full range of childhood disabilities and injuries. Features include: Expanded new edition of Dr. Gabriella Molnars pioneering pediatric rehabilitation text Comprehensive coverage of all areas, with up-to-date information on therapy, exercise physiology, CAM, cancer, obesity, and joint replacement Clinical emphasis throughout Multi-specialty expert

Handbook of Evidence-Based Practice in Clinical Psychology, Child and Adolescent Disorders

Handbook of Evidence-Based Practice in Clinical Psychology, Volume 1 covers the evidence-based practices now identified for treating children and adolescents with a wide range of DSM disorders. Topics include fundamental issues, developmental disorders, behavior and habit disorders, anxiety and mood disorders, and eating disorders. Each chapter provides a comprehensive review of the evidence-based practice literature for each disorder and then covers several different treatment types for clinical implementation. Edited by the renowned Peter Sturmey and Michel Hersen and featuring contributions from experts in the field, this reference is ideal for academics, researchers, and libraries.

Fundamental Concepts of Language Teaching

Just as autism is a continuum of disorders, it is associated with a broad range of neurodevelopmental, social, and communication deficits. For individuals with autism spectrum disorders (ASD), augmentative and alternative communication (AAC) has a major impact on their daily lives, often reducing the occurrence of challenging behaviors. Aided Augmentative Communication for Individuals with Autism Spectrum Disorders is a practical guide to the field, offering readers a solid grounding in ASD, related complex communication needs (CCN), and AAC, especially visual and computer-based technologies. Widely used interventions and tools in AAC are reviewed—not just how they work, but why they work—to aid practitioners in choosing those most suited to individual clients or students. Issues in evaluation for aided AAC and debates concerning its usability round out the coverage. Readers come away with a deeper understanding of the centrality of communication for clients with ASD and the many possibilities for intervention. Key areas of coverage include: AAC and assessment of people with ASD and CCN. Interdisciplinary issues and collaboration in assessment and treatment. AAC intervention mediated by natural communication partners. Functional communication training with AAC. The controversy surrounding facilitated communication. Sign language versus AAC. Aided Augmentative Communication for Individuals with Autism Spectrum Disorders is an essential resource for clinicians/practitioners, researchers, and graduate students in such fields as child and school psychology, speech pathology, language education, developmental psychology, behavior therapy, and educational technology.

Communication Disorders in Multicultural Populations - E-Book

Let's All Play is packed with enjoyable, easy to do literacy activities for young children. It provides fun, stimulating and inclusive ideas suitable for a range of children including those with special educational needs (SEN) and those learning English as an additional language (EAL). Topics covered include: • Food Glorious Food • Opposites • Houses and Homes • All About Me • Animals This excellent resource is for anyone working with Nursery, Reception or Pre-school children in any early years setting.

Language Power: Grades 3-5 Level B Teacher's Guide

This extremely up-to-date book, *Speech Production and Second Language Acquisition*, is the first volume in the exciting new series, *Cognitive Science and Second Language Acquisition*. This new volume provides a thorough overview of the field and proposes a new integrative model of how L2 speech is produced. The study of speech production is its own subfield within cognitive science. One of the aims of this new book, as is true of the series, is to make cognitive science theory accessible to second language acquisition. *Speech Production and Second Language Acquisition* examines how research on second language and bilingual speech production can be grounded in L1 research conducted in cognitive science and in psycholinguistics. Highlighted is a coherent and straightforward introduction to the bilingual lexicon and its role in spoken language performance. Like the rest of the series, *Speech Production and Second Language Acquisition* is tutorial in style, intended as a supplementary textbook for undergraduates and graduate students in programs of cognitive science, second language acquisition, applied linguistics, and language pedagogy.

Handbook of Treatments for Autism Spectrum Disorder

This book is intended for teachers and students of applied linguistics.

The Equivalence of Direct and Semi-Direct Speaking Tests

Spanning the entire childhood developmental period, *Language Disorders from Infancy Through Adolescence, 5th Edition* is the go-to text for learning how to properly assess childhood language disorders and provide appropriate treatment. The most comprehensive title available on childhood language disorders, it uses a descriptive-developmental approach to present basic concepts and vocabulary, an overview of key issues and controversies, the scope of communicative difficulties that make up child language disorders, and information on how language pathologists approach the assessment and intervention processes. This new edition also features significant updates in research, trends, social skills assessment, and instruction best practices. Clinical application focus featuring case studies, clinical vignettes, and suggested projects helps you apply concepts to professional practice. UNIQUE! Practice exercises with sample transcripts allow you to apply different methods of analysis. UNIQUE! Helpful study guides at the end of each chapter help you review and apply what you have learned. Highly regarded lead author who is an expert in language disorders in children provides authoritative guidance on the diagnosis and management of pediatric language disorders. More than 230 tables and boxes summarize important information such as dialogue examples, sample assessment plans, assessment and intervention principles, activities, and sample transcripts. Student/Professional Resources on Evolve include an image bank, video clips, and references linked to PubMed. NEW! Common core standards for language arts incorporated into the preschool and school-age chapters. NEW! Updated content features the latest research, theories, trends and techniques in the field. Information on preparing high-functioning students with autism for college Social skills training for students with autism The role of the speech-language pathologist on school literacy teams and in response

to intervention Emerging theories of etiology and psychopathology added to
Models of Child Language Disorders chapter Use of emerging technologies for
assessment and intervention

