The H.D. Book

The Ultimate Scottish Cycling Book

The Brains of Men and Machines

This comprehensive work explores the demand, supply and variable consumer attitude toward a wide variety of unconventional and exotic animal species that are consumed in different parts of the world. Individual chapters focus on the consumption of horse meat, camel, buffalo, sheep, rabbit, wild boar, deer, goose, pheasant and exotic meats such as alligator, snake, frog and turtle. For each type of animal species, the carcass characteristics, physico-chemical properties and nutritional value of the meat are extensively outlined. The consumer preference, behavior and perception of each type of meat are also covered, with focus on important factors from sensory properties to psychological and marketing aspects. In promoting a better understanding of the complexities involved in consumer decision making, this book aims to improve the competitiveness of the meat industry through effective informational strategies that can increase consumer acceptance

of more convenient, healthy and environmentally friendly meat choices. More than Beef, Pork and Chicken – The Production, Processing, and Quality Traits of Other Sources of Meat for Human Diet also focuses on the important role meat plays in the human diet and the evolution of the species. Beneficial factors such as protein, B complex vitamins, zinc, selenium and phosphorus are detailed. Negative factors are discussed as well, with issues such as fat and fatty acid content being addressed for each type of meat presented. In exploring the full range of nutritional benefits, consumer acceptance and carcass characteristics in a large quantity of different types of animal meats from all over the world, this book offers incredible value to researchers looking for a single source on unconventional meat processing.

Emerging Themes in Information Systems and Organization Studies

Biodiversity and Conservation in Europe

Africa is a fire continent. Since the early evolution of humanity, fire has been harnessed as a land-use tool. Many ecosystems of Sub-Sahara Africa that have been shaped by fire over millennia provide a high carrying capacity for human populations.

The Breast Cancer Book

Science from an Easy Chair

Steven Pinker meets Bill Bryson in this landmark exploration of language. In the author's own words, "How Language Works is not about music, cookery, or sex. But it is about how we talk about music, cookery, and sex-or, indeed, anything at all." Language is so fundamental to everyday life that we take it for granted. But as David Crystal makes clear in this work of unprecedented scope, language is an extremely powerful tool that defines the human species. Crystal offers general readers a personal tour of the intricate workings of language. He moves effortlessly from big subjects like the origins of languages, how children learn to speak, and how conversation works to subtle but revealing points such as how email differs from both speech and writing in important ways, how language reveals a person's social status, and how we decide whether a word is rude or polite. Broad and deep, but with a light and witty touch, How Language Works is the ultimate layman's guide to how we communicate with one another.

Wildland Fire Management Handbook for Sub-Sahara Africa

This book constitutes the proceedings of the 39th SGA International Conference on Innovative Techniques and Applications of Artificial Intelligence, AI 2019, held in Cambridge, UK, in December 2019. The 29 full papers and 14 short papers presented in this volume were carefully reviewed and selected from 49 submissions. The volume includes technical papers presenting new and innovative developments in the field as well as application papers presenting innovative applications of AI techniques in a number of subject domains. The papers are organized in the following topical sections: machine learning; knowledge discovery and data mining; agents, knowledge acquisition and ontologies; medical applications; applications of evolutionary algorithms; machine learning for time series data; applications of machine learning; and knowledge acquisition.

Clustering Stability

This book brings together a selection of original studies that address biodiversity and conservation in Europe. The contributions are drawn from a wide range of countries and discuss diverse organism and habitat types. They collectively provide a snap-shot of the sorts of studies and actions being taken in Europe to address issues in biodiversity and conservation – topical examples that make the volume especially valuable for use in conservation biology courses.

The Lost Atlantis

Milk is nature's most complete food, and dairy products are considered to be the most nutritious foods of all. The traditional view of the role of milk has been greatly expanded in recent years beyond the horizon of nutritional subsistence of infants: it is now recognized to be more than a source of nutrients for the healthy growth of children and nourishment of adult humans. Alongside its major proteins (casein and whey), milk contains biologically active compounds, which have important physiological and biochemical functions and significant impacts upon human metabolism, nutrition and health. Many of these compounds have been proven to have beneficial effects on human nutrition and health. This comprehensive reference is the first to address such a wide range of topics related to milk production and human health, including: mammary secretion, production, sanitation, quality standards and chemistry, as well as nutrition, milk allergies, lactose intolerance, and the bioactive and therapeutic compounds found in milk. In addition to cow's milk, the book also covers the milk of non-bovine dairy species which is of economic importance around the world. The Editors have assembled a team of internationally renowned experts to contribute to this exhaustive volume which will be essential reading for dairy scientists, nutritionists, food scientists, allergy specialists and health professionals.