Speech Production and Second Language Acquisition

This book examines current advances in the role of interactional feedback in second language (L2) teaching and learning. Drawing on recent theory and research in both classroom and laboratory contexts, the book explores a wide range of issues regarding interactional feedback and their relevance for both theory and practice, including how interactional feedback is used, processed, and contributes to L2 acquisition. This book will provide a useful resource for applied linguistics students and academics as well as language teachers and teacher educators who would like to gain insight into the role of interactional feedback and how it can be used as a means of integrating form and meaning in classroom contexts.

Handbook of Research on E-Learning Methodologies for Language Acquisition

Written by some of the top researchers and clinicians in the field, *Communication Disorders in Multicultural Populations, 4th Edition* offers an in-depth look at the major cultural groups in the U.S. and the issues concerning their communication development, common disorders, and treatment options. This fourth edition features a wealth of updates and new features — including the latest research and added coverage of communication issues in countries such as Australia, China, Canada, and Brazil — to give speech-language pathology students and speech-language pathologists a balanced and global perspective on the most topical multicultural communication issues of today. Comprehensive coverage focuses on a wide variety of cultural and age populations. Cutting-edge research and data offer up-to-date discussions based on the latest studies in multiculturalism as it relates to the SLP and AuD professions. Diverse panel of expert authors include some of the top researchers and clinicians in the field. Additional resources provide a focused listing of print and electronic sources at the end of each chapter to support more in-depth study of a particular subject. Chapter on international perspectives tackles issues in countries such as Australia, Canada, China, and Brazil to give you a more global understanding of communication disorders. The latest statistics from the 2010 U.S. Census report offers the most current data available. Increased content on older adults covers the multicultural issues, voice disorders, and neurogenic disorders particular to this important demographic. Case studies give you practice solving realistic clinical problems. Chapter overview and conclusion outline the key information in each chapter and serve as a checklist for content mastery.

Contemporary Task-Based Language Teaching in Asia

Building Language using LEGO® Bricks is a flexible and powerful intervention tool designed to aid children with severe receptive and expressive language disorders, often related to autism and other special educational needs. This practical manual equips you for setting up and adapting your own successful sessions.

Downloadable resources enable you to chart progress in the following key areas: - The use of receptive and expressive language - The use and understanding of challenging concepts - Joint attention - Social communication Help children with complex needs to communicate with this unique tool, derived from the highly effective LEGO®-Based Therapy.

Teaching English Language Learners through Technology

Over the last decade task-based approaches to language learning and teaching (TBLT) have become a global focus of increased levels of research. Governments around the world have turned to TBLT as a potential solution for curricula that lack authentic and meaningful engagement with language learning and are failing to motivate students as a result. This book focuses on Asia, where this shift has been particularly in evidence. TBLT has often been implemented in top-down approaches to curriculum development, which presents a huge range of challenges at the cultural as well as the pedagogic level. Contemporary Task Based Language Teaching in Asia looks at the drivers, stakeholders and obstacles across the region. Some countries have adapted TBLT to deal with the local constraints, others have found it hard to apply and many are still in the process of investigating its implementation in their specific contexts. This collection is important to all involved in language development, from curriculum reform to materials development. It assists from programme evaluation to the setting of assessment standards. The chapters cover all aspects of language education across Asia, from primary to tertiary, private and public education, as well as innovations at local, regional and national levels.

This handbook provides a comprehensive review of the numerous factors associated with treatments for children, youth, and adults with autism spectrum disorder (ASD). It offers in-depth analysis of evidence-based treatments for young children, providing coverage on interventions within social skills training, school curricula, communication and speech training, and augmentative communication. It also covers treatments for adolescents and adults, including vocational programs, social integration programs, and mental health resources. Chapters also review several popular interventions such as functional behavior analysis, sensory integration therapy, early intensive behavioral interventions (EIBI), and floor time. In addition, the Handbook discusses standards of practice, focusing on ethical issues, review boards, training concerns, and informed consent. Topics featured in the Handbook include: Training for parents of individuals diagnosed with ASD. Treatment of socially reinforced problem behavior. Comorbid challenging behaviors. Post-secondary education supports and programs for adults. The TEACCH Program for people with ASD. Treatment of addiction in adults with ASD. Diet and nutrition based treatments targeted at children with ASD. The Handbook of Treatments for Autism Spectrum Disorder is a must-have reference for researchers, clinicians/professionals, and graduate students in clinical child, school, and developmental psychology, child and adolescent psychiatry, and social work as well as rehabilitation medicine/therapy, behavioral therapy, pediatrics, and educational psychology.