A History of Beaver County

Dairy goats have long been considered an important source of income for rural populations, providing the opportunity for profitable and sustainable diversity for small farms. Their importance is also increasing in intensive feeding systems and in large farms. They are highly adaptable due to their unique feeding habits and have become popular livestock animals in a range of environments, from temperate grasslands to subtropical, semi-arid and mountainous areas. Moreover, goat milk products are finding a growing acceptance in the world market and research has increased in feeding strategies for improved productivity and quality. Examining all aspects of dairy goat feeding and nutrition, this book represents a long awaited review of recent scientific research and updated techniques. Chapters discuss aspects such as the modelling and production of goat's milk as well as the estimation of nutrient requirements and food intake of goats.

Twelve Years a Slave

This innovative and global best-seller helped establish food studies courses throughout the social sciences and humanities when it was first published in 1997. The fourth edition of Food and Culture contains favorite articles from earlier editions and several new pieces on food politics, globalism, agriculture, and race and gender identity.

Gatherings from Spain

This book consists of an anthology of writings. The aim is to honour Marco to celebrate the 35th year of his academic career . The book consists of a collection of selected opinions in the field of IS. Some themes are: IT and Information Systems organizational impacts, Systems development, Business process management, Business organization, e-government, social impact of IT.

SafetyFUNdamentals

Excerpts from history and folklore trace the unusual beliefs and uses of gems since ancient times

Worth Their Salt Too

Economy, Business and Uncertainty: New Ideas for a Euro-Mediterranean Industrial Policy

Book of Abstracts of the 69th Annual Meeting of the European Federation of Animal Science

"What began in 1959 as a simple homage to the modernist poet H.D. (Hilda Doolittle) developed into an expansive and unique quest for a poetics that would fuel Duncan's great work into the 1960s and 1970s. A meditation on both the roots of modernism and its manifestation in the writings of H.D., Djuna Barnes, Ezra Pound, D.H. Lawrence, Gertrude Stein, William Carlos Williams, Virginia Woolf, and many others, Duncan's wide-ranging work is especially notable for illuminating the role women played in creating literary modernism"--Publisher description.

Wild Spain (España Agreste)

Food and Culture

Sustainable Grassland Productivity

Dairy Goats Feeding and Nutrition

This Book of Abstracts is the main publication of the 69th Annual Meeting of the European Federation of Animal Science (EAAP). It contains abstracts of the invited papers and contributed presentations of the sessions of EAAP's eleven Commissions: Animal Genetics, Animal Nutrition, Animal Management and Health, Animal Physiology, Cattle Production, Sheep and Goat Production, Pig Production, Horse Production and Livestock Farming Systems, Insects and Precision Livestock Farming.

The Quicksand War

THE ULTIMATE SCOTTISH CYCLING BOOK is the first to deal with cycle-touring in Scotland in such a comprehensive manner. Much more than just a set of directions, the author's own experience on each route is described in an entertaining narrative, and detailed maps are featured to allow readers to follow the routes for themselves. The best way to see any country is to travel slowly and without pressure. Freed from the stresses of timetables and connections or concentration needed for driving, cycle touring allows just that. The unique commentary accompanying every route in this book will inspire readers to set off and get to know Scotland both on and off the beaten track. Through following any of these routes, cyclists will encounter events and places that have played an important but lesser-known role in the bigger Scottish picture. The

routes take in everything one would expect from a holiday in Scotland but reveal unexpected little-known gems in addition. The time has never been better to go out and cycle. Sustrans have filled in crucial gaps in the quiet roads with dedicated cycle paths and the awareness amongst the tourist industry of the needs of cyclists has never been higher. After reading this book, there will be nothing blocking the way of an unforgettable, fulfilling trip. Every aspect of travelling with a bike is covered and each route is carefully constructed to make the cyclist feel safe and remove the need for expensive and inconvenient car hire. THE ULTIMATE SCOTTISH CYCLING GUIDE features nine of the best routes that cyclists of any level will find possible and enjoyable. The tours included are not about putting miles on the clock but about genuine experiences and taking everything in at your own pace.

The History of American Ornithology Before Audubon

Sir Daniel Wilson adds his own interesting historical perspectives to the story of lost Atlantis.

New Mexico Mines and Minerals

How Language Works

Anagram Solver is the essential guide to cracking all types of quiz and crossword featuring anagrams. Containing over 200,000 words and phrases, Anagram Solver includes plural noun forms, palindromes, idioms, first names and all parts of speech. Anagrams are grouped by the number of letters they contain with the letters set out in alphabetical order so that once the letters of an anagram are arranged alphabetically, finding the solution is as easy as locating the word in a dictionary.

The Curious Lore of Precious Stones

Biographies of prominent women (community and government leaders, activists, artists, writers, scholars, politicians, and others) who made important contributions to Utah's history and culture.

Using Ubuntu MATE and Its Applications

Milk and Dairy Products in Human Nutrition

This book presents original research articles addressing various aspects of economics, management and optimization. The topics discussed include economics, finance, marketing, resource allocation strategies, fuzzy logic, and network-based techniques for the analysis of economics, management and mathematical optimization. Combining the input of contributing professors and researchers from various Spanish, Italian and Latin American universities, the book will be of interest to students, researchers and practitioners, as well as members of the general public interested in the world of Economics and Management.

Subject Headings for School and Public Libraries

A diagnosis of breast cancer is among the most frightening moments in a person's life—so frightening that even to formulate questions for the doctor may seem impossible. This helpful book is written as a guide for women and men facing breast cancer and for their caring families and friends. It is also written for women who have not been diagnosed with breast cancer but are concerned that they may be. Drawing on her many years of experience with breast cancer patients, Dr. Ruth H. Grobstein provides exactly the information they want and need in order to make the best health decisions. Her jargon-free book deals with general issues of interest to all women—mammography, hormone replacement therapy, risk factors for breast cancer, and more—as well as the numerous issues that patients diagnosed with breast cancer confront. Her book will be an indispensable companion, providing reliable information for patients on the journey through a sometimes confusing and impersonal medical system.

The Circle of Knowledge: A Classified, Simplified, Visualized Book of Answers

Updated with improvements, updates, and new features included in Ubuntu MATE's 20.04 LTS (Long Term Support) release, I have written the third edition of this book for computer users who just want the information they need to learn how to use Ubuntu MATE and its applications. Reading this book can help you build your confidence and competence in using Ubuntu MATE. It is written from the perspective that Ubuntu MATE is a typical modern Linux for the average computer user who needs to do things like browsing the Internet, checking email, using a word processor, reading and storing document files, viewing and editing photos, watching videos, listening to music, and subscribing to podcasts. Many of the applications available in Ubuntu MATE are also available in other flavors of Ubuntu and in other distributions (versions) of Linux. The applications I mention in this book work in the same way regardless of the operating system. While it's great for users who have migrated from Windows or macOS, Ubuntu MATE is also an excellent choice for any kind of computer user, from the casual home user to the professional software developer. That's because of its modern, functionally thought-out design. Ubuntu MATE is capable enough for even the most experienced computer user because, well, it's Linux! It has the power of every other Linux built-in. Simply put, it provides a practical alternative to other software that can run on your computer.

Whether you are new to Linux, upgrading from Windows or macOS to Linux, or just thinking about moving to Linux, this book will provide you with practical, day-to-day advice on how you can use Ubuntu MATE and its applications. This book is a guide for new users and a reference for all users of Linux.

Words to Rhyme with

Surveys current knowledge of how the human brain functions, notes parallels with the development of computers, and predicts how new brain research will influence future computer designs

The Curious Lore of Precious Stones

"The Circle of Knowledge: A Classified, Simplified, Visualized Book of Answers" by Various. Published by Good Press. Good Press publishes a wide range of titles that encompasses every genre. From well-known classics & literary fiction and non-fiction to forgotten—or yet undiscovered gems—of world literature, we issue the books that need to be read. Each Good Press edition has been meticulously edited and formatted to boost readability for all e-readers and devices. Our goal is to produce eBooks that are user-friendly and accessible to everyone in a high-quality digital format.

The Sophisticated Investor

Now a major motion picture nominated for nine Academy Awards. Narrative of Solomon Northup, a Citizen of New-York, Kidnapped in Washington City in 1841, and Rescued in 1853. Twelve Years a Slave by Solomon Northup is a memoir of a black man who was born free in New York state but kidnapped, sold into slavery and kept in bondage for 12 years in Louisiana before the American Civil War. He provided details of slave markets in Washington, DC, as well as describing at length cotton cultivation on major plantations in Louisiana.

Artificial Intelligence XXXVI

Provides headings for topics, literary and organizational forms, and names of individuals, corporate bodies, places, works, and so on, that might be needed to catalog a general collection used at least in part by children and readers or viewers interested in popular topics.

The Language Instinct

The classic book on the development of human language by the world's leading expert on language and the mind. In this classic, the world's expert on language and mind lucidly explains everything you always wanted to know about language: how it works, how children learn it, how it changes, how the brain computes it, and how it evolved. With deft use of examples of humor and wordplay, Steven Pinker weaves our vast knowledge of language into a compelling story: language is a human instinct, wired into our brains by evolution. The Language Instinct received the William James Book Prize from the American Psychological Association and the Public Interest Award from the Linguistics Society of America. This edition includes an update on advances in the science of language since The Language Instinct was first published.

Using Information Technology

A popular method for selecting the number of clusters is based on stability arguments: one chooses the number of clusters such that the corresponding clustering results are most stable. In recent years, a series of papers has analyzed the behavior of this method from a theoretical point of view. However, the results are very technical and difficult to interpret for non-experts. In this paper we give a high-level overview about the existing literature on clustering stability. In addition to presenting the results in a slightly informal but accessible way, we relate them to each other and discuss their different implications.

More than Beef, Pork and Chicken - The Production, Processing, and Quality Traits of Other Sources of Meat for Human Diet

Park's Textbook of Preventive and Social Medicine

Lists more than 80,000 rhyming words, including single, double, and triple rhymes, and offers information on rhyme schemes, meter, and poetic forms.