Pediatric Rehabilitation

Aphasia and Related Neurogenic Communication Disorders covers topics in aphasia, motor speech disorders, and dementia. Organized by symptom rather than syndrome, this text provides a foundation for understanding the disorders and learning how to apply basic theory to clinical practice in the development of rehabilitation objectives. Aphasia and Related Neurogenic Communication Disorders applies a clinical integration of the psychosocial with the neuropsychological approach in adult language rehabilitation. Written by international authorities in the field of aphasia and related communication disorders and based on the ICF framework, this unique text features diverse contribution covering global issues. Important Notice: The digital edition of this book is missing some of the images or content found in the physical edition.

Language Output, Communication Strategies and Communicative Tasks

Examining the overseas experience of language learners in diverse contexts through a variety of theoretical and methodological approaches, studies in this volume look at the acquisition of language use, socialization processes, learner motivation, identity and learning strategies. In this way, the volume offers a privileged window into learner experiences abroad while addressing current concerns central to second language acquisition.

Understanding Language Teaching

Gesture as a Communication Strategy in Second Language Discourse

Everything you need to know to educate students with autism Every 20 minutes, another child is diagnosed with autism. Are you ready to meet this growing educational challenge? This authoritative guide is for practitioners—early interventionists, teachers, school counselors, psychologists—who are committed to the education and dignity of students with autism in preschool and elementary grades. Each chapter focuses on a critical issue and offers solutions, including: Improving communication, social, generalization and self-management skills Designing instruction, intervention, and assessment Including families in developing goals and interventions Using students' special interests to deliver instruction Understanding and preventing challenging behavior Evaluating practices to promote successful outcomes for students, families and practitioners

Dealing with Problems in Intercultural Communication

In Teaching English Language Learners through Technology, the authors explore the use of computers/technology as a pedagogical tool to aid in the appropriate instruction of ELLs across all content areas. The special focus of this book is on the informed use of various technologies and software programs that can specifically aid ELLs. Strategies are also provided for varying levels of access--whether teachers teach in a one computer classroom, have access to multiple computers, or have the ability to go into a computer lab at their school. A fully annotated list of web and print resources completes the volume, making this a valuable reference to help teachers harness the power of computer-assisted technologies in meeting the challenges of including all learners in effective instruction.

The Interactional Feedback Dimension in Instructed Second Language Learning

Provides comprehensive coverage of successful translation of language learning designs utilizing ICT in practical learning contexts. Offers the latest knowledge related to research on computer-enhanced language acquisition and learning.

Language Pluralism in Botswana - Hope Or Hurdle?

Handbook of Research on Web 2.0 and Second Language Learning

Professor Stern puts applied linguistics research into its historical and interdisciplinary perspective. He gives an authoritative survey of past developments worldwide and establishes a set of guidelines for the future. There

are six parts: Clearing the Ground, Historical Perspectives, Concepts of Language, Concepts of Society, Concepts of Language Learning, and Concepts of Language Teaching.

Let's All Play Activities for Communication, Language and Literacy

The aim of this study about the plurilingual language situation in Botswana is to show tendencies in the attitudes of Botswana citizens towards the ca. 25 languages that are still in use. Results are presented on questions like «which differentiated roles do the official language English, the national language Setswana, and the so-called minority languages play in the present Botswanan society?» The overall question of which language will win the race, which ones will survive in the language contest and which ones will not, will be analysed and discussed on the basis of extensive survey data. Based on socio-historical background information, language phenomena like bi- and multilingualism, diglossia, language shift, code switching, language status and power structures, and ethnic stereotypes triggered by language are explored and linked to the current language policy and its implementation in the educational system.

A Cognitive Approach to Language Learning

This innovative book examines the relationship between foreign (L2) language acquisition and task-based learning from an output perspective, with a concentration on the learner's discourse and retrospection. Author Cynthia Lee explores this issue in an experimental context; with particular reference to Hong Kong Chinese tertiary learners of English. Lee's study contributes to research on L2 acquisition and casts light on task-based learning and pedagogy in Hong Kong classrooms and beyond. English language teaching practitioners, researchers, and applied linguists will find special value in this book.

Language Disorders from Infancy Through Adolescence - E-Book

Creating classroom spaces that allow for increased learner participation and lowered anxiety levels allows for an inclusive learning environment. Continuing collaborative efforts to challenge theories and further test methodologies by drawing upon research studies helps researchers and educators to become more informed about individual learner preferences and classroom contextual factors and to foster meaningful learning environments across disciplines. Specifically, examining distinct learner contexts can allow educators to explore new avenues of pedagogical design to improve learning contexts. Taking into consideration diverse approaches to language pedagogies, distinct learning styles, and the growing need to develop intercultural competence in communities and professions across the globe, this book will serve to help educators transform classrooms into socially engaging environments, and explores innovative ways in which pedagogical performance and learning experiences can be improved. Drawing upon sociocultural theory, cognitive theory, and affective factors in foreign language learning, this study is based on doctoral research that explores the effects of interlocutor familiarity in group settings in two beginner-level language courses. Reflecting on diverse learner perspectives and individual learner factors can allow educators to increase learners' connections to content and transform the way we approach pedagogical methods and diverse learner needs.
